STEEP CATEGORY

KLIM Technical Riding Gear was born in the high-altitude and intense terrain of the Rocky Mountain West. Our STEEP Category of all-terrain gear is developed with the ultimate blends of intensely durable fabrics, extreme weather blocking material technology, intelligent high-mobility patterns and the highest levels of true breathability in the industry. At KLIM, there is no room for compromise in any direction of product development or performance. And the STEEP lineup of highly active riding gear is ready to go higher than ever before.

PRO SERIES

KLIM'S PRO SERIES of Technical Riding Gear is specifically designed to be the ultimate in high-activity, max-intensity riding. Inside PRO SERIES gear you'll see unmatched durability in conjunction with industry leading durable weather protection and breathability. Aggressive designs utilizing GORE-TEX® Pro Shell Technology are tested and proven to perform with unmatched success.

BOONDOCK SERIES

KLIM'S BOONDOCK SERIES brings the backcountry, go-anywhere attitude and all-conditions versatility to your riding gear wardrobe. Built with inherent toughness and high levels of crossover appeal, the BOONDOCK SERIES offers options for multiple rider preferences and styles. Incorporating cutting edge designs with high level fabrics and insulating technologies, the BOONDOCK SERIES guarantees a great ride. GORE-TEX® Performance Shell technologies are used throughout the BOONDOCK SERIES.

FREE RIDE SERIES

KLIM'S FREE RIDE SERIES delivers ultimate mobility and absolute unrestricted comfort to the STEEP category. Race inspired and designed to meet the needs of the most extreme athletes on the snow, the entire FREE RIDE SERIES screams no-frills performance. GORE-TEX® Performance Shell, durably waterproof/breathable and windproof Technology, intelligent ventilation and lightweight/abuse-resistant designs dominate here. Pick your line and rip with KLIM'S FREE RIDE SERIES.

KLIM brings the undeniable benefits of true Technical Riding Gear to the speed and distance crowd in a way that's never been done before. And the trails haven't been the same since. Now, every rider on the snow can get riding gear built specifically for their favorite riding style. For 2011-2012 the momentum continues with more products added and major updates given to our TRAIL category mainstays. The time to blast snow dust with KLIM has never been better—hold on.

TRAIL CATEGORY

ENDURANCE SERIES

The most intense, high mileage-worthy speed garments live in the ENDURANCE SERIES of KLIM Technical Riding Gear. Inside you'll find the unbeatable performance of our most advanced Thinsulate™ insulation and GORE-TEX® weather proofing technologies guaranteed to control body temps and keep riders warm and dry on the longest trips through the toughest weather. From innovative ventilation systems to the fullest featured cargo and reflective systems, nothing gets you way out there safer, drier and more comfortable than the ENDURANCE SERIES. For riders putting in the most miles, year-after-year, the ENDURANCE SERIES shines bright.

SPEED SERIES

Products inspired directly from aggressive speed freaks and flat-out racers populate the SPEED SERIES of KLIM Technical Riding Gear. Intelligent padding zones, high-profile reflective features and fast, clean style lines push KLIM'S SPEED gear past the competition. For riders battling race competition, their instigating buddies or just their own limits, the SPEED SERIES puts hyper-active performance and fast-paced performance out front. Integrated directly with high-quality Thinsulate™ and GORE-TEX® technologies, there is no match for durable, uncompromised performance.

PODIUM SERIES

Ready for champagne showers and championship photo shoots, the PODIUM SERIES brings factory race team performance to the consumer. Built with high-activity levels of Thinsulate™ insulation and efficient ventilation systems in their GORE-TEX® fabric technologies, the PODIUM SERIES brings race-shop and free-riding style and durability to KLIM'S Technical Riding Gear collection.

F4 HELMET [3306]

The KLIM F4 Helmet has forever changed the way motor sports enthusiasts define premium comfort and protection. For 2012, the revolution continues with the most ventilated, most comfortable and most feature-packed helmet in the outdoors. Riding a wave of momentum after the 2011 re-design, KLIM's F4 helmet looks to impress with the same improved fit, increased ventilation and superb graphic updates this year. What makes it so special? Moisture control, superior fit and unmatched quality and value. The KLIM F4 features 41 air-crawling intakes to eliminate heat buildup and move moisture off your head when you reach high activity levels. The drier your head, the better you feel and KLIM's complete F4 package—included with every helmet—includes a highly-breathable WINDSTOPPER liner for those ultra-cold days. The WINDSTOPPER liner allows superior breathability while blocking bone-chilling wind from over-cooling your head. For all your rides, the KLIM F4 showcases KLIM's uncompromised commitment to improving your experience by making you more comfortable in all conditions.

Ride smart. Stay dry. Wear KLIM.

VALDEZ PARKA [3470]

The most demanding riders in the world depend on the KLIM Valdez to keep them on top of their game. With Valdez-exclusive GORE-TEX® Pro Shell construction and Comfort-Mapping technology, no other jacket can keep up with the versatility and top level performance of the Valdez. This is the pinnacle piece of KLIM's non-insulated layering system, allowing high-activity riders to stay comfortable all day. From sweating out a technical line to forging a blizzard front, nothing beats KLIM's technical layering system and a Valdez Parka. The Valdez is made for riders who get hot, move all day and want to stay dry, comfortable and protected from the nastiest conditions on Earth.

NEW» TOMAHAWK PARKA [3371]

The completely redesigned Tomahawk comes into 2011-2012 full of momentum. An updated ventilation system (we've removed the pit zips and integrated vertical intake and exhaust ports for easier operation) and integrated, low-profile cargo options combine with the tested and proven durably waterproof GORE-TEX® Two Layer Performance Shell Technology. A guaranteed dry and comfortable ride is right here. Tomahawk riders are high-activity boondockers that build up a sweat and want a technical, high-contrast look to their gear.

KEITH CURTIS TRUSTS KLIM

KLIM factory racer Keith Curtis won nearly every race he entered during the Rocky Mountain Snowmobile Hillclimb Association (RMSHA) 2011 season. While his results speak for themselves, it's worth putting his season of dominance into perspective.

Curtis took home five class championships during the RMSHA series—one for every class he entered throughout the year. During seven events (34 different classes entered) he had 25 first place finishes. That's a winning percentage of 73%! He also wrapped up four second-place finishes and two third-place finishes for a total of 31 podiums out of 34 attempts (a 91% podium percentage).

In 2010/2011 you had an impressively successful year on the RMSHA race circuit. Was it your best racing year ever?

KC: Heck yes it was! Everything seemed to come together perfectly for me.

What made the biggest difference in last year's season compared to previous years—what do you credit your success to?

KC: Extensive amount of seat time on Polaris' Pro Chassis—It WORKS! All of my other sponsors stepping up to the plate with products that also work. Keeping me focused on the course, not my sled. KLIM's staff continuing to be innovative with their technical riding gear (New F4 Gear'd helmet) Boondocker's R&D department's dedication to keep their turbo systems problem free & Fast! EZ Ryde's tested & proven skid to soak up bumps and get over large obstacles. Polaris fuels & Lubricants offering tested lubricants to keep my machine running as good as new. Walker Evans shocks for working one on one with the new chassis to make it the best ride possible. Skinz Protective seat, front and rear bumpers as well as my favorite Skinz add-on: Powder Boards that totally eliminate snow build up. The University of Montana Western in Dillon, MT. for furthering my business education. SCS vinyl works making my sleds look the best in the circuit. ABS packs for keeping me safe while riding back country. 509 Goggles for keeping me fog free & stylish. Stud Boy Traction for aggressive carbides. Kold Kutter Racing screws for the much needed traction! V-Force Delta Reeds and all my other great sponsors for making me a competitive rider on the circuit!

Is it hard to describe snowmobile hill climb racing to someone that's never heard of it? How do you usually explain what you do?

KC: Hundreds of racers race against the clock from the bottom of the mountain to the top through a series of gates. The timing lights are triggered at the start and finish for each racer. Keep in mind while hundreds of racers make their way through the course obstacles start forming. (5 foot headwalls, 5 foot trenches, logs, stumps, moguls, technical sidehills, & corners) and all on a steep ascent.

What's the strongest skill or asset you bring to the racecourse?

KC: Hanging a leg and keeping my composure.

What's your biggest weakness on the hill?

KC: When there is no snow, obstacles tend to stick out much more... which disables me to be as fluid as I would like.

If you could design your ideal racecourse, what would it look like? Fast, technical, brutal, fire-pits, etc...?

KC: A very creative location that will draw a large crowd to watch the hillclimb. At the start, the

course would be set up as a hillcross with a couple 100' doubles, a rhythm section and large berms. The hill would have lots of snow with steep, off camber terrain & plenty of corners. Lastly, a location where spectators could have a blast watching—like the World Championship Hillclimb in Jackson Hole, WY.

Talk about your race sleds, what models do you run every weekend in which classes?

KC: For the 2012 season I will be running four new sleds in the Pro Chassis, all with 155" tracks. Pro Stock 600 will be the new 2012 PRO RMK 600. I am so stoked to race this particular sled. It is peppy, lightweight, & nimble. Pro Stock 800 & 1000 will be a 2012 RMK Assault 800. In the Pro Improved 800 class I will be running a 2012 RMK Assault 800 Improver. My Modified 800 class sled will be a 2012 RMK Assault 800 with a Boondocker Turbo.

Who does your sled work/modifications and maintenance?

KC: Me, friends and my sponsors and supporters. I have my friend Steven & my dad Fred that help me out tremendously with a lot of the work. The Polaris team works together to make the sleds work perfectly. On top of the team there are others that pour a tremendous amount of help into the sleds. Darin Gould (Race team captain), Jared & Rocky at Boondocker, Randy at Walker Evans Shocks, Steve at EZ Ryde suspension, Chris & PJ at Adventure Cycle and Sled, Kurtis at Kurt's Polaris, Max at Tri City Polaris, and Jack Struthers with Carls Cycles Sales. Basically, it comes out to a big team effort.

Any favorite setups or modifications you can give up for the tuners out there that want to build a world-championship hill climb sled?

KC: The revamped Boondocker Turbo system for 2012 rocks! Some of my other favorite add-ons would be the Powder Boards from Skinz Protective Gear, EZ Ryde suspension, & Starting Line Products

Powder Pro skis.

Do you put a lot of trust into what you see from the starting line? That is, how important is scouting the course to your actual run and how do you know what's going on at the top?

KC: Well, what I do is sit at the bottom of the hill with my spotting scope and watch the hill. I occasionally walk the hill to check out the obstacles first hand. I try to execute my lines perfectly but sometimes that is harder said than done!

You've done some off-road motorcycle racing as well; do you like racing against the clock or racing against people right next to you better?

KC: The adrenaline rush is in both. When you are talking winning by thousandths of a second in a RMSHA event, times get tense. The start of a motocross or cross-country race is also quite the adrenaline rush. Racing with someone next to me gives me the biggest rush so I would say it is a little more exciting.

With your busy race schedule, do you ever get to ride for fun? If so, what sort of riding do you love to

do more than anything?

KC: Mountain riding snowmobiles and motorcycles, the most technical riding that can be ridden.

How important is it to be able to trust your machine and your skill?

KC: Being confident and trusting my equipment is a large part of my success. I feel as if I am one with the sled and I am able to determine what my next move will be while being in complete control.

How long have you been wearing KLIM gear?

KC: 5 years

How important is it to be able to trust your riding gear?

KC: In the worst case scenario it could mean life or death if I'm not 100% confident in my gear. In the brutal winter conditions, I can trust Klim gear to help me achieve goals and ride comfortably while maintaining a dry composure. I have a hard time staying warm as it is but with the diverse clothing line Klim offers I am able to pick and choose what I need to stay comfortable in all conditions.

Why do you trust KLIM?

KC: TESTED & PROVEN from the most elite athletes in the world! What more could someone ask for!

WWW.KLIM.COM.

Trust

PHATTY DYER TRUSTS KLIM

When did you start riding?

I started riding as a young kid in the farm fields of Idaho. The best days for me back then happened when the roads drifted shut and school was closed. I could take my Indy 400 all over the country roads jumping the drifts. On a side note, although a snow covered golf course looks like a young snowmobiler's playground, one should consider the amount of trouble they might get into before tracking it all up...

Backcountry, boondocking, extreme riding—what do you have been described in lots of ways. How do you describe how and where you love to ride?

PD: I have never met a mountain I didn't want to be on top of. The fun part is finding the way to the top or to the saddle that might give access to more riding. I admit my way back down from mountain tops usually involves a few powder turns and some sort of free fall off a cliff but that's part of the fun, too. I love to ride in technical canyons. The kind where one slip up can have you stuck for hours. I am always looking for new ways into old terrain and new terrain to explore. I have an adventurous soul.

What is your current sled and mods?

I ride a 2011 Arctic Cat M8 with Boondocker Pump Gas Turbo, Ice Age Rails, Cutler Performance Center Heavy Duty Race Parts, Better Boards, 2 Cool Air Vents, Mod Skis, and a wrap by SledSkin.com!

How many days did you get to ride in 2011? How many do you want to get in 2012?

Well winter 2011 was one for the books. We had a solid eight months of riding, nine if you count the 4th of July ride. I would say I was somewhere in the ball park of 75 days. I have a few friends that doubled that number. For 2012 I hope to get at least 40 days. At least once a week would be ideal.

What's one of your all-time favorite memories from riding?

One of my most favorite memories of snowmobiling has to be getting my entire family out for a ride in Yellowstone National Park. The scenery and the experience is something every snowmobiler needs to do. It may not be my usual extreme outing, but it's something I still smile about. I also cherish the days my father took me out snowmobiling. We always did the "loop" which sometimes meant lots of sticks, digging, and peanut M&M's. He took the opportunities to teach me about work, dedication, attitude, and life. With busy schedules I don't often get the opportunity to ride with him much anymore so those are memories I enjoy.

What is your favorite part about riding?

The freedom to create and do what I believe I am capable of doing... Or get into a lot of trouble trying! I love the scenery and places snowmobiling can take you. I love the camaraderie that snowmobilers have. Snowmobilers are the nicest, friendliest people you will ever meet... probably because they know at some point you will have to help them out of a really bad situation in the back country. Anytime you get good friends out for an adventure on snow... that's my favorite part of riding.

When was the last time you were really, really scared?

Snowmobiling wise? Probably the time I throttled off a ridiculously large cliff near Elko, Nevada. I knew I could do it, but that didn't stop my head from telling me that this was really, really stupid. Once in the air I was able to take a few breaths and enjoy the thrill of flying, but that gut wrenching stomach churning fear was there right to the edge of glory. The other time would be coming off a step down jump and knowing the second I came off the jump I was going to wreck bad. Even worse is when it's your good friends that wreck, I get super scared for them. That's never a good feeling, but it's the price you pay to play.

If you could pick one place to ride in the world, where would you go and who would you take with you?

The riders are easy: Ryan Nelson, Rick Barker, and Dan Gardiner. I trust those guys with my life in the back country every time I ride. The location... that's another story. I have ridden in almost every

state in the rocky mountains (except Arizona) including Canada and they all have so many amazing things to offer, however I would have to say the Palisades range on the Idaho/Wyoming border is my favorite. The snow is perfect, the mountains are big and steep, and the terrain is technical and challenging. It's my kind of party.

How did you get into the video scene?

I had long been a fan of Slednecks and the other videos. Being impressionable young kids, Ryan Nelson and I had purchased our own camera to make our own home made videos (which will never, ever be seen) A friend of a friend invited myself and Ryan to go to Elko, Nevada to ride with Dan Gardiner. He dropped the biggest cliff ever that day and I can still see him falling forever off that cliff (the same cliff I described in my scariest moment). Dan was kind enough to invite us over to his house after the trip to watch the footage. So, on the way home I grabbed all the footage Ryan and I had filmed all year and gave it to Dan. He must have not watched any of it cause he called us and invited us to ride with him some more...

What is your next favorite activity to riding snowmobiles? Does anything compare?

Nothing compares to snowmobiling. I actually love to hike and explore the mountains in the summer that way. If I wasn't allergic to horses I would probably get one because hiking 20 miles a day with a 40lb pack hurts sometimes. I also love photography. Seems I get to always combine that hobby with my other ones.

If you had to list your top five goals for the next five years, what would they be?

- 1- Start a family and raise some kids
- 2- Work to keep snowmobile areas open
- 3- Progress the technologies and film techniques used in the snowmobiling industry. We have a long ways to go to catch up to the ski industry
- 4- Find some way to make money snowmobiling.
- 5- Train some protégés and turn over the extreme stunts to them.

Do you ever ask yourself, "What am I doing? This is nuts!"

Ironically, I only ask myself that about once or twice a year. I know my limits and before I do anything I have to believe I will accomplish it. However, there are still one or two stunts a year that get me asking those questions. Those are the same stunts that our fans love the most. Ok I digress; anytime I follow Dan Gardiner around I ask myself that question. Sometimes it's best to just make your own trail...

What piece of KLIM gear do you abuse most?

The Adrenaline boot. I spend a lot of time in the deep snow. I climb trees, up rocks, wade creeks all to get a good shot. The boots hold up to everything I can throw at them. The other gear I like a lot is the Inferno jacket. It's warm enough and stylish enough to wear around town and light enough to take camping, hiking, or wherever. It's the one wardrobe item that gets packed on every trip I take.

How important is it that you Trust your machine and riding

buddies when you guys go out to go big?

Trust is everything the way I ride. I have to know that if something goes wrong my buddies have my back. I have to know that they have the skills and knowledge to get me back home safely. There are a lot of places I would love to take people, but I don't trust their machines or abilities. It could turn into a disaster of the worst kind.

How important is it to Trust your riding gear when you're pushing the limits?

I want to know that my gear is the lightest, driest, warmest gear available. I want to know that it's going to stand up to tree branches, rain, wind, snow, rocks, mustard, pine cones, and whatever else Mother Nature can throw at me. It's got to be breathable and moveable. I work hard while riding and need gear that allows sweat to move away from my body. If not I will freeze when I stop to get Dan un-stuck. At the same time I want waterproof gear that keeps the heaviest wettest snow from my body. I want gear that I know will be warm if I'm stuck in an all-night blizzard. I want gear that looks good if I decide to wear it around town. I have seen

people get injured where they had to lie in the snow for several hours before help could get there. You want to be able to trust your gear to keep you warm in those circumstances. You will never have a good time snowmobiling if you are cold and wet because you are miserable in those circumstances. It's very important to never be either of those while snowmobiling.

Why do you Trust KLIM?

I trust KLIM gear because it answers all the questions about "what if?" while I am out riding. With KLIM gear I don't have to worry about being cold or wet. GORE-TEX® is the best material around for both breathability and waterproofing. It flat out works and works well. I know KLIM gear is going to allow me the freedom to move my body quickly in a fast reaction situation. It's also very light and it's stylish. I trust Klim because I want the best and they always deliver. Now if they could just find a way to have a never ending supply of snickers in the pockets...

KEWEENAW BIB [3096]

One ride in the Keweenaw Bib and riders immediately understand why it shares a name with the most technically advanced insulated jacket on the snow. Like the Keweenaw Parka, this bib incorporates GORE-TEX® Performance Shell Technology (in Three-layer construction) and KLIM's exclusive Thinsulate™ Zonal Insulating system (complete with anti-microbial zones). On top of those features—and built into the aggressively patterned bib—are heavy duty nylon knee and inner boot panels and KLIM's exclusive Seat Dry Tech construction that keeps your backside warm and dry through the coldest, wettest conditions. The Keweenaw is the first and last word in ultimate comfort, protection and durability in intelligently insulated bibs. Serious riders who value the best insulation technology in the world choose Keweenaw.

KLIMATE BIB [3178]

The Klimate Bib incorporates an impressive list of high-tech features making it a tremendous value for riders searching for a comfortable insulated Bib that won't hold them back. GORE-TEX® Three Layer Performance Shell technology and KLIM's exclusive Thinsulate™ Zonal Insulating system guarantee 100% Waterproof, windproof and breathable/insulated performance. Klimate owners appreciate comfortable anatomical patterning (not too aggressive) and the toughness of ballistic nylon overlays in high-wear zones. For riders that face extreme temperatures but don't require the aggressive patterning and ultra-premium features of the Keweenaw bib, the Klimate is the perfect fit.

TRAIL CATEGORY **SPEED SERIES**

Products inspired directly from aggressive speed freaks and flat-out racers populate the SPEED SERIES of KLIM Technical Riding Gear. Intelligent padding zones, high-profile reflective features and fast, clean style lines push KLIM's SPEED gear past the competition. For riders battling race competition, their instigating buddies or just their own limits, the SPEED SERIES puts hyper-active performance and fast-paced performance out front. Integrated directly with high-quality Thinsulate™ and GORE-TEX® technologies, there is no match for durable, uncompromised performance.

NEW» VECTOR PARKA [4047]

The SPEED SERIES of KLIM Technical Riding Gear is led by the Vector Parka—an all-new jacket with speed in its veins. Constructed with GORE-TEX® Two Layer Performance Shell technology, the Vector parka drops the hammer on the most abusive riding. Ballistic nylon overlays, 200 Gram Thinsulate™ insulation and integrated front impact padding bring the fight back to Mother Nature. Race inspired high-visibility logos and reflective add safety and style while KLIM's exclusive angled ventilation system opens up when you overheat. The Vector owner wants a race-ready jacket with the sleekest look and the Thinsulate™ insulation and GORE-TEX™ performance to make every ride, or race, their best.

ROBBIE MALINOSKI TRUSTS KLIM

SCHEURING SPEED SPORTS

Scheuring Speed Sports' front-running pro class racer, Robbie Malinoski, has an unbeatable reputation on the race courses and in the pits of professional SnoCross racing. His likeable nature, respectful attitude and sheer toughness make him the perfect competitor. Along with his incredibly consistent finishes, Robbie is always knocking on the door for the overall win. KLIM dug in with the pro to get his take on SnoCross racing, the Scheuring team dynamic and what his goals for 2012 are.

You're known for being super consistent throughout your race career, what do you give the most credit to for keeping you up front so often?

RM: I give the most credit to all the hard work from my team and have to give some credit to myself, I guess, for putting in the work to stay up front.

If you had to describe the chaos inside a SnoCross main event to someone who's never lined up to race in their entire life, how would you do it?

RM: I would describe it as extremely tense because of the sheer horsepower and weight of the machine you're on. Not to mention the machines surrounding you. The start line is intense, for sure. Plus, try to imagine stuffing 15 machines at top speed into a space only big enough for five. The first turn is crazy.

What's your favorite part about SnoCross racing?

RM: It's the fans, by far. I love riding snowmobiles and dirt bikes but the best part about racing SnoCross is hearing the fans when you're pushing hard and being able to meet them before and after the race. The race crowd is the best.

What's one thing you could do without during the SnoCross season?

RM: By far the thing I wish would go away is the bad visibility. If you're not out front with a clear view, the first part of the course becomes hairy in a hurry.

What was your favorite Track last year and why?

RM: Winter X; it was the most technical of all the tracks last year. I think

my riding style and my conditioning are better suited for more technical tracks and I really enjoyed racing at Winter X.

What's your favorite Steve Scheuring story? Don't worry, he won't read this until after the season has already started and you're winning races.

RM: Steve was talking to me on the start line before the final in Detroit and I told him he was spitting on me. He thought I told him to spit on me. So, he did!

What are your racing goals for 2012?

RM: My goal is to be in the Top 3 every time. The podium is a great place to be at the end of the day and with consistent finishes throughout the year I know I can be there every round.

What will it take to meet and/or exceed those goals?

RM: No DNF's. If I don't finish, I can't stay very consistent.

If you weren't racing SnoCross all winter, what would you be doing in the cold and white North?

RM: I think I would be involved in racing somehow. It's in my blood. I just love the competition and, like I said before, the fans and people around racing are the best.

What is Robbie Malinoski's favorite thing to do during the off season?

RM: For sure it's to hang out with my wife and kids.

The abuse you put on your body and your sled during a SnoCross race is brutal! How intense is your training program and could you survive the year without being in top shape?

RM: Our training program is great. There is no way I could survive a SnoCross season without working out before and during the season. It's a little bittersweet since the season is pretty short.

What about your sled? Who gets the credit for keeping your fleet of #4 Ski-Doos in perfect tune?

RM: The Entire Scheuring Speed Sports Crew. Everyone's hands are in it! There is never any, "that's not my job," talk around the Scheuring crew. Everybody is in it to win it and it's nice having that crew behind me.

Any idea what your parts bill would look like after last year if you paid for all the stuff you broke?

RM: I don't know and really don't

want to know!

How important is it that you Trust your Scheuring Speed Sports teammates, mechanics and management?

RM: It's Everything. You don't win championships by yourself, it takes a good team to put all the pieces together and Scheuring does that for me.

What is your favorite combination of KLIM riding gear?

RM: Our Freeride race pants, F4 Helmet and custom vented jerseys are the best SnoCross race setup ever. I stay as cool as possible in the heat of battle, I'm free to move on the sled and the team looks really good wherever we go.

Off the track, what piece of KLIM gear do you wear the most?

RM: My KLIM Boots and our Scheuring Team Jackets are my all-winter uniform. I don't go anywhere without them!

Why do you Trust KLIM?

RM: That's easy. I know they give me and the rest of the team the best quality gear—all the gear. I don't have to think about any piece of it—it works flawlessly and allows me to perform my best.

MORE ROBBIE MALINOSKI AT WWW.KLIM.COM

Trust

TYLER HUNTINGTON TRUSTS KLIM

Tyler Huntington is a back-to-back Iron Dog race champion. The power of that statement alone should suffice your interest in the following interview. Just in case you need more, as half of the powerful Olds/Huntington team, Huntington also takes a noble cause with him as he pounds thousands of miles of Alaskan terrain in the harshest weather known to man. As a spokesperson and strong supporter for Alaska's Careline, Suicide Prevention Hotline, his message of perseverance and resulting success surely has inspired some to seek assistance.

Describe what it feels like to race the Iron Dog.

TH: Racing the Iron Dog feels like I'm accomplishing something I've always dreamt of doing. The Iron Dog is really something I've wanted to do my whole life. To be able to race it is an incredible experience.

Describe what it feels like to win the Iron Dog.

TH: Winning the Iron Dog is the accomplishment of a lifetime. It's hard to believe you can do it. But even the most difficult things are possible—this proves it.

Describe what it feels like to win the Iron Dog back-to-back!

TH: Racing, winning and winning back-to-back are different levels of dreams for me. They get deeper and deeper and farther away from what I consider a possibility. Winning back-to-back is beyond amazing.

The Iron Dog Race is arguably one of the most difficult racing feats on the planet. With incredible distance, brutal terrain and grueling weather conditions, how do you find the strength to not only race but to just keep going?

TH: I put absolutely everything I have to get in this race, so if I do not keep going it would be a letdown for me that I do not want to experience. I started so I know I have to finish.

This year, the Iron Dog Race was exceptionally brutal with big storms and massive snow. What was the most challenging day on the trail this year for team #10?

TH: All the days were very challenging with the huge amounts of snow and the crazy weather this year. Day #2 was very challenging because that is where there was the deepest snow. The trail was

disappearing and you had to stay on the main line or else you were stuck. It was tough.

Is it true you have to be prepared for anything and everything while racing across Alaska in the Iron Dog race?

TH: Absolutely. In the Iron Dog you can go from rain to snow to -50 below in a matter of 24 hrs. That is why we wear KLIM riding gear. We have to be ready for anything.

What's a worst-case scenario for your team? —

TH: Crashing is the worst thing that can happen on the trail. Breaking the machine is one thing but it's very possible that somebody could get hurt. And that would be the worst, by far.

What's the biggest obstacle out on the Iron Dog race course? The weather, mechanical failures, fatigue, crashing, etc.?

TH: There are many big obstacles out there but the biggest obstacle we challenge out there is the weather. It makes every other obstacle much more serious.

Your quote from the Careline Alaska brochure concerning suicide prevention is very powerful. How have you used that mentality to stay positive in life and keep pushing yourself forward? [Tyler's quote; "When you're not moving, you need to get moving, because life is bigger than the right now, right where you're at. When you're at a low point in life, hang on and keep moving forward."]

TH: When things are not going the right way for some people they tend to just give up and hang out, it seems like they do not do anything to make things better for themselves or the situation they are in. So when something is not going my way I don't just give up I keep moving forward until it does go my way.

Suicide awareness is a very important cause for you, how can we make a difference and let people know that suicide is not the answer to life's problems? —

TH: I believe that when somebody does something wrong, you shouldn't get mad and immediately punish them, just help them find a resolution to fix the problem and move on with life, don't get stuck in one spot for too long or you will lose the race!

It seems like family and community are really important to you. Can you explain the difference having that makes during a race as grueling and long as the Iron Dog?

TH: Family is definitely an inspiration to finish the race because they put just as much into this race as I do. My uncle Terry and my mom have been at the checkpoint in Galena to meet me every time. Whether it is 3 pm or 3 am they are there to support me and our team. And my wife and kids don't see me much at all most of the winter because I am preparing for this race. If I don't do well it will be a letdown for them and all of my supporters in the villages.

When did you first start riding snow machines?

TH: I've been riding them as long as I can remember; I probably started when I was six or seven.

When was your first race?

TH: When I was 16 years old at our local spring carnival in Galena, AK.

Is there anywhere else in the world you would like to ride/race?

TH: Nope, I love riding and racing in Alaska.

Have you ever had to explain what the Iron Dog race is to someone not familiar with snow machines or snow machine racing? How do you put the race into perspective?

TH: I tell them that it is NASCAR of Alaska; the longest, roughest and toughest snowmachine race in the world.

The Iron Dog is one of those races where you should probably never say quit. But did the thought of not finishing or even quitting ever cross your mind this year?

TH: I got in a really bad wreck the last day of the race and it wasn't looking too good for us for a while, so for a second I didn't think we were going to be able to keep going.

Now that you're a back-to-back Iron Dog champion, what's next? Three-peat!

TH: Yes, I am planning on racing again this year.

The Iron Dog is a team race. How important is it to Trust your partner out there?

TH: To trust your partner is the key to success in this race.

Iron Dog snow machines are modified, what's the rundown on what you guys do to your machines to get them ready for 2,000 miles of torture?

TH: We have to add auxiliary tanks to go longer distances, add H.I.D headlights, add bags for more storage, and basically the rest is stock.

How important is it to Trust your machine?

TH: It is very important to trust your machine so you can go as fast as you can and know you will not break anything.

What is your favorite combination of KLIM gear to wear while racing and why?

TH: The Valdez parka and Togwotee bibs because they are proven to withstand the harshest conditions Mother Nature can throw at you.

How important is it to Trust KLIM gear during the race?

TH: You have to trust your equipment like your life depends on it. Because it does.

NEW ALPINE BIB

KLIM innovation continues in the Alpine Bib. Starting with an all-new high-waist bib design built in tune with real-world female body shapes, the Alpine Bib refuses to compromise and looks to satisfy the most demanding riders' needs. Non-insulated to take advantage of supreme breathability and layering system versatility, the GORE-TEX® Three Layer Performance Shell construction keeps aggressive riders on the snow longer. This is the first full-featured premium shell bib built for women that incorporates all the proven men's product technology (wrap around full-length side zips, KLIM Seat Dry Tech construction, high wear fabrics in key zones, intelligent gaiter design and more). Unique embossed GORE-TEX® fabric adds just enough female styling to finish off the Alpine—the next step in women's riding gear.

Women's
ALLURE GLOVE [4062]

Adding to the Klim Women's Line of technical riding gear, the Allure Glove carries the GUARANTEED TO KEEP YOU DRY® promise while maintaining high levels of breathability. This women-specific glove includes GORE-TEX® fabric with GORE™ 2 in 1 Technology. The glove has two completely separate chambers for the hand. In "warm" position the hand is at the center of the glove and at the center of 200 and 100 gram Thinsulate™ insulation. In "grip" position, the majority of the insulation is on the top of the hand leaving a small layer between the hand and the grips. The grip position allows the rider to take advantage of hand warmers while maximizing protection from wind chill on the top of the hand.

- GUARANTEED TO KEEP YOU DRY®
- SPECIFICALLY DESIGNED FOR WOMEN

EARNING YOUR TRUST

The Klim product being worn today is a direct result of feedback from our customers. Klim gear is continually improving as a result of consumer feedback and ideas.

LISTEN

Ultimately, Klim product is worn by our customers, who ride millions of combined miles. This is the proving ground, where the Klim reputation is built.

PROVE

Klim gear is tested in real-world environments by world-class riders. Data gathered during this phase is critical to building the best product available.

TESTING

INSPIRATION

We know riders demand more performance; we need to build products they can trust. We know our designs must innovate and improve the experience of riding.

RESEARCH

Finding the best technologies from the most innovative technology partners is key to providing cutting edge products that exceed expectations.

3M Scotchlite
Reflective Material

CREATION

Trust

Every detail of the production of Klim gear is managed in extreme detail. From preliminary designs to final production, it's a very deliberate process.

KLIM LAYERING TECH

Achieving maximum heat balance, breathability and comfort is paramount when trying to enjoy your ride. By choosing your clothing options intelligently, and adjusting those options to your activity level and the weather conditions, you'll be happier every time you ride. Plus, effective layering keeps you versatile. By incorporating KLIM's expansive base and mid-layers into your gear bag, you'll be ready for anything that comes your way. You'll be more mobile, less likely to overheat, less likely to over-cool and more ready for unfortunate emergency situations.

"Effective layering is the best way to control your Micro-Climate—your body's comfort zone of temperature and humidity."

INSULATED OUTER LAYER

KLIM's Insulated Outer Layers are engineered for the highest-speeds and harshest conditions on the snow. Their designs accommodate the aggressive cold-weather rider by incorporating built-in insulation to enhance the Base and Mid Layer's thermal retention. Thinsulate™ insulation is used exclusively in all of KLIM's Insulated Outer Layers to deliver maximum insulation value and minimal bulk. KLIM's use of Thinsulate™ has proven that low-bulk insulation is a superior material to the generic poly fill of years past. Riders who brave the coldest weather, those who have trouble staying warm or someone looking to add an insulated piece to their collection rely on KLIM's Insulated Outer Layer technology.

NON-INSULATED OUTER LAYER

KLIM's Non-Insulated Outer Layers are the ultimate in durably waterproof, windproof and breathable gear. Non-Insulated garments are used by highly active riders whose bodies are producing maximum heat or those who simply prefer to wear a heavier mid layer to control heat loss. KLIM exclusively uses GORE-TEX® to deliver uncompromised wind and water proofing. All this while being supremely breathable. For the aggressively active rider, for those looking for the absolute minimal bulk and for those who overheat quickly there is no match to KLIM's GORE-TEX® Non-Insulated Outer Layer performance.

HEAVY-MID

KLIM's Heavy Mid Layer products can be stand-alone outer layers when conditions don't require windproofness or waterproofness. They also work extremely well as an insulating compliment to a non-insulated Outer Layer. Stylish, warm, maximum comfort and always there just in case you need it.

MID

KLIM engineers mid layers to control heat loss and gain and to enhance breathability. Like the base layer, the mid layer is a synthetic material (usually polyester fleece) which will not hold moisture. This is also the adjustment layer: easily being removed or added as you heat-up and cool-down. Minimum bulk, maximum heat retention, comfortable fit, ready for anything.

BASE

This is the next-to-skin layer. The KLIM base layer is a Micro-Climate's home base. All KLIM base layers feature synthetic moisture-wicking and comfortable materials with no bulk. From head-to-toe, KLIM's Base Layer products ensure that sweat goes away, your skin stays dry and your micro-climate stays happy. Mission accomplished.

MID LAYERS

In the ever changing climate of the world's most extreme sport, managing your body's temperature is ultra-important to comfort and survival. Only KLIM's intelligent layering system is specifically designed to manage and maintain your body's ideal temperature—ensuring maximum comfort on all your rides. KLIM's mid-layers are designed to add warmth without bulk, enhance moisture transmission away from your body and pull double-duty as the most comfortable casual and after-ride clothing in the industry.

REVOLT JERSEY [3375]

Essential to every good ride is having the right equipment. The Revolt Jersey fits that bill from its ability to wick moisture created while riding hard keeping the rider dry and comfortable to its rider specific patterning that allows the rider to move without any restriction or binding. The Revolt Jersey also features a silicone back patch that keeps the jersey tucked in the pants, non-interfering seam construction for all-day comfort, and underarm mesh panels that allow unwanted heat to escape. Take the Revolt Jersey with you on your next ride and you will have the right equipment with you.

- BREATHABLE AND MOISTURE-WICKING POLYESTER FABRICS
- COMFORT PADDED SHOULDERS AND ELBOWS
- CUT-AWAY SLEEVES
- NO-FADE SUBLIMATED GRAPHICS
- SILICONE PRINT ON BACK TO KEEP JERSEY TUCKED IN
- NON-RESTRICTIVE CUFFS
- SLIM-MESH UNDER ARM VENTILATION

BOOTS

KLIM boots feature the most advanced technologies available. Guaranteed waterproofness, intelligent insulation systems and the durability features you demand have been designed by KLIM's in-house product research and development team and tested by our group of dedicated Test Pilots. Find out what perfection feels like by wearing a premium KLIM boot in 2012.

RADIUM GTX® BOOT

The original two-piece structured snowmobiling boot. With a durable insulated foam inner liner and highly reinforced exterior frame, the ultra-stable Radium GTX Boot provides maximum support for big jump landings and high-impact stresses. With full GORE-TEX® waterproof and breathable footwear technology feet remain comfortably dry even in the heat of race-day battle. Radium boot users demand ultimate support, substantial warmth and the convenience of a two-part boot for drying between rides.

FUSION GLOVE

Klim's innovative Fusion Glove combines maximum grip with adjustable insulation levels to keep your grip dry and in touch no matter what conditions you face. GORE-TEX™ waterproof and breathable technology and GORE™ 2-in-1 technology allow you to maintain completely waterproof performance while dialing in your grip and warmth. Simply slip your hand in the "warm" chamber for a comfortable 200/100-Gram Thinsulate™ top/bottom setup or go for the "grip" chamber and stack all 300 grams on top of your hand—dialing in the closest grip possible.

- GUARANTEED TO KEEP YOU DRY™

BAGS

KLIM Gear Bags, Back Packs and Tool Bags are designed to deliver superb performance for every rider. From the cavernous payload capacity of the Team Gear Bag to the intelligent accessories of the Nac Pak, every piece of KLIM's cargo-carrying crew is engineered for you, the rider. Organize your next ride and have the tools you need quickly with a new bag from KLIM.

BOBBY MENNE
USCC RACER

KODIAK BAG (3217)

The Kodiak Bag from KLIM is the workhorse of the 2012 bag lineup. With heavy duty wheels and extendable handle, it will roll up to any truck, trailer or hotel room easily—even when over-stuffed! Cargo capacity features include two separate boot compartments, stash pockets in main compartment lid, oversized main center bay with mega zipper and handy external accessory pockets. Also includes a large, durable folding changing mat.

- RETRACTABLE HANDLE
- DIMENSIONS MEET AIRPORT LUGGAGE REQUIREMENTS
- CONSTRUCTED OF BALLISTIC MATERIALS FOR LONGEVITY
- SEPARATE BOOT COMPARTMENTS
- DETACHABLE CHANGING MAT
- PLASTIC RAILS PROTECT BOTTOM OF BAG
- WHEELED FOR EASY TOWING

TEAM GEAR BAG (3313)

KLIM's Team Gear Bag takes payload to a whole new level. Its super capacity compartment system features four zones of storage: a deep boot compartment, huge center main gear compartment, soft-lined helmet pocket and quick-access external accessory pockets. Even when fully loaded (if you can find enough gear!), the Team Gear Bag remains easy to lift and carry thanks to an ingenious auto-compression padded shoulder strap system and sleek flush-grab side and end handles. Fill it, if you dare.

- SUPER LARGE CAPACITY
- 4 ZIPPED COMPARTMENTS
- BOOT COMPARTMENT
- HELMET COMPARTMENT WITH REMOVABLE HELMET SLEEVE

NEW BOONDOCKERS 8 [3005]

Why? It's the question posed to those of us who enjoy a little more adventure than the average person. Why do we leave the harsh conditions of the winter backcountry to risk life, limb, and machine every season? The simple answer of course, but the cue that only a dedicated rider would understand is: "because it's there," the famous response of (legendary punter) George Mallery. The longer answer is the next deep powder days, endless backcountry, adrenaline-pumping jumps and 100 drops, and the incredible landscapes that serve as a backdrop for it all. Record snowfall throughout the Rocky Mountains during the 2010-2011 winter resulted in some of the deepest powder days in memory and an epic year extending from October to July. Follow the tracks of boondockers on an adventure through the western United States and Canada as they push the limits of technical snowmobiling and explore epic new locations. Filmed in HD! Intended for audiences of all ages. Featuring: Geoff "Phatty" Uye, Kris Kallenbach, Pick Binko, Matt Emre, Dan Gardner, Ryan Nelson, Erik Wagon, Dan Davittell, Steve Flarcy, Justin Covert, Adam Case, and Many More.

USD \$24⁹⁹

NEW THUNDERSTRUCK 10 [3004]

They made films into their careers and Team Thunderstruck is still turning the snowmobiling industry upside down! From massive jumps to insane powder to crazy race events, Thunderstruck 10 truly adds a glimpse of extreme to the riding world! While other film companies were allowing in the clouds and bad weather, Team Thunderstruck searched out the sunshine and the deepest snow and took full advantage of it! Riding from November until June and every sunny day in between, it's back and take a breath as you watch this 10th installment from award-winning pros like Jim Pletzer, Randy Swenson, Travis Wex, Julia Eggers and more shock and surprise you with all new awe-inspiring antics! The time has come... For Thunderstruck 10!

USD \$29⁹⁹

WARRANTY

We warrant *every product we make to be free of manufacturer defects for the **lifetime of the product. Additionally, all KLIM GORE-TEX® products are GUARANTEED TO KEEP YOU DRY® for the **lifetime of the product. Should you have a warranty issue, call us for a case number. We will repair it if possible or replace all valid warranty items. Please have all warranty item claims clean for evaluation or it will be sent back to you as is without an inspection being made. This warranty does not cover damage caused by accident, improper care, negligence, normal wear and tear, modifications, alterations, or use for a purpose other than which it was designed. If this product fails due to a manufacturing or material defect, we will repair the product without charge, or replace it at our discretion. This warranty is not transferable. Product must be registered with KLIM to receive warranty coverage.

* KLIM BOOTS are warranted against defects in materials and workmanship for one [1] year from the date of purchase. Aggressive running boards will accelerate the wear and tear on the soles of the boots. This is considered normal wear and tear. General warranty terms apply.

* The KLIM F4 HELMET is warranted against defects in materials and workmanship for five [5] years from the date of purchase. General warranty terms apply.

** The lifetime of a product unfortunately does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, cuts, punctures and burns will void the lifetime warranty of the product even if the warranty issue is not related to these damages.

CARE INSTRUCTIONS

GORE-TEX® OUTERWEAR

WASH

Machine-wash warm (104° F/40° C). Powder or liquid detergent. No fabric softener. Follow manufacturer's instructions.

DRY CLEAN

If professionally dry-cleaned, request clear distilled solvent rinse and spray repellent. Follow manufacturer's instructions.

IRON

Steam-iron warm, placing a towel or cloth between the garment and the iron. No need to iron the garment until it is completely dry.

BLEACH

No chlorine bleach. It may damage your garment.

DRY

Tumble-dry warm. The heat from the dryer will help to reactivate the durable water repellent (DWR) treatment on your garment's outer fabric.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect the garment's breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® GLOVES

WASH

Follow the manufacturer's instructions. Machine or hand wash in warm water. Gently squeeze glove from fingertips to wrist to remove excess water. Do not twist.

DRY CLEAN

Not applicable.

IRON

Do not iron.

BLEACH

No chlorine bleach. It may damage your glove.

DRY

Drip-dry with the fingers facing upwards.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® FOOTWEAR

WASH

Clean the exterior with a cloth or brush and lukewarm water. The manufacturer may recommend leather treatment or preservation. Shake out sand, gravel, and dirt from inside the footwear. Remove and shake out the foot bed if applicable.

DRY CLEAN

Not applicable.

IRON

Not applicable.

BLEACH

No chlorine bleach. It may damage your footwear.

DRY

Dry naturally at moderate temperatures. Avoid direct heat. Convection-style boot driers work well.

WATER REPELLENT TREATMENT

We do not recommend the use of waterproofing waxes or greases as they can affect the footwear's breathability. Apply only treatments, polishes, conditioners, and dressings recommended by the manufacturer.

STAIN REMOVAL

Follow the footwear manufacturer's instructions.

HEAD CIRC. (CM)	52 - 53	54 - 55	56 - 57	58 - 59	60 - 61	62 - 63	64 - 65

BOOT - MEASUREMENTS	5 - 14 based on mens sizing										
	MEN'S	5	6	7	8	9	10	11	12	13	14
WOMEN'S	7	8	9	10	11	12	13	14	15	16	

Note: For all measuring use a flexible measuring tape.

How to Measure:
To select glove size, measure around your dominant palm at the widest point.

5" - 7"	XS
7" - 8"	S
8" - 9"	M
9" - 10"	L
10" - 11"	XL
11" - 12"	2XL
12" - 13"	3XL

Head: Measure circumference of head just above top of ears, and 1" above eyebrows.

Chest: Measure under arms around the fullest part of the chest. Be sure to keep tape level across back and comfortably loose.

Waist: Measure around natural waist with a loose tape.

Inseam: Without shoes, measure on inside of leg, from crotch to the floor.

Hip / Seat: Place the measuring tape around the body at the fullest part of the lower hip, feet together.

Sleeve: With your arm fully extended, measure from the center back of neck at spine to the wrist bone.
