KLIM
3 TECHNICAL REALITY

WELCOME TO TECHNICAL REALITY

I am often asked where KLIM started and how it became an industry leader in premium apparel. The real, drilled down, and no-nonsense answer is that KLIM started with a passionate belief that our products can improve your experiences. That is the core of KLIM and why we build the world's best gear.

Thanks to a group of incredibly talented and dedicated people, we've been fanatical about building products that stay in tune with that passion since the beginning.

The KLIM story technically started in my college apartment while attending the University of Utah. Being an outdoor addict, I knew I wanted to work with and improve the products of outdoor recreation. So, I started developing custom gear with features outdoor professionals asked for and sold it across campus. It was the launch of a high-function, high-quality reputation.

Soon we were developing customized gear for the employees of resorts in the Wasatch Range, Search and Rescue departments, and other backcountry pros. The foundation of KLIM was set and this time in KLIM's infancy is where we learned so much. The experience of developing gear for a specific use, sewing our own garments, and sourcing materials for specific functionality was priceless. We also learned a lot about listening, collecting feedback, testing and implementing changes customers need to constantly improve designs.

KLIM officially began as a snowmobile gear company in 1999. After a couple seasons of snowmobiling in our custom outdoor apparel, it became apparent that the snowmobile industry was desperately in need of more technical and more functional riding gear. We, and the people we rode with, wanted to be more comfortable, more dry, more mobile, and have higher functioning gear all-around. We took these wants and needs and put them into the first KLIM products—products built specifically for the snowmobiler by snowmobilers. We have been doing the same ever since.

This season marks KLIM's 13th year developing snowmobile gear. What has happened through that time is quite amazing. We've gone from a local shop in downtown Rigby, Idaho servicing the aggressive mountain riders of the Rocky Mountain West, to a global supplier of the most advanced apparel available for all riding types and conditions. The catalog you hold in your hands is a perfect example of that growth. We have more products than ever and the technology inside them keeps pushing us forward.

The future of KLIM is exciting for sure. I'm confident our growth is the result of a few, specific ideals that have never changed. We strictly adhere to the original belief that we can improve your next ride with our gear. We control every aspect of our apparel production—from designs to testing to warranty and repair—every contact point with the customer is done by KLIM employees. We're constantly searching for the next advancement in apparel technology.

At KLIM, we don't believe in throwing the term, "Technical," around loosely. We believe in the advantages and quality of our products to make your best ride a reality. That's Technical Reality to us. That's why you can trust KLIM.

Justin Summers,
President and Founder

REALITY: YOUR PHYSIOLOGY

Humans, like you, like to be comfortable. It's in our nature to seek out moderate temperatures, mild humidity levels, and to keep our skin dry. It's a survival instinct as well as a personal preference and our bodies constantly regulate themselves to maintain comfort. KLIM gear is designed, tested and proven to work with our bodies to keep comfort under control wherever and however we ride.

MICRO CLIMATE

The most important factor contributing to your comfort level is your Micro-Climate—an invisible, very thin layer of protective air which surrounds you wherever you go. Its management is vital to your comfort and survival in the world's most extreme conditions and when you're exerting maximum energy. Humans are most comfortable with a Micro-Climate temperature around 90-degrees F with a relative humidity of about 30 percent. In general, those conditions will keep you comfortable, but what's good for your hands isn't always good for your core, shoulders or feet. For example - in cold weather, our arms and legs can be up to 45-degrees colder than the rest of our body—without any discomfort.

To efficiently control your Micro Climate, you need to understand what your body wants and needs - then dress accordingly.

HEAD

In the coldest conditions you can lose more heat through your unprotected head than your entire body can produce. This effect is multiplied if your head is wet—essentially radiating body heat straight up and out.

TORSO

Your torso is like a continent. It can be cold and wet in one spot and warm and dry in another. For instance: your shoulder and lower back

regions are particularly sensitive to excessive cooling and require extra protection from the cold. KLIM takes these zones into account when building our premium riding gear.

HANDS

Your hands perspire (sweat) almost constantly and are left out on their own in extreme conditions. If that's not bad enough, your body reduces blood flow to them as soon as its core temperature drops (a survival mechanism to ensure blood is warmed and flowing to vital organs). It's no wonder hands are so prone to freezing! If you can keep your hands comfortable, the rest of your body generally follows suit. Keeping them comfortable and dry is critical so they can work for you.

LEGS

Your legs make up about 30% of your body. That's a massive surface area to focus on in your effort to gain maximum comfort.

FEET

Along with your hands, your feet are on the top of the list for the most neglected, abused and sweaty body parts. Your feet sweat roughly one-quarter cup of moisture a day per foot while at rest and up to a full cup during activity or when overheated. If your socks and footwear are not engineered for this moisture management, the moisture has nowhere to go—cold, wet feet are enemy number one.

So, that's what's going on inside and around your body even before you encounter any external elements or influences. Your body is constantly adjusting its temperature by sweating, shivering and manipulating blood flow even as you flip through this catalog in the comfort of your home. Let's throw your body into the unpredictable and oftentimes ever-changing world of snowmobiling and see what else your gear is tasked with controlling

REALITY: THE ELEMENTS

The opposite reality of the body's comfort control system snowmobilers are forced to deal with to remain comfortable while riding are exterior elements, clothing and activity levels. Easily as complicated as and wildly more unpredictable than your body trying to stay alive, these elements are at constant war with your comfort. We call these Micro-Climate Influencers.

THE MICRO CLIMATE INFLUENCERS

ENVIRONMENT

The environment is out of your control. What you can master is its effect on your body by optimizing and protecting your Micro-Climate through intelligent clothing. This means specifically dressing for the activity and conditions you assume you'll be encountering and being prepared for the unexpected. Riders are often faced with life-threatening conditions. KLIM clothing systems are designed to keep you comfortable in rapidly changing conditions.

EQUIPMENT

KLIM Helmets, Outerwear, Gloves, and Boots are not simple fashion statements; they're functional equipment that is the front line of defense in your active outdoor mission. Staying out longer and in maximum comfort is the mission. After all, looking good and feeling great is better than just looking good. Controlling all aspects of Micro-Climate variables is key. KLIM gear is engineered to do just that. If your outerwear isn't performing properly, your Micro-Climate will be compromised.

BODY TYPE

Body types are as different as personalities. And it's wrong to assume one piece of gear is right for everyone. So learn a little about yourself before buying your gear. Individuals with greater muscle mass are generally warmer than those with less bulk. People who are in better shape tend to control their temperatures more consistently. Males don't generally get cold as quickly as females. Even identical twins can feel the influence of Micro-Climate changes differently. This uniqueness in humans is important to think about when purchasing riding gear. Find out what affects you most and dress accordingly.

ACTIVITY LEVEL

Your body produces heat as it works. If you're stationary, you'll feel colder than if you're moving. Move too much and your body will heat up to the point that its cooling mechanism will kick in and you'll start to sweat. Sweat almost always leads to discomfort because water is a very good conductor of heat (that's why your body produces it to cool off). If you're wet, you'll have a hard time finding the comfort balance. KLIM's clothing system manages and enhances your comfort by effectively blocking and transferring moisture away from your Micro-Climate. Pick your mid-layers and outerwear with your activity level in mind!

PERCEPTION AND SENSITIVITY TO ELEMENTS

People's individual perception of comfort in identical conditions and in identical garments can be as much as 10 degrees apart. So, while your riding buddy puts on a balaclava at 15 degrees Fahrenheit, you might feel OK without one until 5 degrees. Knowing yourself is an important part of maintaining maximum comfort levels.

Klim
TECHNICAL REALITY

TECHNICAL: KLIM INTELLIGENT LAYERING SYSTEM

If your Micro-Climate is comfortable, you can and will survive in emergency situations, you will have more energy to ride longer and you'll be happier every time you ride. It's that simple.

Once you get too hot, too cold, too wet or too dehydrated the chances of survival and enjoyment drop dramatically.

But, how can you control all these factors? By dressing intelligently. There is no more efficient, comfortable, or higher-performing clothing system than KLIM's Intelligent Layering System.

Think of your body as a machine. It burns fuel and when it works hard it needs a cooling system to kick in. If you push it too far when too hot or too cold, it will break and die. Versatility is key. Adaptability is paramount. Layering is the way to go.

A layering system can be broken down into three segments and functions: Base Layers—Moisture Management, Mid-Layers—Heat Balance and Outerwear—Exterior Element Protection.

BASE LAYERS=MOISTURE MANAGEMENT: Moisture Management is defined as getting sweat off your body and keeping your skin as dry as possible. This is the primary job of KLIM's Base Layers. Remember: every piece of your clothing system must enhance moisture management for your clothing system to work.

KLIM's Base Layers are constructed of synthetic materials with high-wicking properties that get sweat off your body as soon as possible. They do not restrict movement and are ultra-comfortable. They also enhance the escape process for your perspiration by constantly moving it outward and drying quickly to make room for the next influx of moisture.

You can and will jeopardize the entire Moisture Management of your clothing system if you wear a natural fiber like cotton in any layer. Cotton soaks up a lot of water, takes a long time to dry, stays heavy, and if your ride goes from fun to survival, you don't want to be around cotton at all. In cold-weather, cotton can and has killed.

BASE LAYERS PERFORMANCE REVIEW:

- Synthetic moisture-wicking fabrics that pull sweat off your skin and move it away from your body
- Quick-drying, lightweight, and zero restriction
- Maximum comfort for all-day use
- Pick the right weight (thickness) of base layers for your activity level and riding temperatures

MID-LAYERS=HEAT BALANCE:

Mid-layers are the area of KLIM's Intelligent Layering System where you control how much heat you keep or lose out of your clothing. Naturally, they're in the middle (Mid), on top of your base layer, and under your outerwear. This is the layer you can adjust as you ride and is also the layer that should be brought along for emergency extra-warmth needs. The Mid-Layer is the true flexibility of your clothing system.

Mid-Layers are constructed from high-tech synthetic fibers (never cotton). Historically, Mid-Layers have been constructed out of polyester fleece—which works very well—but today, exciting new insulations are coming out that add even more insulation options. The Mid-Layer needs to be breathable, lightweight, and generally packable (since you'll be stashing it at times).

MID-LAYERS PERFORMANCE REVIEW:

- Synthetic, efficiently insulating fabrics that transfer moisture and dry quickly
- Lightweight and packable for storage when not in use
- Versatile as casual garments and to-and-from rides use
- Have different weights of mid-layers available for different rides/conditions/activity levels

OUTERWEAR—EXTERIOR ELEMENT PROTECTION:

Have you ever stopped to think about the complexity of a snowmobiling jacket and bib or pant? These are the most intensely engineered pieces of riding gear in all of sport. They incorporate breathable waterproofness, abrasion resistance, cargo capacity, reflective properties, ventilation systems, and they stop snow infiltration through the openings. Oh, you want them lightweight and comfortable, too? No problem. There is some amazing stuff going on. Let's break down some of the big ones.

WEATHERPROOFNESS

Claims of waterproofness come and go. But for snowmobilers looking for the best, only legitimate, guaranteed waterproof technologies make the cut. KLIM has trusted GORE-TEX® materials to deliver the perfect combination of durable waterproofness, breathability, windproofness, and comfort. KLIM has and continues to test every available weatherproofing technology and we choose GORE-TEX® materials because it outperforms the rest in our strict testing standards.

VENTILATION

High-tech materials like GORE-TEX® are waterproof, breathable, and windproof by design. Even with high breathability, you can overload the moisture transfer properties of even the best performing fabrics when you're working hard. This is where intelligent ventilation comes in.

Eliminating heated air from your body quickly will keep you drier and riding more comfortably. That's why ventilation is so important. Use it to control rapid heat gain. You don't want to compromise the non-air-permeable properties of a garment in search for more cooling. Do it with ventilation. Ventilation and breathability are two very different things. One lets air in under your control, the other assumes air can pass through a fabric at will. In all situations, it's always better to be under control of your ventilation and have windproof performance there when you need it.

ABRASION PROTECTION

The exterior shell of your riding gear should be engineered to take punishment without getting in the way of mobility or comfort. A lot of research goes into KLIM designs to pick the perfect exterior shell material. Companies like GORE-TEX® develop their own tough-condition products, but often the world of snowmobiling requires the KLIM team to engineer new fabrics. The main goal is to make a piece of gear you forget about while riding, appreciate while suffering, and are surprised by when you pick yourself up.

ROBERTO CANNICAPMAN

TECHNICAL: WHY WE USE GORE-TEX®

The KLIM GORE-TEX® story starts and ends with KLIM's never-ending search for the best-performing materials and technologies available. If it's not the best, KLIM won't use it and throughout our history we've tested, developed, used and abused every possible weatherproof technology in our snowmobile gear.

GORE-TEX® materials have proven their worth over and over. KLIM can build riding gear out of any waterproof/breathable technology on the market but chooses GORE-TEX® technology because it is the ultimate choice in guaranteed performance. GORE-TEX® materials stand up to KLIM standards. We know because we've rode in the rest.

DURABLE WATERPROOFNESS:

Only GORE-TEX® technology comes with a GUARANTEED TO KEEP YOU DRY® promise. Did you know water-resistance can be done by nothing more than a spray on treatment? It's true. Those magic little water beads on top of fabric can be applied (and sometimes are) out of a spray can. To be truly durable and truly waterproof, KLIM utilizes premium GORE-TEX® technology.

HERE'S HOW IT WORKS.

GORE-TEX® is a unique partner to KLIM in that we work closely to test every new design of gear before it's ever sold to ensure it meets the highest standards of durable waterproofness, breathability, windproofness and toughness.

The GORE labs in Maryland feature the world's most advanced testing equipment designed to produce the absolute best. Riders can rest assured that the KLIM GORE-TEX® product on the shelf is proven and guaranteed.

A typical GORE-TEX® membrane contains over 9 BILLION microscopic pores per square inch. These pores are 20,000 times smaller than a water droplet and 700 times larger than a water vapor molecule. The result: GORE-TEX® is durably waterproof from the outside, while being highly breathable from the inside. If it seems like science fiction, it's not. It's science fact.

Claims of superior breathability over KLIM's GORE-TEX® -equipped gear are bogus. The Real Science shows that no other waterproof and breathable membrane is "more breathable" than KLIM's products featuring GORE-TEX® technology.

In most outdoor industries, the products at the top of the heap utilize the advantages of a GORE-TEX® material partnership to deliver premium weatherproof performance to customers who refuse to compromise. KLIM takes advantage of our partnership with GORE-TEX® technology to the fullest extent and it shows in all of our snowmobile gear.

After all, KLIM doesn't make entry-level gear for temporary use. We make the best snowmobile gear in the world you can depend on.

Klim
TECHNICAL REALITY

TECHNICAL: 3M™ THINSULATE™ INSULATION

For climates and riding styles that demand the most cold-resistant clothing systems available, KLIM engineers a complete lineup of insulated outerwear incorporating the latest in 3M™ Thinsulate™ Insulation technology. The original warmth-without-bulk insulation, 3M™ Thinsulate™ Insulation, is the brand trusted for warmth.

3M™ THINSULATE™ INSULATION ENHANCES YOUR ABILITY TO ENJOY THE OUTDOORS, PROVIDING:

- Breathable, lightweight warmth and durability
- Up to nearly twice the warmth of other synthetics and one-and-a-half times the warmth of 550 fill down when equal thicknesses are measured
- Highly breathable, "keep dry comfort" under damp, sweaty, or rainy conditions
- The freedom of movement to enjoy your time outdoors with less restriction
- Dependable thermal performance through repeated washings

WHY IS 3M™ THINSULATE™ INSULATION SO EFFICIENT?

It's the fibers. The unique fiber constructions of 3M™ Thinsulate™ Insulation are up to 10x smaller than the fibers of other synthetic insulations,* which helps make them more effective at trapping insulating air. The more fibers it has per square inch, the better an insulation can perform in containing the body's radiant heat.

*With the exception of 3M™ Thinsulate™ Platinum Insulation - FR

EXCEPTIONAL PERFORMANCE EVEN IN WET CONDITIONS:

The fibers in most 3M™ Thinsulate™ Insulation products absorb less than 1% by weight of water, and are designed to keep you warm even in damp conditions. No other synthetic insulation performs better to help prevent rain penetration/water absorption under real-world conditions.

Superior insulating efficiency does not diminish breathability: 3M™ Thinsulate™ Insulation allows moisture the body creates to exit.

TECHNICAL REALITY: QUALITY IS A PROCESS

The journey to the perfect piece of riding gear is never complete. At KLIM the lifecycles of our products are in constant rotation as we inject the inspirations and experiences of our team and our customers into the next batch of apparel.

This reincarnation of product needs, features and benefits is what we call our Quality is a Process theory. Simply put, Quality is a Process speaks to all the pieces and people that make our gear work so well. It also expresses our incapability to remain still as the fire inside us looks for the next big idea.

KLIM started by listening, became inspired, conducted research, carefully created tangible samples, ruthlessly tested and successfully proved that putting in the effort to create premium gear made a difference in people's rides. The KLIM machine has been running strong ever since.

LISTENING

The KLIM product being worn today is as much a direct result of feedback from our customers as it is from our design and development teams. KLIM gear is continually improving as a result.

INSPIRATION

We believe riders demand more performance. We believe we build products they trust. We believe our designs must innovate and improve the riding experience.

RESEARCHING

Finding the best technology from the most innovative partner provides cutting edge products that exceed expectations.

CREATING

Every detail of KLIM gear production is managed in extreme detail. From preliminary designs to final production, our quality control is deliberate and focused.

TESTING

KLIM gear is tested in real-world environments by world-class riders. Data gathered during this phase is critical to final product success.

PROVING

Ultimately, KLIM product is worn by our customers. Millions of combined miles form the ultimate proving ground where KLIM's reputation is built.

Then we start listening again...

RADIUS

KLIM has developed the most advanced snowmobile goggle in the world. The Radius Goggle is completely revolutionary and is the result of tirelessly sourcing technical solutions to pain points riders can encounter every day they ride.

KLIM defined the superiority of the Radius Goggle by setting uncompromised goals in the following performance categories at the project's inception four years ago: fog proofing, field of vision, lens durability, ventilation and comfort.

The result is a Radius Goggle that exceeds all expectations and is truly the new standard in winter optical performance.

Here's what makes the Radius Goggle the best:

POLYCARB² PREMIUM LENS:

KLIM developed snowmobiling's most advanced lens system for the Radius Goggle. Polycarb² Premium Lens construction provides maximum durability to both exterior and interior lens surfaces, high-tech coatings and industry leading ventilation.

With solid Polycarbonate (PC) inner and outer lenses, KLIM's Polycarb² Premium Lens system is inherently more durable and scratch resistant than the competition. KLIM can utilize the durable benefits of PC throughout the Radius thanks to the highly advanced properties of the exclusive ZERO FOG Technology. ZERO FOG bonds to the toughest PC lens material beautifully where inferior, off-the-shelf and temporary anti-fog coatings only stick to softer, scratch-prone Cellulose Propionate (CP) lenses.

Adding to the Polycarb² story is the application of premium hard coatings and the development of the most effective FRESH AIR ventilation system in eyewear.

ZERO FOG TECHNOLOGY:

KLIM pioneered the use of the first U.S. military-spec, fog-eliminating technology for consumer eyewear in the Radius Goggle. ZERO FOG Technology (ZFT) was developed in conjunction with suppliers who treat the facemasks of U.S. military pilots and special operations personnel. KLIM has brought a new level of clear vision to the snowmobile market through proprietary chemical superiority. Fogging is not only reduced with the KLIM Radius Goggle. It's practically eliminated.

Applied by hand and thermally bonded for 24 hours to the inner lens of the Polycarb² Premium Lens system, KLIM ZERO FOG Technology is perfected for advanced fog-killing performance and real durability. In fact, ZERO FOG has a military-spec 10-year shelf life and provides the same hardness rating (scratch resistance) as most goggle brands' exterior lens hard coatings do.

If you're looking for a fog-eliminating treatment that lasts and outperforms all others, ZERO FOG is it.

AIRCHAMBER VOLUME BOOSTING DIMENSIONS:

The KLIM Radius Goggle is designed with more volume between your eyes and the interior surface of the lenses. This higher volume of air created by KLIM's AIRCHAMBER is affected less drastically by changing temperatures and humidity levels, keeping condensation saturation to a minimum. The KLIM Radius Goggle's AIRCHAMBER maximizes the volume of the face-to-lens airspace so the chance of fogging and having your vision compromised is diminished.

FRESH AIR VENTILATION SYSTEM:

The AIRCHAMBER airspace in the Radius goggle is managed by the Radius Goggle's dynamic FRESH AIR ventilation system—perfected to maintain clean, clear air in front of your eyes and across the lens interior without drying your vision. In-frame directional intakes, massive lower and upper frame vents and substantial in-lens vents all combine to keep the KLIM Radius goggle's AIRCHAMBER restored with clean air. Combine the Radius Goggle with a KLIM F4 Helmet and you get the first fully integrated helmet and goggle ventilation system ever developed—the ultimate in comfort and clarity and the absolute best combination to fight poor visibility on the snow.

FOV⁺ GEOMETRY:

Every dimension of the Radius goggle skeleton has been meticulously engineered to provide the most unobtrusive peripheral Field of View (FOV) available. From frame dimensions and strap outrigger angles to the width of our dual-lens gasket material and FOAM³ system, every component of the Radius goggle is designed to disappear from your vision as soon as you put it on. Horizontal and Vertical Field of Vision is greater than the competition thanks to FOV⁺. Intense engineering allows the Radius to combine high-peripheral vision with AIRCHAMBER maximum volume construction—providing the unique benefits of a deep-chambered goggle that doesn't impede your vision.

RADIUS FOAM SYSTEMS:

KLIM utilizes two exclusive foam structures in the Radius Goggle to provide maximum breathability, durability and comfort.

By sourcing unique foam composites never before used in consumer eyewear, KLIM enhances rider comfort by completely managing moisture throughout the Radius Goggle system. The key is to move and remove moisture.

Combined with AIRCHAMBER dimensions and FRESH AIR ventilation the Radius Foam Systems continue the focus on providing clear vision in all conditions.

FOAM³ FACE FOAM:

1: High-wicking face contact fabric transports sweat off your skin quickly to keep a fresh, dry junction between your face and the goggle. Antimicrobial properties keep this thin layer of hyper-wicking fabric fresh while it constantly transports moisture into Stage 2.

2: Medical-grade foam absorption properties make KLIM's Stage 2 foam the most potent sweat dispersing foam structure available. Its superior encapsulating functionality can hold and more moisture, allowing it to evaporate quicker and more completely than any other foam. Stage 2 also incorporates high-quality antimicrobial properties to reduce funk and eliminate foam failure due to microbial attacks.

3: Strong Barrier Foam adheres to the Radius frame and provides the foundation for the FOAM³ System. Its higher-density structure is perfect for holding tight to the frame and provides awesome durability and adhesion. The Barrier Foam also provides a cold-air-blocking barrier around the perimeter of the goggle that kills wind chill and that frozen forehead sensation open foams can let through.

RADVENT FRAME VENT FOAM:

KLIM, in conjunction with GORE Labs, documented breathability and air-permeability performances of numerous frame vent foam structures. Through this research, KLIM found the perfect lens ventilation foam. Our RADVENT foam provides snow and debris-blocking properties with air permeability and breathability performance equal to much less dense foams. This allows maximum air and water vapor to escape without allowing snow or other debris to penetrate into the AIRCHAMBER.

Frame and Strap Color Options:

- BlackOut
- Mountain

Lens:

- Available in Smoke Polarized Lens finish
- Polycarb² Premium Lens Construction
- ZERO FOG Technology
- FRESH AIR Ventilation System
- Polarized anti-glare lens treatment
- Meets or exceeds ASTM and ANSI standards for:
 - Impact resistance
 - Fog resistance
 - Abrasion resistance

• UV400 Inhibitor blocks harmful visible light spectrum

Frame:

- AIRCHAMBER Volume Boosting Dimensions
- FRESH AIR Ventilation System
- FOV⁺ Geometry

- FOAM³ Face Foam
- RADVENT Frame Vent Foam
- Snowmobile-spec oversized face foam with debossed KLIM logos and reliefs around nose
- 45mm wide goggle strap has two wide strips of silicone for secure fit as well as high-quality raised textured details in pattern
- Two-part, removable nose piece incorporates a firm outer frame and soft rubber nose contact center section
- Real metal louvers on frame intake vents push air to sides of frame to minimize eye-drying while still moving maximum air through the FRESHAIR ventilation system
- Premium metal flake paint with multi-sheen finish (gloss and matte black accents)

Case and Extras:

- Thermal-formed rigid goggle case with internal foam padding and extra lens storage
- Soft dual-fabric micro-fiber wet/dry goggle cleaning cloth and storage bag with separate chamber for extra lens storage

The KLIM F4 Helmet has forever changed the way motor sports enthusiasts define premium comfort and protection. For 2012, the revolution continues with the most ventilated, most comfortable and most feature-packed helmet in the outdoors. Riding a wave of momentum after the 2011 re-design, KLIM's F4 helmet looks to impress with the same improved fit, increased ventilation and superb graphic updates this year. What makes it so special? Moisture control, superior fit and unmatched quality and value. The KLIM F4 features 41 air-crafting intakes to eliminate heat buildup and move moisture off your head when you reach high activity levels. The drier your head, the better you feel and KLIM's complete F4 package—included with every helmet—includes a highly-breathable WINDSTOPPER liner for those ultra-cold days. The WINDSTOPPER liner allows superior breathability while blocking bone-chilling wind from over-cooling your head. For all your rides, the KLIM F4 showcases KLIM's uncompromised commitment to improving your experience by making you more comfortable in all conditions.

As the only snowmobiling jacket in the world with the tried and tested GORE-TEX® Pro Shell Comfort Mapping construction technology, the Valdez ensures maximum comfort, durable waterproofness, and maximum breathability in all conditions. This parka is built to work seamlessly with the human body in the most demanding conditions. Highly active riders who demand maximum performance have trusted the Valdez for years.

For 2012-2013, KLIM has stepped up their game by revising the fit for a better, more-aggressive fit, removing excess material flaps for quicker access to cargo pockets, blacking-out the color scheme to clean up the style and adding a KLIM-Exclusive embossed shell fabric. All-in-all the KLIM Valdez Parka is set to dominate like never before.

The completely redesigned Tomahawk carries a ton of momentum. An updated ventilation system (we've removed the pit zips and integrated vertical intake and exhaust ports for easier operation) and integrated, low-profile cargo options combine with the tested and proven durably waterproof GORE-TEX® Two Layer Performance Shell Technology. A guaranteed dry and comfortable ride is right here. Tomahawk riders are high-activity boondockers that build up a sweat and want a technical, high-contrast look to their gear.

INVERSION JACKET

3349

Versatility is the name of the game for the Inversion Jacket. It's a critically year-round companion that is capable of filling the role of a mid-layer or an all-around WINDSTOPPER® jacket. High breathability and water resistance make this a great choice for those looking for a do-everything jacket.

• **100% WINDPROOF**

- WINDSTOPPER® SOFT SHELL FABRIC EXTERIOR
- HIGHLY WATER RESISTANT
- PLUSH MICRO CHECK FLEECE INTERIOR
- MAXIMUM BREATHABILITY
- 4 EXTERNAL POCKETS (2 CHEST, 2 HAND)
- MAX FLOW VENTILATION: 3 PORTS
- 2 VERTICAL CENTER CHEST INTAKES (DOUBLE AS POCKETS)
- 1 MID-LOWER HORIZONTAL BACK EXHAUST WITH SNOW DUST BARRIER MESH
- BOTTOM HEM ADJUSTMENT
- INTERIOR MP3 HEADPHONE PORT AND SECURING LOOPS
- ADJUSTABLE VELCRO CUFFS
- GLOVE-FRIENDLY ZIPPER PULLS
- KILL SWITCH D-RING
- EMBROIDERED LOGOS

The SPEED SERIES of KLIM Technical Riding Gear is led by the Vector Parka—an all-new jacket with speed in its veins. Constructed with GORE-TEX® Two Layer Performance Shell technology, the Vector parka drops the hammer on the most abusive riding. Ballistic nylon overlays, 200 Grams of 3M™ Thinsulate™ Insulation and integrated front impact padding bring the fight back to Mother Nature. Race inspired high-visibility logos and reflective add safety and style while KLIM's exclusive angled ventilation system opens up when you overheat. The Vector owner wants a race-ready jacket with the sleekest look and the 3M™ Thinsulate™ Insulation and GORE-TEX® performance to make every ride, or race, their best.

Speed-driven attitudes and KLIM-driven performance combine in the all-new Kinetic Jacket. GORE-TEX® Two Layer Performance Shell Technology and 100 Grams of 3M™ Thinsulate™ Insulation team up to keep you comfortable and dry at all times while the new-school lines and youthful styling are sure to please the younger, race-ready crowd. Durability is easily handled by a high-strength outer shell and Cordura® overlays protect abrasion-prone zones. Kinetic owners literally wear their passion for speed on their sleeves.

The Extreme Bib is the perfect choice for boondocking riders looking for the function and secure fit of a bib with the unrestricted comfort of a waist-high pant. The GORE-TEX® Three Layer Performance Shell construction throughout the aggressively patterned main body delivers the 100% waterproof, windproof and highly breathable outerwear performance you expect. The high-back/low front style brings the best of both worlds; blocking snow dust and powder invasion in the back while opening up the front for ultimate freedom.

FREERIDE PANT

3573

3573-000

The original Free Ride pant defines the no-boundaries segment of backcountry shredding. Brand new for 2011-2012, the Free Ride Pant brings GORE-TEX®'s Three Layer Performance Shell technology, heavy CORDURA® overlay panels, aggressive articulated patterning and the highest-quality on-the-sled riding gear details, features and technology. The Free Ride provides maximum mobility, supreme weather and abrasion toughness, and a simple, clean style.

- **GUARANTEED TO KEEP YOU DRY®**
- GORE-TEX® THREE-LAYER PERFORMANCE SHELL TECHNOLOGY
- KLIM'S EXCLUSIVE SEAT DRY TECH CONSTRUCTION
- AGGRESSIVE PATTERNING
- HIGH-BACK WAIST WITH FORWARD ARTICULATION
- MAX FLOW VENTILATION: SIDE ZIPS
- 5000 CORDURA® OVERLAYS ON KNEES AND INNER BOOT AREA
- 5000 CORDURA® UNDERLAYS
- INTERNAL COMFORT LINER
- NON-RESTRICTIVE GUSSETING
- FULL LENGTH WRAP-AROUND SIDE LEG ZIPS
- 2 EXTERNAL THIGH POCKETS
- REMOVABLE ANATOMICALLY SHAPED KNEE/SHIN PADS
- HIGH-CONTRAST DOUBLE STITCHING
- SIDE COMPRESSION WAIST ADJUSTMENT
- WATER RESISTANT YKK® ZIPPERS
- INTEGRATED POWDER HATER BOOT GAITER DESIGN
- GLOVE-FRIENDLY ZIPPER PULLS
- COMPATIBLE WITH KLIM SUSPENDERS (SOLD SEPARATELY)
- KILL SWITCH D-RING

One ride in the Keweenaw bib and riders immediately understand why it shares a name with the most technically advanced insulated jacket on the snow. Like the Keweenaw Parka, this bib incorporates GORE-TEX® Performance Shell Technology (in Three-Layer construction) and KLIM's exclusive zonal use of 3M™ Thinsulate™ Insulation technology. On top of those features—and built into the aggressively patterned bib—are heavy duty nylon knee and inner boot panels and KLIM's exclusive Seat Dry Tech construction that keeps your backside warm and dry through the coldest, wettest conditions. The Keweenaw is the first and last word in ultimate comfort, protection and durability in intelligently insulated bibs. Serious riders who value the best insulation technology in the world choose Keweenaw.

The Klimte Bib incorporates an impressive list of high-tech features making it a tremendous value for the rider who wants an insulated bib that won't hold them back. GORE-TEX® Three Layer Performance Shell technology and guaranteed 100% waterproof/windproof and breathable/insulated performance. Klimte owners appreciate comfortable anatomical patterning and the toughness of ballistic nylon overlays in high-wear zones. For riders that face extreme temperatures and don't require the more aggressive patterning and ultra-premium features of the Keweenaw Bib, the Klimte is the perfect fit.

Designed for speed and built to handle all kinds of abuse, the all-new Vector pant redefines trail dominance. GORE-TEX® Three Layer Performance Shell technology guarantees a lifetime of dry rides while KLIM's Zonal Insulating Technology puts just the right amount of 3M™ Thinsulate™ Insulation in the places the fastest riders need it most. Vector pant owners take pride in having the best gear available and appreciate the quality of KLIM's premium bib features. Ballistic panels over the knees, high-visibility 3M™ Scotchlite™ reflective material, full-length side zips, ultra-secure side waist adjustment and a high-waist elastic comfort waist are leading the charge on high-speed rides.

Aggressive patterning, forward articulation and a clean look make the KINETIC Pant a top choice for cross-country racers and trail riders alike. GORE-TEX® three layer performance shell technology and 100 Grams of 3M™ Thinsulate™ Insulation throughout make it a highly functional, 100% waterproof and windproof, highly breathable and comfortably warm pant. 500D CORDURA® overlays on the knees stand up to serious abuse. KINETIC pant owners appreciate the clean styling and high-quality design but don't require the premium features of KLIM's Vector Pant.

The Everest Jacket is a perfect complement to the Klim layering system. Built with breathable, heavyweight arctic fleece, it will maximize the heat retaining aspects of your clothing configuration. Articulated patterning allows it to fit precisely between an outer shell and base layer. Non-pilling outer velour and inner berber finishes make the Everest Jacket perfectly comfortable no matter how you use it.

- 480 GRAM HIGH-LOFT ARCTIC FLEECE
- NYLON REINFORCEMENTS
- HIGHLY BREATHABLE, MOISTURE WICKING
- ARTICULATED FIT
- 3 EXTERNAL POCKETS (1 CHEST, 2 HAND)
- INTERNAL BERBER FINISH FOR MAXIMUM HEAT RETENTION
- BOTTOM HEM ADJUSTMENT
- FLEECE-LINED COLLAR WITH NYLON OVERLAY
- FLEECE CUFFS
- VELOUR OUTER SURFACE RESISTS PILING
- YKK® ZIPPERS **YKK®**
- INTERIOR MP3 PLAYER HEADPHONE PORT AND SECURING LOOPS
- MICRO-INJECTED AND EMBROIDERED LOGOS

EVEREST VEST

3251

The Everest Vest is perfect for those looking for a heavy fleece mid-layer, but still wanting to retain high levels of mobility. Built with breathable, heavyweight arctic fleece, it will maximize the heat retaining aspects of your clothing configuration while the sleeveless design allows greater movement of the arms. Non-pilling outer velour and inner berber finishes make the Everest Vest perfectly comfortable no matter how you use it.

- 480 GRAM HIGH-LOFT ARCTIC FLEECE
- NYLON REINFORCEMENTS
- HIGHLY BREATHABLE, MOISTURE WICKING
- ARTICULATED FIT
- 3 EXTERNAL POCKETS (1 CHEST, 2 HAND)

YUKON PULLOVER

BRAND NEW

6013

YKK

The comfortable, casual styling and cozy good looks of KLIM's new Yukon Pullover are merely part of the story- this is one highly technical piece of performance gear. Ideal as a heavier-weight mid-layer insulator (fits right between the Inferno and Everest in warmth) as well as the perfect pre and post-ride casual outer shirt, the Yukon promises efficient warmth with unbelievable versatility. Featuring sweater-like comfort and Polartec® Thermal Pro® insulated construction, the Yukon Pullover is always ready for the temps to fall and the snow to drop.

- 314 GRAM POLARTEC® THERMAL PRO® INSULATED CONSTRUCTION
- TASLAN OVERLAYS ON SHOULDERS AND ELBOWS INCREASE ABRASION RESISTANCE AND ALLOW OUTER LAYERS TO SLIDE ON/OFF EFFORTLESSLY
- UPPER ARM STASH POCKET
- STRETCH BINDING IN MICRO CUFF
- LIGHTWEIGHT SWEATER-LIKE WARMTH
- QUICK DRYING
- HIGHLY BREATHABLE
- MACHINE WASHABLE
- FLAT-LOCK STITCHING
- EMBROIDERED LOGOS

SUMMITTECH TLS

REDESIGNED

6111

The men's Summit Tech T is designed as a performance-riding base or mid-layer shirt. Its new-for-2012 Polyester Micro-grid knit main body fabric and stretch panels of poly/spandex fabric make it ideal for all riding duties. Don't compromise your layering system with a cotton t-shirt, choose a Tech T and stay drier and more comfortable all day. Anti-microbial sweat fabrics keep it looking and fitting perfect ride after ride.

REVOLT JERSEY

3315

3315-100

Essential to every good ride is having the right equipment. The Revolt Jersey fits that bill from its ability to wick moisture created while riding hard keeping the rider dry and comfortable to its rider specific patterning that allows the rider to move without any restriction or binding. The Revolt Jersey also features a silicone back patch that keeps the jersey tucked in the pants, non-interfering seam construction for all-day comfort, and underarm mesh panels that allow unwanted heat to escape. Take the Revolt Jersey with you on your next ride and you will have the right equipment with you.

- BREATHABLE AND MOISTURE-WICKING POLYESTER FABRICS
- COMFORT PADDED SHOULDERS AND ELBOWS
- CUT-AWAY SLEEVES
- NO-FADE SUBLIMATED GRAPHICS
- SILICONE PRINT ON BACK TO KEEP JERSEY TUCKED IN
- NON-RESTRICTIVE CUFFS
- SEMI-MESH UNDER ARM VENTILATION

The Mojave Jersey is our most ventilated jersey, designed with just the right balance of protection and airflow. Flat seams, raglan sleeves and articulated patterning all contribute to a perfect, non-restrictive fit. Two ventilation-maximizing meshes are strategically placed to ensure efficient airflow, while their moisture-wicking properties draw moisture away from your body helping you to maintain the highest possible comfort level even in the hottest weather.

- MOISTURE-WICKING POLYESTER FABRICS
- FULL BODY MESH SYSTEM
- LOW-PROFILE SEAM CONSTRUCTION
- COMFORT PADDED SHOULDERS AND ELBOWS
- SILICONE PRINT ON BACK TO KEEP JERSEY TUCKED IN
- NON-RESTRICTIVE CUFFS

TECHNICAL REALITY

RADIUM GTX® BOOT 3212

The original two-piece structured snowmobiling boot. With a durable insulated foam inner liner and highly reinforced exterior frame, the ultra-stable Radium GTX Boot provides maximum support for big jump landings and high-impact stresses with full GORE-TEX® GUARANTEED TO KEEP YOU DRY® waterproof and breathable footwear technology built in, feet remain comfortably dry even in the heat of race-day battle. Radium boot users demand ultimate support, substantial warmth and the convenience of a two-part boot for drying between rides.

- **GUARANTEED TO KEEP YOU DRY®**
- GORE-TEX® INSULATED COMFORT FOOTWEAR TECHNOLOGY
- TWO-PART LINER/SHELL DESIGN OFFERS MAXIMUM STIFFNESS
- RIDER SPECIFIC FORWARD FLEX WITH RIGID SIDE-TO-SIDE SUPPORT
- EXCLUSIVE DUAL DUROMETER OUTSOLE PROVIDES SUPERIOR TRACTION ON RUNNING BOARDS AND THE SNOW
- ENCAPSULATED EVA FOAM MID-SOLE AND STIFF BOARD DISPERSES SHOCK AND PROTECTS FEET
- KICKER TOE PIECE RESISTS WEAR FROM TUNNEL BOLTS AND OTHER ABRASION
- RUBBERIZED SPINE AND HEEL AIDS IN SUPPORT, CONTROLS FLEX, RESISTS ABRASION
- ZONAL LACING SYSTEM KEEPS LACES TIGHT WHILE TYING
- HINGED TONGUE MAKES FOR EASY ENTRY
- OUTER BOOT MADE WITH MILITARY GRADE LEATHER
- REPLACEMENT LACES AVAILABLE
- REMOVABLE LINER
- SLIP PAD BOTTOM FOR EASY ENTRY
- NON-SLIP HEEL PATCH KEEPS LINER LOCKED IN PLACE
- EXO-LACING SYSTEM WITH CENTER PULL TIGHTENING
- BREATHABLE, INSULATING FOAM CONSTRUCTION
- PADDED TOE BOX COMFORTS AND PROTECTS TOES
- REPLACEMENT LACES AVAILABLE
- REMOVABLE LINER
- SLIP PAD BOTTOM FOR EASY ENTRY
- NON-SLIP HEEL PATCH KEEPS LINER LOCKED IN PLACE
- EXO-LACING SYSTEM WITH CENTER PULL TIGHTENING
- BREATHABLE, INSULATING FOAM CONSTRUCTION
- PADDED TOE BOX IS COMFORTABLE AND PROVIDES CUSHIONING
- REPLACEMENT LACES AVAILABLE
- HALF SIZES CAN BE CREATED WITH INCLUDED SOLE INSERT

TECHNICAL REALITY

The KLIM Tactical pant offers the same padded comfort and coverage of the popular KLIM Tactical Short in a full-length riding pant. Now, you can combine a padded comfort short and your lower body base layer into one piece designed to wick moisture away and facilitate maximum breathability. The saddle area features a high-tech triple-density chamois that absorbs riding impacts in the saddle and prolongs the comfort of your ride. PORON® XRD™ Extreme Impact Protection material is embedded in strategic locations to help absorb impacts on your legs, hips and more. You want one pant that does it all? The Tactical pant is it.

- PORON® XRD™ EXTREME IMPACT PROTECTION MATERIAL ON HIP, THIGHS AND OVER TAILBONE
- PADDED COMPRESSION PANT
- SUPER BREATHABLE MOISTURE-WICKING POLYESTER MATERIAL
- 4-WAY-STRETCH SPANDEX DOWN ENTIRE LEG TO FIT DIFFERENT LEG SIZES AND SHAPES
- SOFT ELASTIC WAISTBAND
- SUEDE TEXTURE CHAMOIS CROTCH/GROIN AREA
- MICRO-INJECTED LOGO
- TAGLESS
- ARTICULATED DESIGN
- SILICONE BAND KEEP ANKLE CUFF IN PLACE

Say goodbye to the days of chafing and other riding maladies associated with loose-fitting riding shorts. The KLIM Tactical Short is designed to keep your equipment stowed properly and to wick moisture away from your skin to ensure maximum possible comfort on your ride. The saddle area is constructed with a high-tech triple-density chamois that will help absorb riding vibrations and cushion your ride. PORON® XRD™ Extreme Impact Protection material is embedded in strategic locations to help absorb impacts. On impact, the PORON® XRD™ high-performance molecules creates a unique protective shield that can repeatedly absorb up to *90% of the most intense force.

- PADDED COMPRESSION SHORT
- PORON® XRD™ EXTREME IMPACT FOAM ON HIP, THIGHS AND TAILBONE

Specifically designed for the coldest riding conditions on Earth, the Arctic Balaclava features a massive feature list fit for the most extreme climates. From the base, the Arctic Balaclava brings a massive, ultra-wide skirt to ensure it stays put. Add in full WINDSTOPPER®-frontal attack with KLIM's variable fleece backer thicknesses around eyes (to enhance fit and reduce restriction), full neoprene nose piece/breath deflector, lycra stretch back, conformed neck fit, and super stretchy fleece over the head. All-in-all, this is one Balaclava that can take it all.

- SPECIFICALLY DESIGNED FOR THE COLDEST CONDITIONS/HARSH ELEMENTS

ALPINE PARKA

Women's

4088

4088-790

The most technically advanced outer shell on the snow is here. And it's made specifically for the world's most demanding female riders. The all-new Alpine Parka features a unique combination of GORE-TEX® fabric technologies to deliver maximum toughness, breathability and the confidence of our GUARANTEED TO KEEP YOU DRY® Promise. Patterned aggressively for highly active riders, the Alpine incorporates leading-edge features not found anywhere else.

Perfectly matched to the KLIM women's line of performance layering gear, the Alpine is exactly what aggressive riders have been asking for: unbeatable shell performance, high-end features, supreme function, durability and accessories. This is THE jacket for the real female rider who stops less and rides more.

KLIM innovation continues in the Alpine Bib. Starting with an all-new high-waist bib design built in tune with real-world female body shapes, the Alpine Bib refuses to compromise and looks to satisfy the most demanding riders' needs. Non-insulated to take advantage of supreme breathability and layering system versatility, the GORE-TEX® Three Layer Performance Shell construction keeps aggressive riders on the snow longer.

This is the first full-featured premium shell bib built for women that incorporates all the proven men's product technology (wrap around full-length side zips, KLIM Seat Dry Tech construction, high wear fabrics in key zones, intelligent gaiter design and more). Unique embossed GORE-TEX® fabric adds just enough female styling to finish off the Alpine—the next step in women's riding gear.

Adding to the Klim Women's Line of technical riding gear, the Allure Glove carries the GUARANTEED TO KEEP YOU DRY® promise while maintaining high levels of breathability. This women-specific glove includes GORE-TEX® fabric with GORE™ 2 in 1 Technology.

The glove has two completely separate chambers for the hand. In 'warm' position the hand is at the center of the glove and at the center of 200 and 100 Grams of 3M™ Thinsulate™ Insulation. In 'grip' position, the majority of the insulation is on the top of the hand leaving a small layer between the hand and the grips. The grip position allows the rider to take advantage of hand warmers while maximizing protection from wind chill on the top of the hand.

- **GUARANTEED TO KEEP YOU DRY®**
- GORE-TEX® GLOVE WITH GORE™ 2 IN 1 TECHNOLOGY

KODIAK BAG

REDESIGNED

3317

Redesigned from the wheels up, the new Kodiak Bag offers maximum cargo capacity and an intelligent compartmentalized design. From the outside-in, the Kodiak's structural stoutness and weight-distributing design will easily contain all the gear you could ever possibly need. Independent boot, helmet and goggle compartments, cavernous cargo bays and numerous smaller stash and zippered pockets combine to create the ultimate full-size rolling gear bag.

- STRUCTURAL SKELETON ENSURES STAND-UP STABILITY WHEN LOADED OR UNLOADED
- COMPARTMENTALIZED DESIGN PLACES BOOTS, HELMETS, GOGGLES AND MORE IN DEDICATED ZONES
- OVERSIZED 90MM WHEELS PROVIDE HIGHER GROUND CLEARANCE TO KEEP LOADED BAG FROM HITTING THE GROUND
- INTERNAL SEMI-RIGID BOOT LINER BAG KEEPS BOOTS SEPARATE FROM THE REST OF YOUR GEAR
- YKK® HEAVY DUTY ZIPPERS **YKK®**
- LARGE INTERNAL LID CARGO BAYS
- ZIPPERED LID MESH POCKETS
- TWO EXTERIOR POCKETS (ONE IS FLEECE)
- LIGHTWEIGHT AND STURDY EXTRUDED PULL HANDLE
- HIGH QUALITY GRAB HANDLE WITH MOLDED K-LOGO
- FOUR EXTERNAL GRAB HANDLES (1 MOLDED FOOT GRAB HANDLE AND 3 HEAVY-DUTY WEBBING HANDLES)
- HIGH-IMPACT PLASTIC CORNER ARMOR ON EXTERIOR BASH-AND-DROP ZONES
- SIZE: 36x18x18

QUANTITY:	
3317-000-000	
USD\$	239.99

WOLVERINE **CARRY-ON** BRAND NEW 5017

KLIM's newest luggage addition is the versatile Wolverine. Packing intense cargo capacity into a carry-on sized rolling bag, the Wolverine will deliver KLIM's gear-bag toughness and style wherever it rolls. High-function travel features include an EVA molded base with integrated corner armor, plentiful internal and external pocket choices, lightweight sturdy extendable pull handle and YKK® heavy duty zippers throughout.

- CARRY-ON DIMENSIONS (22X14X9) FOR AIR TRAVEL AND CONVENIENT CIVILIAN USE
- EVA MOLDED BASE CONSTRUCTION
- INTEGRATED CORNER ARMOR
- IMPRESSIVE CARGO CAPACITY (MAIN COMPARTMENT, LARGE LID BAY, ZIPPERED MESH LID STASH POCKET, INTERNAL SIDE ZIPPERED STASH POCKET, 2 EXTERNAL ZIPPERED POCKETS (ONE FLEECE LINED))
- MAIN COMPARTMENT COMPRESSION STRAPS
- YKK® HEAVY DUTY ZIPPERS
- STURDY PULL HANDLE
- HEAVY-DUTY WEBBING GRAB HANDLES

TEAMGEARBAG

3313

KLIM's Team Gear Bag takes payload to a whole new level. Its superior capacity compartment system features four zones of intense storage: a deep boot compartment, huge center main gear compartment, soft-lined helmet pocket and quick-access external accessory pockets. Even when fully loaded (if you can find enough gear!), the Team Gear Bag remains easy to lift and carry thanks to an ingenious auto compression padded shoulder strap system and sleek, flush-grab side and end handles. Fill it, if you dare!

- CONSTRUCTED OF RUGGED MATERIALS - BUILT TO LAST
- SUPER LARGE CAPACITY
- 4 ZIPPERED COMPARTMENTS
- YKK® HEAVY DUTY ZIPPERS YKK®
- DEEP BOOT COMPARTMENT
- LARGE FRONT ACCESSORY POCKET
- HELMET COMPARTMENT WITH REMOVABLE HELMET SLEEVE
- HUGE MAIN GEAR COMPARTMENT
- AUTO-COMPRESSION PADDED SHOULDER STRAP CARRY SYSTEM
- FLUSH-GRAB SIDE AND FRONT HANDLES FOR EASY LIFTING/MOVING
- REINFORCED BASE
- QUILTED HIP PANEL
- MULTIPLE VENTING PORTS
- DIMENSIONS 18"x36"x16"

KLIM BACKCOUNTRY SHOVEL SYSTEM 5065

BRAND NEW

QUANTITY:
5065-000-000
USD \$79.99

Packing a serious punch to the face of backcountry survival situations, the KLIM Backcountry Shovel System comes complete with a quick-access saw blade and massive extendable handle for maximum reach and leverage for both the shovel and saw. The oversized grip handle and wide shovel blade ensure you can move maximum snow with the most efficiency while the sleek, easy-to-carry design keeps all your cutting and digging tools as close as possible. All aluminum construction for lightweight strength.

- FULLY INTEGRATED SHOVEL, EXTENDABLE HANDLE AND SAW SYSTEM
- QUICK-ACCESS TO SAW FUNCTION VIA SIMPLE PUSH-BUTTON RELEASE AND CLIPS
- EXTENDABLE HANDLE WORKS AT MAXIMUM LENGTH WITH SAW AND SHOVEL
- OVERSIZED GRIP HANDLE
- SAW HAS LASER-ETCHED DEPTH GAUGE PRINT FOR SLIDE TEST/SNOWPACK MEASUREMENTS
- ALL ALUMINUM CONSTRUCTION
- EASY-ON SAW BLADE PROTECTOR

KLIMBACKCOUNTRYPROBE

BRAND NEW 5064

BOONDOCKERS9

3005

\$24.99

BRAND NEW

What do you do when Mother Nature doesn't cooperate? Load up the sleds and hit the road! That's exactly what the Boondockers crew did during the winter of 2011-2012, logging thousands of miles chasing storms and exploring new locations. This winter the riders pushed further into the backcountry in search of deep snow and technical terrain. What resulted are the most incredible scenes we've ever captured on film.

New locations filled with endless canyons of untracked powder, pristine river valleys, and rugged mountain landscapes set the stage for a film that is all about pure backcountry snowmobiling and those who live for it. Watch as riders take lightweight turbo sleds to new levels, re-defining what's "possible" with huge air, technical lines, and unbelievable champagne powder. Join the Boondockers crew for an epic adventure through the Rocky Mountains in search of the most spectacular riding conditions.

Starring: Matt Entz, Kris Kaltenbacher, Dan Gardiner, Geoff "Phatty" Dyer, Ryan Nelson, Erik Woog, Adam Onasch, Aaron Case, Ryan Searle, Keith Curtis, Cole Wilford, Chris Brown, Chris Burandt, Anthony Obert, Shane Kynaston, Stephen Darcy, and Many More...

Appropriate for audiences of all ages.

THUNDERSTRUCK11

3004

\$29.99

BRAND NEW

From death-defying chute climbs to extra-technical tree riding, Thunderstruck 11 takes you on an all new journey into a world where freedom and adrenaline take over and madness ensues! Chest-deep blower powder, insane climbing and an amazing foray into crazy tree-antics, this film will introduce you to a whole new level of specialized riding from what we can do all the way to what NOT to do on a snowmobile. Watch all the usual suspects take their sleds into the craziest spots on the mountain, all the while maintaining balance and finesse until... Boom! Crashes happen! Starring Randy Swenson, Julio Eiguren, Uden Ladouceur, Trennis Baer, Tina Thomas, Riley Jensen, Mark Mesenbrink and MANY more! Rated G, All audiences. Produced by Jim Phelan, Thunderstruck Films

WARRANTY

We warrant *every product we make to be free of manufacturer defects for the **lifetime of the product. Additionally, all KLIM GORE-TEX® products are GUARANTEED TO KEEP YOU DRY® for the **lifetime of the product. If these products fail due to a manufacturing or material defect, we will repair the product without charge, or replace it at our discretion. This warranty is not transferable. Product must be registered with KLIM (at www.klim.com) to receive warranty coverage.

* KLIM BOOTS are warranted against defects in materials and workmanship for one (1) year from the date of purchase. Aggressive running boards will accelerate the wear and tear on the soles of the boots. This is considered normal wear and tear. General warranty terms apply.

* The KLIM F4 HELMET is warranted against defects in materials and workmanship for five (5) years from the date of purchase. General warranty terms apply.

* KLIM GOGGLES are warranted against defects in materials and workmanship for one (1) year from the date of purchase. Scratches are not covered under this warranty. General warranty terms apply.

** The lifetime of a product unfortunately does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, cuts, punctures, burns, accidents, improper care, negligence, normal wear-and-tear, modifications, alterations or use for a purpose other than which the product designed will void the lifetime warranty of even if the warranty issue is not related to these damages.

Should you have a warranty issue, call 1-208-552-7433 for a case number. We will repair if possible or replace all valid warranty items. Please have all warranty item claims clean for evaluation or they will be sent back to you as-is without an inspection being made, or a \$25 cleaning fee may be assessed.

CARE INSTRUCTIONS

GORE-TEX® OUTERWEAR WASH

Machine-wash warm (104° F/40° C). Powder or liquid detergent. No fabric softener. Follow manufacturer's instructions.

DRY CLEAN

If professionally dry-cleaned, request clear distilled solvent rinse and spray repellent. Follow manufacturer's instructions.

IRON

Steam-iron warm, placing a towel or cloth between the garment and the iron. No need to iron the garment until it is completely dry.

BLEACH

No chlorine bleach. It may damage your garment.

DRY

Tumble-dry warm. The heat from the dryer will help to reactivate the durable water repellent (DWR) treatment on your garment's outer fabric.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect the garment's breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® GLOVES

WASH

Follow the manufacturer's instructions. Machine or hand wash in warm water. Gently squeeze glove from fingertips to wrist to remove excess water. Do not twist.

DRY CLEAN

Not applicable.

IRON

Do not iron.

BLEACH

No chlorine bleach. It may damage your glove.

DRY

Drip-dry with the fingers facing upwards.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® FOOTWEAR

WASH

Clean the exterior with a cloth or brush and lukewarm water. The manufacturer may recommend leather treatment or preservation. Shake out sand, gravel, and dirt from inside the footwear. Remove and shake out the foot bed if applicable.

DRY CLEAN

Not applicable.

IRON

Not applicable.

BLEACH

No chlorine bleach. It may damage your footwear.

DRY

Dry naturally at moderate temperatures. Avoid direct heat. Convection-style boot driers work well.

WATER REPELLENT TREATMENT

We do not recommend the use of waterproofing waxes or greases as they can affect the footwear's breathability. Apply only treatments, polishes, conditioners, and dressings recommended by the manufacturer.

STAIN REMOVAL

Follow the footwear manufacturer's instructions.

THIS IS A GENERAL SIZING CHART. FOR ALL PRODUCTS AVAILABLE AT KLIM, PLEASE REFER TO THE GARMENT PAGE OF YOUR PRODUCT FOR AVAILABLE SIZES & COLORS.

BOOT - MEASUREMENTS 5 - 14 based on mens sizing

MEN'S	5	6	7	8	9	10	11	12	13	14
WOMEN'S	7	8	9	10	11	12	13	14	15	16

Note: For all measuring use a flexible measuring tape.

How to Measure:
To select glove size, measure around your dominant palm at the widest point.

5" - 7"	XS
7" - 8"	S
8" - 9"	M
9" - 10"	L
10" - 11"	XL
11" - 12"	2XL
12" - 13"	3XL

Head:
Measure circumference of head just above top of ears, and 1" above eyebrows.

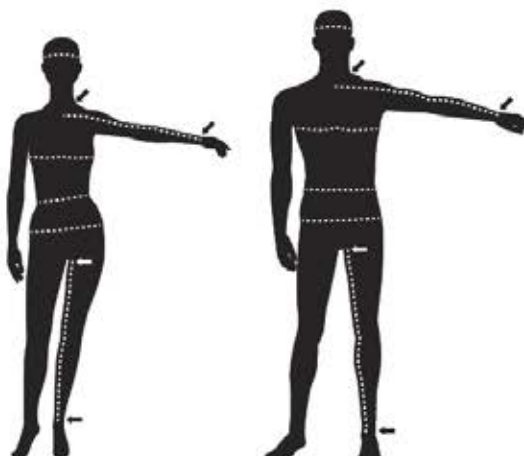

Chest:
Measure under arms around the fullest part of the chest. Be sure to keep tape level across back and comfortably loose.

Waist:
Measure around natural waist with a loose tape.

Inseam:
Without shoes, measure on inside of leg, from crotch to the floor.

Hip / Seat:
Place the measuring tape around the body at the fullest part of the lower hip, feet together.

Sleeve:
With your arm fully extended, measure from the center back of neck at spine to the wrist bone.

KLIM PRODUCT CODES XXXX - XXX - XXX STYLE SIZE COLOR

KLIM part numbers all consist of a 4 digit style code, 3 digit size code and a 3 digit color code.
STYLE-SIZE-COLOR [ex: 3369-120-700]

• As the product changes, the second number will increase by one every time the product has a large change in design. First generation begins with a zero: [ex: Klimatic Bib was 3078 (up to August 2010) and will be 3178 (from 2010 to 2011)]
