F4 HELMET NO. 3006

Creating a level of comfort never felt before. The Klim F4 Helmet, with an unprecedented 41 air-craving intakes, creates a new standard in helmet ventilation technology. It all starts with a design that more effectively channels air into the helmet where the EPS liner maximizes airflow over the entire head to dramatically cool the rider's head. Safety standards have been exceeded not only through the use of aerospace materials, but also in the design of the helmet. The F4 exceeds Snell M2000, M2005 and U.S. DOT standards.

- **RAM AIR INDUCTION TECHNOLOGY**
With 41 Air-Craving Intakes the F4 Sets a New Standard In Ventilation Technology

- Non-Intrusive Eye Port Increases Field of Vision
- Ram Air Induction Scoops Not Only Mine Air as It Flows Over the Helmet, But Helps to Increase the Structural Integrity of the Helmet
- Pressure Chamber Network Liner Helps to Maximize Airflow Over the Head
- High Volume Air Channels Allow for More Air Capacity Inside the Helmet
- Zonal Fiber Select Construction with Aerospace Fiberglass, Carbon Fiber and Kevlar™ Ensure a Safer Helmet
- Exceeds Snell M2000, M2005 and U.S. DOT Standards
- Moisture-Wicking Foam Liner and Liner Material
- Patents Pending

INCLUDED:

- Cold Weather Liner with Gore WINDSTOPPER® Technology
- Removeable Cheekpads
- Extra Cheekpads
- Removeable Comfort Liner
- Breath Deflector
- Deluxe Nylon Carrying Bag
- Spare Visor and Visor Bolt

COMFORT MAPPING TECHNOLOGY

40

A technical piece of outerwear is not just a few pieces of fancy fabrics stitched together. Klim knows this and has spent years testing and developing riding gear that provides users with the utmost comfort and protection. Key design elements include waterproofness, breathability, mobility, protection, fit, durability, and functionality. Take one of these out of the design equation or underdevelop one and you have an inferior product. By understanding this and developing new technology, Klim has elevated the standard it already set by providing the best performing clothing on the market today.

For the 2008 season, Klim is introducing a revolution in comfort with a new process never considered before - Comfort Mapping and Three Layer Technology. By better understanding the body's requirements, we've developed riding gear that breathes better, is more mobile and provides better protection in colder weather while also being comfortable in warm conditions.

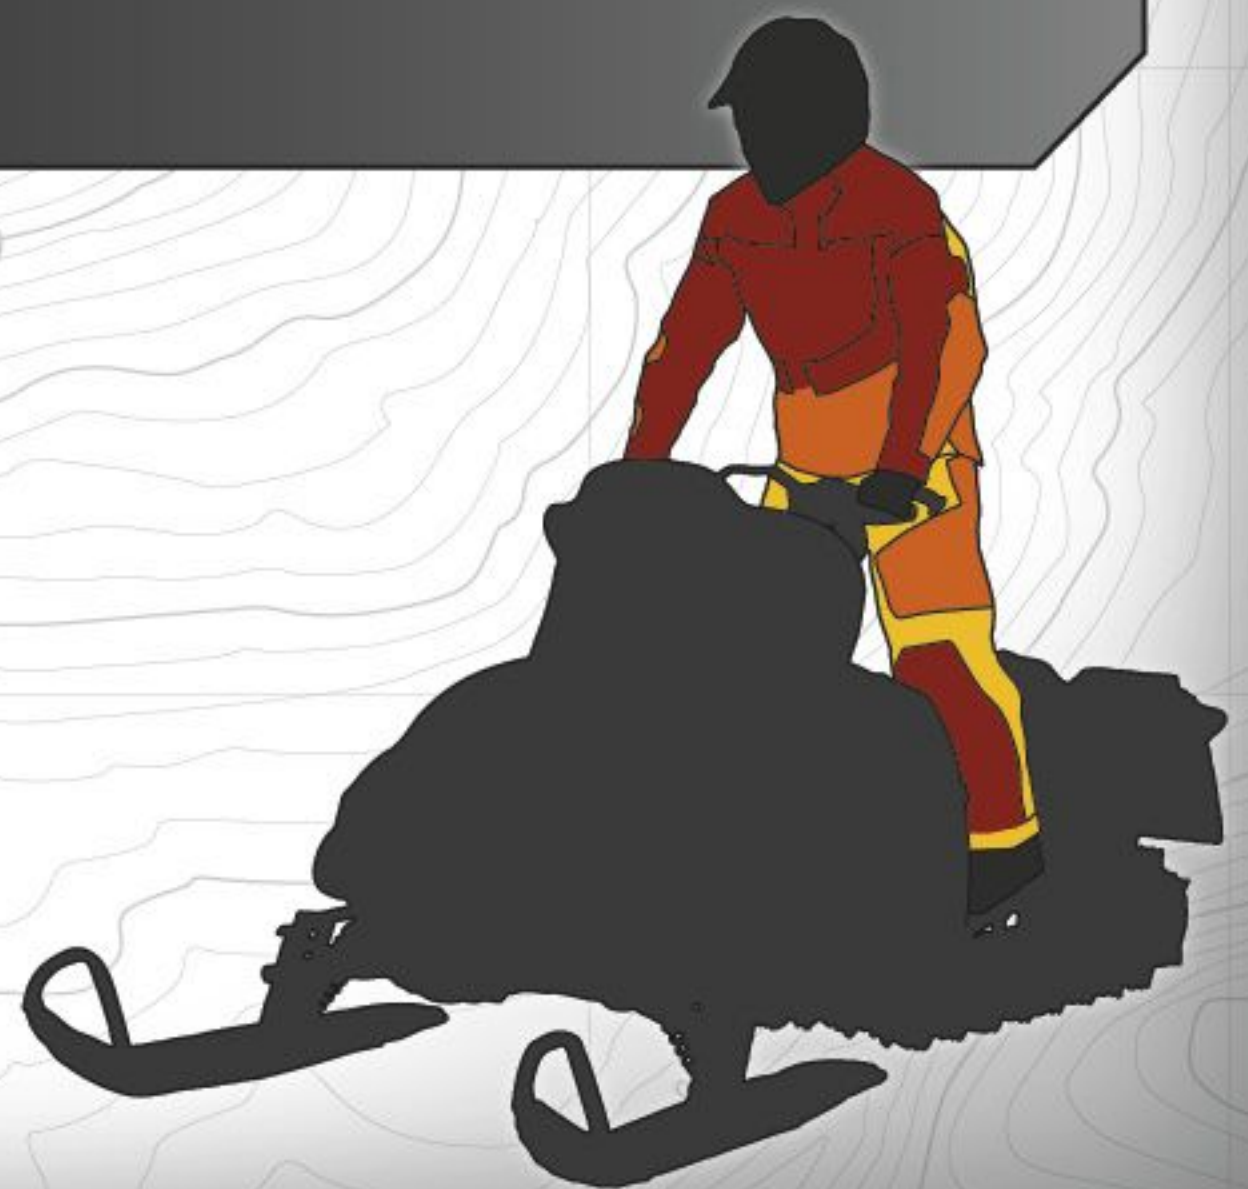

COMFORT MAPPING

In traditional clothing, the liner is one-dimensional and treats the thermal requirements of different parts of the body the same. In developing Klim's Comfort Mapping Technology, the needs of each region of the body is examined. That information is used to integrate insulated materials into strategic areas of the clothing. This helps effectively manage the body's thermal requirements by allowing better breathability, enhanced mobility, and maintaining a comfortable temperature level in any condition.

THREE LAYER TECHNOLOGY

Three Layer Construction plays a vital role in applying Comfort Mapping to the clothing. A three-layer fabric is made up of three different pieces of material that each have a specific purpose. These three layers are laminated together to form one integrated piece. The outer fabric is usually a durable piece of nylon that protects the riding gear. The middle layer is a GORE-TEX® membrane that is durably waterproof and breathable. The inner layer or backer is where a user really benefits

from Comfort Mapping. A thicker inner layer is used in areas where the body needs more insulation. A thinner material is used in areas that build up a lot of heat. With this exclusive Klim technology, we are able to control the thermal properties of the garment and create the world's most comfortable, technical and durable gear.

HIGH THERMAL RETENTION

These areas are exposed to windchill and thermal transfer. To counteract these effects, thermal retention in these areas is greatest.

MEDIUM THERMAL RETENTION

For zones that do not require maximum heat retention and to minimize bulk, a medium weight liner is used to allow some heat retention and maximize breathability.

LOW THERMAL RETENTION

To promote maximum breathability and comfort, some areas have minimal thermal retention allowing moisture and unwanted heat to escape.

REVOLT JERSEY

NO. 3315 **NEW**

Essential to every good ride is having the right equipment. The Revolt Jersey fits that bill with its ability to wick moisture, keeping the rider dry and comfortable and its rider specific patterning that allows the rider to move without any restriction or binding. The Revolt Jersey also features a silicone back patch that keeps it tucked in the pants, non-interfering seam construction for all-day comfort, and underarm mesh panels that allow unwanted heat to escape. Take the Revolt Jersey with you on your next ride and you will have the right equipment.

FEATURES:

- Padded Shoulders
- Cut-Away Sleeves
- Padded Elbows
- Breathable Moisture-Wicking Fabrics
- No-Fade Sublimated Graphics
- Silicone Back Patch
- Flex Neck Collar
- Non-Restrictive Cuffs
- Raglan Sleeve Design With Flat Stitching
- Drop Tail

FABRIC: 100% Micro Fiber Polyester

SIZES: S • M • L • XL • 2XL • 3XL

COLORS: Black • Red • Blue • Yellow • Orange

RETAIL: \$39.99

MOJAVE JERSEY

NO. 3009

The Mojave Jersey has been designed from the first stitch to keep you comfortable. Seams are constructed to be non-abrasive and to optimize comfort. Ventilation panels have been placed over hot spots of the upper body to allow for maximum air circulation.

FEATURES:

- Padded Shoulders and Elbows
- Silicone Back Stripes to Keep Tucked In
- 2 Vent Maximizing Mesh Materials
- Moisture Wicking Materials
- Comfort Mapped Ventilation
- Non-Interfering Seam Construction
- Non-Restrictive Cuffs

RADIUM GTX BOOT NO. 3212

For aggressive riders who need the ultimate in weather protection and unsurpassed functionality, the Radium GORE-TEX® Boot with a removable liner offers this and more. Constructed with GORE-TEX® product technology, the rider's feet stay dry and allows sweat from the inside to escape. The Radium has been specifically engineered to take the abuse the tunnel and running boards dish out by adding additional protective material to the boot. It offers more rigid support than its brother, the Adrenaline Boot, but does not compromise when it comes to freedom of movement. The new Radium sole is specifically designed from lug pattern to the durometer of rubber to ensure total traction on the running boards even when they are full of snow.

FEATURES:

- GORE-TEX® Product Technology
- GUARANTEED TO KEEP YOU DRY®
- Rider-Specific Forward Flex with Rigid Side to Side Support
- Snowmobile-Specific Designed Sole with Exclusive Dual Durometer Rubber Provides Superior Traction on the Running Boards and in the Snow
- Encapsulated EVA Foam Mid-Sole and Stiff Lasting Board Stiffens the Sole, Helps Disperse Shock and Protects Bottom of the Feet
- Kicker Toe Abrasion Resistant Toe Piece Protects the Front of the Boot From Excess Abrasion
- Rubberized Spine and Heel Aids in Support, Controls Flex, Resist Abrasion and Helps Keep Snow Gaiter in Place
- Zonal Lacing Keeps Laces Tight while Lacing the Boot
- Hinged Tongue Makes for Easy Entry
- Outer Boot Made with Military Grade Leather

REMOVABLE LINER

- Slip Pad for Easier Entry
- Non-Slip Patch Keeps Heel Locked in Place
- Exo-Lacing System with Center Pull Technology Gives a More Secure Fit
- Breathable
- Padded Toe Box Helps Protect Toes
- Leather-Covered Heel Works with Outer Boot to Prevent Liner from Slipping

BEST OF THUNDERSTRUCK DVD

NO. 3104

The first 10 years of Thunderstruck Films has taken a large group of crazy friends and put their snowmobiling antics in front of tens of thousands of people the world over. TSBO also highlights many "top-ten" lists... Countdown's of the top 10 climbs, the top 10 crashes, etc., all put to video and with the natural sounds of the sleds backed by all the music you love from our first 10 films. This must-have movie will shake you down to your sledding core as you yearn to get on the snow and live out your own powder-filled fantasies!

RETAIL: \$29.99

WARRANTY

We warrant every product we make to be free of manufacturer defects for the **lifetime of the product. Additionally, all KLIM GORE-TEX® products are GUARANTEED TO KEEP YOU DRY® for the **lifetime of the product. Should you have a warranty issue, call us for a case number. We will repair it if possible or replace all valid warranty items. Please have all warranty item claims clean for evaluation or it will be sent back to you as is without an inspection being made. This warranty does not cover damage caused by accident, improper care, negligence, normal wear and tear, modifications, alterations, or use for a purpose other than which it was designed. If this product fails due to a manufacturing or material defect, we will repair the product without charge, or replace it at our discretion. This warranty is not transferable. Product must be registered with Klim to receive warranty coverage.

* KLIM BOOTS are warranted against defects in materials and workmanship for one [1] year from the date of purchase. Aggressive running boards will accelerate the wear and tear on the soles of the boots. This is considered normal wear and tear. General warranty terms apply.

* The KLIM F4 HELMET is warranted against defects in materials and workmanship for five [5] years from the date of purchase. General warranty terms apply.

** The lifetime of a product unfortunately does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, cuts, punctures and burns will void the lifetime warranty of the product even if the warranty issue is not related to these damages.
