# GEAR UP FOR THE ULTIMATE RIDE

At BRP, we know that being fully equipped with the right gear matching your riding style is a must. So based on which of these rider profiles you fit or depending on the outside temperature, we've got you covered.

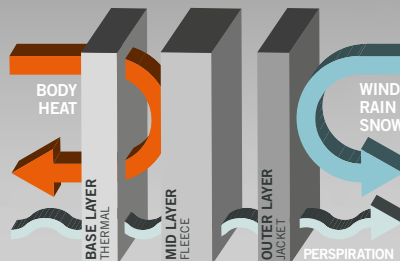

## WINTER

## TECHNICAL WEAR

Base layers are recommended by experts and pros to keep you dry, warm and comfortable, while managing your temperature balance.

Read the Side-by-Side vehicle (SSV) and All Terrain Vehicle (ATV) Operator's Guides and watch the Safety DVD before driving. BRP highly recommends that all-terrain vehicle (ATV) drivers take a training course. ATVs can be hazardous to operate. For both ATVs and side-by-side vehicles (SSVs), the operator and passenger should wear a helmet, eye protection and other protective clothing. Respect the minimum age as required by law. For SSVs, fasten lateral net and seat belt at all times and passenger must be at least 12 years old and able to hold handgrips and plant feet while seated against the backrest. Never carry passengers on any ATV not specifically designated for such use. For ATVs, BRP recommends not to carry any passengers under the age of 12. Make sure that all laws, regulations, and BRP's warnings / recommendations for ATV and SSV passengers are respected. Always remember that riding and alcohol/drugs don't mix. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Ride responsibly. BRP urges you to "TREAD LIGHTLY" on public and private lands. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when you ride. Always ride responsibly and safely. Never carry passengers on any ATV not specifically designated for such use. Highly skilled operators under controlled conditions appear in this brochure. Do not attempt these manoeuvres if they are beyond your skill level. Pictures taken outward, on private land. BRP reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring obligation. Some models depicted herein may include optional equipment or not available in your country. Prices are based on Manufacturer Recommended Retail Prices. Please refer to your authorised Can-Am dealer for your own personalised quotation. Depending on location, products are distributed by BRP European

## TECHNICAL WEAR

## OUTER LAYER TECHNICAL TERMINOLOGY

### RPM TECHNOLOGY

**BRP developed its own waterproof/windproof/breathable technology specifically for powersports gear: RPM.**

It's a special coating that prevents wind and moisture from entering while allowing sweat to escape. The key is that it is specifically designed for powersports, not slower, less rugged use. Garments labeled RPM MAX also have 100% of their seams and logos sealed, so water can't enter through their potential openings.

**Critical seams and logo sealed**

**All seams and logo sealed**

### TEFLON

We use a Teflon coating on some garments. It's extremely slippery, so water, dirt and stains slide right off. Teflon HT maintains its performance up to 30 washes, compared to other coatings that last only one to five washings.

### HIPORA

Windproof, breathable and waterproof membrane that features unique polyurethane coating technology and delivers excellent moisture management.

## PRIMALOFT INSULATION

**When it comes to insulation, we choose the best.  
We choose PrimaLoft.**

### WARMER

Ultrafine fibers form tiny air pockets that trap body heat, keeping you warm. As warm as goose down.

### SOFT

Ultrafine fibers flex easily, so garments are flexible and move easily.

### BREATHABLE

Moisture vapor is transported through the fine fibers and away from the skin.

### WATER RESISTANT

PrimaLoft insulation dries faster than goose down because its fine fibers create a tight surface tension that resists moisture penetration.

### PRIMALOFT ONE

Warmer – wet or dry – than any other synthetic insulation. This ultimate down-like microfiber insulation is quick drying, soft and breathable. It is also very lightweight, compressible and thermally efficient.

### CRESTA BY PRIMALOFT

PrimaLoft Cresta offers warmth without weight and extra bulk. It is designed to keep you warm and comfortable throughout the day.

# SIZING CHART RIDING GEAR

## HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

### Chest/Bust

Measure under your arms, around the fullest part of your chest.

### Waist

Measure around your natural waistline, keeping one finger between the tape and body.

### Gloves

Measure palm width.

### Inseam

Without shoes, from crotch to the floor.

### Arm length

Hand on hip, from centre back neck bone, along shoulder point around elbow to bottom of wrist bone.

### Head

Around your head, from the centre of the forehead, above the ears and over the natural bump at the back of the head.

## MAKE EASY WORK OF THE TOUGHEST TASK.

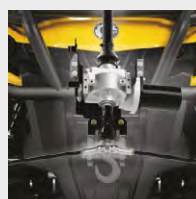

Setting the standard by which 6x6 ATVs must now be judged, the NEW Can-Am Outlander 6x6 1000 XT is built for life as a heavy-duty hero. The Rotax V-Twin 1000 engine delivers true on-demand six-wheel power to get you where you need to go. Experience the easy handling and comfort delivered by the double Torsional Trailing-arm Independent (TTI<sup>2</sup>) rear suspension assisted by its Quick-Release sway bar. Profit from the industry's most versatile cargo box, with its dual-level design, tilt-assist dumping and 318-kg capacity.

OUTLANDER 6X6 1000 XT

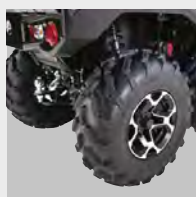

### STANDARD FEATURES

Rotax V-Twin 1000, SST G2 frame, multipurpose rack with LinQ quick-attach system, 12-in. cast-aluminum wheels with machined finish and 26-in. Carlisle ACT tires, double a-arm front suspension and digitally encoded Security System (D.E.S.S.)

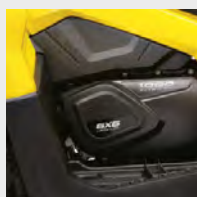

### TRI-MODE DYNAMIC POWER STEERING (DPS) WITH VISCO-LOK QE AUTO-LOCKING FRONT DIFFERENTIAL

With three selectable settings for steering assistance. Less assistance at high speeds and more at low speeds. With Visco-Lok QE auto-locking front differential, which includes all the benefits and features of the standard Visco-Lok but with a quicker engagement point.

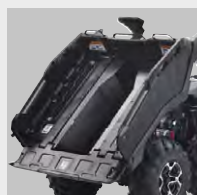

### TTI<sup>2</sup>

Double Torsional Trailing arm Independent (TTI<sup>2</sup>) rear suspension offers increased stability, high suspension travel at 23.6 cm, and includes a Quick-Release sway bar for more comfortable ride unloaded on bumpy terrain.

### EXTRA LOW L-GEAR TRANSMISSION

Extra low L-gear gives more comfort for low-speed riding and a better traction when pulling heavy loads.

### INDUSTRY EXCLUSIVE DUAL-LEVEL CARGO BOX WITH MODULAR ACCESSORIES

The industry's most versatile and usable cargo box design has tilt-assist dumping, a 318-kg cargo capacity, and over 442L of closed storage with accessories. The key to high versatility and fast adaptability is modular design of cargo solutions.

### ON-DEMAND REAL SIX-WHEEL DRIVE

In 6x6 mode, Visco-Lok QE front differential engages the front wheels when more traction is needed. In 4x6 mode, the four rear wheels are engaged.

## PARTS & ACCESSORIES

### SIDE WALLS & TAIL GATE

The side walls and tail gate allow a quick and easy conversion of the cargo bed into a trunk with plenty of room. The rotationally molded walls provide extreme durability for hard work - in all conditions.

715001989

### HARD TOP

The largest cargo box on the market (440 l) provides excellent protection. Locking secures your belongings and the usability of the cover is outstanding: the cover raises assisted by gas cylinders.

715002394

### FULL-BODY SKIDPLATE, PLASTIC

A full-body skidplate designed to protect the frame and the engine case from rough terrain conditions. The plastic allows your ATV to slide easily over stumps and logs.

860200896

### 6X6 TAILGATE EXTENSION/DIVIDER

The sturdy tail gate extension provides a 25 cm extension to the cargo space. Thanks to the longer cargo bed, even large loads pose no problem. With the help of LinQ quick locks, the extension also acts as a solid space divider for the cargo bed.

715002017

### 6X6 LOG BARS

Log bars allow you to convert the cargo bed into a perfect transport space for 120-cm timber. The driver's safety is guaranteed by the protective front screen

715001987

### 6X6 REAR WINCH KIT

The remote-controlled rear winch is a godsend when you want to pull yourself out of a tough spot or move heavy loads.

715002067

### RT30 WARN WINCH KIT

- Fully-sealed winch with a pulling strength capability of 1,361 kg.
- Includes a 0.9 HP motor, 15.2 m of 5 mm wire rope, an ergonomically designed clutch knob, a mechanical brake, hand-held remote, potted-and-sealed mini-rocker handlebar switch, waterproof contactor and roller fairlead.
- Winch mounting plate (715000927) required for Renegade.
- CE certified.

## PARTS & ACCESSORIES

### FOREST PRO LOG 300 – EASY FIREWOOD PROCESSING EVEN IN ROUGH TERRAIN

The Forest Pro Log 300 is designed to make your firewood processing easier! Thanks to the LOG 300's generous ground clearance, you can process firewood even in hard-to-reach places.

The LOG 300 cuts logs using a hydraulic chainsaw, which is both reliable and efficient. The chainsaw's chain only rotates when wood is being cut. Log splitting is performed with a hydraulic cylinder, which activates automatically after a log is cut by the chainsaw.

As an optional accessory, you can also attach a hydraulic conveyor. Two length options are available, 2.3 and 3.8 metres.

The LOG 300 has three power source options: external hydraulics, an electric motor or a combustion engine.

Ask your dealer for more information

### WINTER PRO / WINTER PRO V2

With the Winter Pro snowblower you can make all the houses winter chores fast and easy. Winter Pro is designed and built for the Scandinavian conditions and it has several innovative features, which will make your life easier.

Easy Connect Pro- connecting system makes it easy to attach your ATV on the snowblower. All you need is a traiker hitch on your ATV. Electric start and a joystick to steer the chute, dual stage auger and working light (Sold as an accessory) makes it to a professional level tool for the winter time. Scraper bar height is easily adjustable with the help of the skid shoes. Scraper bar is attached to a boxed steel construction, which makes the snowblower very rigid.

You will have two engine choices: 1-cylinder 14hp and a V2 high power version, with 23hp. Both engines are designed by the American Kohler. Engines are produced and tested to withstand the rough conditions of the Nordic countries.
