MISSION STATEMENT

The conception of Klim Aggressive Sled Wear came from our frustration of not being able to find riding gear that met our aggressive style of riding. Everything was both too big and bulky or too lightweight and did not withstand aggressive riding. We set out to design clothing that would meet our needs and the needs of all the aggressive riders out there.

Our design philosophy is to get out and ride as much as we possibly can. Putting our designs and the materials we use to the ultimate test under the toughest conditions. We are snowmobile enthusiasts just like you who want gear that will not only keep us comfortable, but also last.

Through new technical innovations from W.L. Gore & Associates, Inc., we now bring you GORE-TEX® XCR™ outerwear — the highest performance GORE-TEX® garment.

GORE-TEX® XCR™ outerwear provides maximum performance with increased breathability to keep you more comfortable while you are active outdoors in all types of weather. This new GORE-TEX® XCR™ outerwear provides on average 25% more breathability than GORE-TEX® outerwear.

WARRANTY

We warrant every product we make to be free of manufacturer defects. Should you have a warranty issue, return the item to us. We will repair it if possible or replace all valid warranty items. Please clean your product before returning it to us or cleaning charges must be assessed before review can be made. We don't like stinky products. Normal wear and tear, modifications, alterations, negligence, damage and use for a purpose other than for which it was designed, are not covered by Klim's warranty.

Inferno Pant/style #3055**Sizes:** XS-3XL**Colors:** Black**Fabrics:** Yukon 4x4 Stretch®**Price:** \$76.99 U.S.**Features:**

- breathable
- flatlock stitching
- elastic at waist and cuffs
- drawstring

Fabrics:

Yukon 4x4 Stretch®

The Inferno Pant is designed with the same technical fabric as the Inferno Shirt, Yukon 4x4 Stretch fabric.® It is the ideal base layer piece to be worn next-to-skin. Gathered at the ankles and an elastic drawstring gives the Inferno Pant a very comfortable fit. Flatlock stitching has also been added to increase the comfort of this piece. A heat transferred KLIM logo on the upper, left thigh accents this pant. Typically worn one size smaller than your KLIM outerwear.

www.klimesledwear.com / (208) 745-7699

**Features:**

- Breathable
- Flatlock stitching

Fabrics:

Yukon 4x4 stretch® fabric w/antimicrobial finish

The Inferno Shirt is a pullover with a half zipper. It's constructed with Yukon 4x4 Stretch fabric, which is breathable, has an anti-microbial finish and is four way stretch. Heat transferred "K" logo on front neck and KLIM logo on upper, center back. Comfort has been increased with the use of flatlock stitching. Not only is it breathable, but it also is an excellent moisture-managing piece to be worn next-to-skin. This keeps the rider warm and dry from the inside out and provides excellent freedom of movement and maximum moisture management. Typically worn one size smaller than your KLIM outerwear.

Inferno Shirt/style #3054**Sizes:** XS-2XL**Colors:** Black / Gray**Fabrics:** Yukon 4x4 Stretch® fabric**Price:** \$79.99 U.S.

TEAM Pullover/style #3014

Sizes: M-3XL
Color: BLACK
Price: \$74.99 U.S.

**Features:**

- Front zipper
- Mesh side panels
- Windproof
- Lightweight

Fabrics:

100% Polyester Micro Fiber

The TEAM Pullover features a front zipper, mesh side panels, the same team graphics as the TEAM Jersey, and is windproof. Worn by ZBROZ (Zollingers) Racing with over 10 World Titles to their credit, this pullover is great for the track or for a spring day of riding over our Inferno Shirt.

www.klimsledwear.com / (208) 745-7699

**Features:**

- Breathable
- Moisture Wicking

Fabrics:

100% Polyester Micro Fiber

The TEAM Jersey is made from AirKontrol™ 100% polyester micro fiber and offers the rider a jersey with superior breathability and excellent garment life. The Team Jersey can be worn as an outerwear piece over our Inferno Shirt or as a next-to-skin base layer. The TEAM Jersey is a perfect compliment to our layering system and allows you to obtain the same great new look that our factory race teams wear.

TEAM Jersey / style #3015

PowerXross/style #3010 ■ Togwotee/style #3011

Sizes: M-2XL
Color: BLACK / BLUE / RED
Price: PowerXross \$69.99 U.S.
Togwotee \$69.99 U.S.

The PowerXross is the result of the time and effort spent working with our factory and testing in the field to create a better product. The PowerXross glove is truly the ultimate in light-weight gloves without compromising durability and waterproofness. The PowerXross glove is the answer for those that are looking for a waterproof motocross style glove. The glove is waterproof and breathable which is made possible through the use of Gore-Tex®. Durability is achieved by using a double reinforced synthetic leather palm. Also features such as wrap around fingertips add to the longevity of the gloves.

POWERXROSS GLOVE
style #3010
Sizes: M-2XL Color: Black / Blue / Red
Price: \$69.99

TOGWOTEE GLOVE
style #3011
Sizes: M-2XL Color: Black / Blue / Red
Price: \$69.99

A next generation of glove, the Togwotee glove will gain the respect of all who wear it. Yes, the Togwotee has some of the same features as its predecessor the Detontor, but has been resized and reworked to be the best glove on the market. Aggressive riders will find that the Togwotee glove will be one of the most versatile pieces in their bag.

The Togwotee glove features rugged materials to increase the durability of the product. These gloves have been constructed of corded nylon on the back of the hand for durability and for added insulation. Rubber Tee has been added to the palm to give maximum grip. We have also added a gusset to the palm to increase the dexterity of the glove. Waterproofness and breathability is achieved by using Gore Tex inserts.

- Engineered with padding at all key stress and pressure points.
- Constructed with wool for warmth and Acrylic fibers for durability and optimum wicking.

KLIM SOCK style #3018
Sizes: 7-10 (Med.) 11-14 (Lrg.) Price: \$19.99 U.S.

The Velocity Boot is like no other boot that you have ridden in. Traditionally snowmobile boots are sloppy fitting; give no support and no added protection. The Velocity Boot is form fitting, gives the foot better support and will give greater protection. That is why you will be amazed at what this boot has to offer.

The outsole of the boot is made from high abrasion resistant rubber making the sole of the boot long lasting. The sole is also stiffer giving more support, reduces the risk of ankle injuries and gives a more secure foot placement. An aggressive tread pattern has been used to better grip the running boards. High abrasion material is also used on the toe cap to increase the amount of abuse the boot can take.

The liner of the boot also sets the Velocity Boot in a class of its own. The thermo liner itself gives added comfort and will mold to the rider's feet after a few rides. The liner has a separate lacing system to insure a tighter fit. In addition, the liner works in conjunction with the outer boot to give greater support for the ankle and throughout the whole foot.

Other qualities that have been taken into account are features such as lightweight, warmth and durability.

TEAM GEAR BAG style #3013
Sizes: One size Colors: Black Price: \$69.99 U.S.

Team Gear bag is the perfect size for carrying all your goodies for a day or two of riding. Measuring 38" long x 16" tall x 14" wide, one end is for boots, the other, a lined helmet bag. The center section will fit your outerwear, a few layering pieces, and room for a few extra's. Easy to carry and priced right too!

LAYERING. THE SMARTER WAY TO DRESS

For aggressive riders being able to stay comfortable means dressing in layers. Riding conditions, temperature, level of activity and riding style are all factors that are constantly changing directly affecting your level of comfort. The layering system is a flexible system that allows you to not only dress for one type of condition, but to dress comfortably for a wide range of changing conditions.

There are three components to the layering system and each works together to create a complete system.

- **BASE LAYER**
- **MID-WEIGHT LAYER**
- **OUTER LAYER**

LAYER **1**
BASE
LAYER

The first layer needs to keep you warm and dry on the inside. And since it's closest to the skin, this means long underwear that's soft and lightweight not itchy or bulky,

as wool tends to be. Cotton isn't good either, and just like wool, it dries slowly and keeps moisture buildup next to the skin. Synthetic fibers like polypropylene, fleece and polyester are comfortable and dry quickly as they pull moisture away from your skin toward the next layer, where it can evaporate.

Klim's Base Layer:

Features three different pieces that fit into the base layer category our Frontier Shirt and the Inferno Shirt and Pant. These three pieces work both in transporting moisture away from your body and in keeping you warm.

LAYER **2**
MID-WEIGHT

As the temperature drops or you begin to get chilled, the key to staying warm is ensuring that you are well insulated against the cold. Ideally, the insulator

should trap warm air while allowing moisture to escape. Each layer should be lightweight. When layering, add as many layers as is needed to beat the cold. When it warms up or your level of activity increases, just take off a layer. Make sure that the garments are easy to take on and off. Individuals who run at a hotter temperature are often happy with the Inferno Shirt and Pant for insulation.

Klim's Mid-Weight Layer:

Our Mid-Weight Line-up consists of our fleece pant, jacket and vest. All three piece provide excellent warmth without the unneeded bulk and are made from synthetic fabrics which will not hold onto moisture.

LAYER **3**
OUTER
LAYER

The outer layer is your best defense against the elements. Jackets and pants should be totally waterproof and windproof but also allow perspiration vapor to vent. This layer reduces heat loss and

assists the other layers at keeping the rider dry and comfortable. There are several performance fabrics available but only one carries the Gore-Tex® label. When selecting size make sure the shell is large enough to fit over the other layers. Be sure to consider your activity and the level of protection you'll need.

Backcountry winter activities come with a certain element of risk and spending the night in the elements is not uncommon. Be prepared!

Gore-Tex®

Gore-Tex® is the membrane that is laminated to a surface fabric. It is an extremely thin, lightweight membrane that is the most waterproof and breathable fabric available at any

cost today. Gore-Tex® fabric is durably waterproof and will remain waterproof for years, even after laundering, flexing or abrasion.

The Gore-Tex® membrane features an advanced composite made of two different polymers. One is a membrane containing more than 9 billion microscopic pores per square inch. These pores let water vapor from perspiration escape, while keeping out water such as rain. Integrated into the structure is a second polymer that prevents that penetration of contaminating substances such as gasoline, oils, cosmetics, insect repellents and food substances.

"Breathable" means that perspiration vapor is transported away from your body and out through your clothing, keeping you dry on the inside. Breathability is just as important to comfort as waterproofness.
