

2014-2015 SNOW GEAR

AARON CASE

TOUGHEST CONDITIONS. RIDERS. GEAR.

Mother nature is unrelenting. She doesn't care who you are. She doesn't care about your plans and doesn't care who you're riding with or if you get out before dark. She has her own agenda. Your comfort, survival and mood is not considered.

You take this environment head-on every time you ride. You refuse to back down, turn around or take days off. In fact, conquering this white world is what challenges you to ride longer and harder every time.

The toughest riders know what it takes to ride in the toughest conditions. It takes the toughest and most advanced riding gear on the earth designed with one thing in mind... to conquer mother nature.

COLE WILLFORD

RIDER PROFILE

Rider Name: Cole Willford

Age: 36

Hometown: Fruita, CO

Years riding: Life

Professional discipline: Hill climb racing, technical boondocking, free-riding

How many days did you get to ride last season? I have never been one to really keep track of how many days I ride in a year, but I try to take advantage of any opportunity to get out and this year provided a plethora of great rides.

Where's your favorite place/reason to ride? I have been fortunate to ride many great areas throughout my career that offer a wide variety of snow conditions and terrain in the U. S. and Canada. My all-time favorite still leads me back to the mountains around Star Valley in between Alpine and Afton Wyoming, due to the overall steep terrain and technical tree riding it has to offer.

Describe your riding style: Probably the best way to describe my riding style is to attack terrain with an aggressive yet smooth and technically sound approach.

What's the most-important thing for you to perfect in order to succeed on your next ride/race? The right amount of training in the gym and diet to fuel my body and muscles so that I have the strength and stamina to ride aggressive and smooth.

Who is your favorite person(s) to go riding with and why? My favorites to go riding with are Jared Sessions, Sid Huntsman, Keith Curtis, Tony Jenkins and Dan Adams. I have a friendship with all of these guys that always makes it fun and enjoyable to be out on the snow. We push each other to be our best and I always come out a better rider from a day with one of these guys.

What's the one modification to your machine you can't ride without? Oh man, there are so many to choose from but I would probably have to go with the addition of a Boondocker turbo. They make the impossible possible!

What's your breakfast of champions?
Protein shakes and oatmeal.

What's your off-season ride?
A KTM 350 SX, a Trek top fuel carbon fiber mountain bike, and a CWB wakeboard.

What's your favorite KLIM gear setup?
My favorite Klim gear that I typically wear consist of the aggressor pant and shirt, KLIM socks, Free Ride Pant, Adrenaline Boots, Revolt Pullover, inversion Gloves, F4 ECE Helmet and the Radius Pro Goggles.

What's your go-to mid-ride lunch?
It's usually an overpriced protein bar or bag of beef jerky LOL!

What's the weirdest thing you've seen someone take with them on a ride? Not sure if it's the weirdest? But once Keith Curtis cooked meatloaf for his lunch in his hot dogger. Let's just say the smell was very interesting!

Have you ever seen Bigfoot or another mythical creature in the snow? Can't say that I have and I sure hope I never do to tell you the truth.

TOUGHEST
CONDITIONS. RIDERS. GEAR.

Rider Name: Dan Adams

Age: 38

Hometown: Jackson Hole, Wyoming

Years riding: 18

Professional discipline: Snowmobile instruction, boondocking

How many days did you get to ride last season? 90+

Where's your favorite place/reason to ride? South Willow Creek. It's a short trail ride in and has terrain for days.

Describe your riding style: I ride to a rhythm and try and be smooth and progressive. Coming up with new ideas and techniques helps me teach other riders how to get the most out of their riding.

What's the most-important thing for you to perfect in order to succeed on your next ride/race? Staying in top physical condition has always been my goal. At this stage in my career, my sleds, gear, and equipment are all on another level, my fitness is the only hurdle.

Who is your favorite person(s) to go riding with and why? My NXT LVL crew Levi Tormanen and Jason Blair are always a blast, and any day with Jared Sessions is gonna rock!

What's the one modification to your machine you can't ride without? A tether.

What's your breakfast of champions? 2 eggs, turkey bacon, banana and a tall sugar free vanilla latte with soy milk. Perfect.

What's your off-season ride? I've got a pair of Kawasaki stand up jet skis and a Cannondale Scalpel 29'er.

What's your favorite KLIM gear setup? F4 helmet, Powercross Pullover, Storm bibs, Inversion gloves, Aggressor brief, pant, and shirt, Adrenaline boots.

What's your go-to mid-ride lunch? Good ol' PB&J.

Have you ever seen Bigfoot or another mythical creature in the snow? Not yet but that's why I carry bear bombs. Lol.

DAN ADAMS

RIDER PROFILE

TOUGHEST
CONDITIONS. RIDERS. GEAR.

ROSS MARTIN

RIDER PROFILE

Rider Name: Ross Martin

Age: 29

Hometown: Burlington, WI

Years riding: I have been riding snowmobiles since I was 10 years old and started racing them at 14 years old.

Professional discipline: Snocross

Where's your favorite place/reason to ride? I don't get to do much mountain riding during the season but I've been to Togwotee a few times and I really like it there. My favorite snocross track is Lake Geneva.

Describe your riding style: I have a smooth riding style but when the flag drops I'm going for the win!

What's the most-important thing for you to perfect in order to succeed on your next ride/race? Get my mind mentally prepared and keep my fitness level high. Snocross is a physically demanding sport and requires you to be in good shape.

Technically, and at least part of the time, you ride as a job. Do you have time to get out and ride for fun away from the professional side? If so, what do you like to ride and where? I usually don't have much time to ride for fun during the winter. We are traveling pretty much every weekend and practicing during the week. I've been mountain riding a few times with my friends and it was a blast.

Who is your favorite person(s) to go riding with and why? My teammate, James Johnstad. We have a lot of fun together out on the practice track.

Danger, the elements, and more make this sport very dangerous at times. What are you preparing for the most when you go ride? The hardest thing about racing snocross is keeping your fingers warm on really cold days. I wear KLIM gloves to keep my fingers functioning when it's below zero outside!

What's your breakfast of champions? Oatmeal with fresh fruit.

What's your off-season ride? I race motocross in the summer. I also do a lot of mountain biking and road biking.

What's your favorite KLIM gear setup? The Stealth Race Jacket and the Stealth Race Pant.

What's your go-to mid-ride lunch? A turkey sandwich and some fruit.

Have you ever seen Bigfoot or another mythical creature in the snow? Not yet but I'm still searching.

If you could ride anywhere, with anyone in the world, where would it be and who would be with you? I would ride out west in the mountains with a big group of friends. That would be a blast.

TOUGHEST
CONDITIONS. RIDERS. GEAR.

CHRIS OLDS MIKE MORGAN

Rider Name: Chris Olds

Age: 42

Hometown: Eagle River, Alaska

Years riding: 18

Professional discipline: I have competed in all disciplines of riding, but I concentrate my efforts on the Iron Dog Race which is a Cross-Country (long-distance racing).

How many days did you get to ride last season? Not sure, probably 40+, I rode over 6000 miles.

Where's your favorite place/reason to ride? I have a lot of favorites, but Lost Lake always seems to stand out. A big heavy dump of snow and when the sun comes out, it's hard to beat.

Describe your riding style: Quick, conservative, close to the edge, but not over it.

What's the most-important thing for you to perfect in order to succeed on your next ride/race? Getting in riding shape.

Who is your favorite person(s) to go riding with and why? I love to ride with my kids, watching them grow up riding has been a joy. Riding with my Iron Dog teammate Mike Morgan, because he pushes me to be a better rider.

What's the one modification to your machine you can't ride without? It is hard for me to ride a sled with stock suspension settings, I love my Walker Evans Racing shocks!

What's your breakfast of champions? Anything my wife cooks, she is the best.

What's your favorite KLIM gear setup? I love it all!!! But if I have to name a setup I love the versatility of the Valdez Parka and Togwootee Bib. I love not worrying about my gear and knowing I will be comfortable from 50 below to 50 above during the Iron Dog.

What's the weirdest thing you've seen someone take with them on a ride? There was this one guy that had a 5 lb summer sausage with him on the Iron dog race, he was carrying these very large block and tackle setup with enough rigging to pull a 747 jet out of the Grand Canyon.

Have you ever seen Bigfoot or another mythical creature in the snow? Not yet, and I am not counting on it, but I have seen moose, coyote, lynx, wolf, fox, seal and plenty of smaller critters while riding.

RIDER PROFILE

Rider Name: Mike Morgan
Age: 29
Hometown: Nome, Alaska
Years riding: About 25 years or so
Professional discipline: Enduro/Cross Country/Terrain Racing, Irondog

How many days did you get to ride last season? From December to May; about 100+ days

Describe your riding style: Competitive... usually trying to beat the next guy whether it be my teammate in training or another competitor. Although I like to push the pace, I am known to be very consistent and smooth on a sled, making very few mistakes.

What's the most-important thing for you to perfect in order to succeed on your next ride/race? Well, I always like to ensure that my equipment is 100% dialed in for each and every event. I can always assure myself that I will be physically & mentally ready to go; knowing that my sled is ready to go provides additional confidence... after-all, it takes both man & machine to win, right?

Who is your favorite person(s) to go riding with and why? My teammate Chris Olds and I have a blast training & riding together. We push each other in training and communicate very well on the trail. I also loved racing my dad around the country side in my younger years!

What's the one modification to your machine you can't ride without? Adjusting the throttle to my unique position... I ride with my throttle lever pointed almost straight down, which a lot of people don't understand but it helps me in making aggressive moves in the cockpit of the sled.

Danger, the elements, and more make this sport very dangerous at times. what are you preparing for the most when you go ride? Changing & challenging weather conditions... mother nature is something you cannot control and can only predict to a certain point.

What's your breakfast of champions? Steak & Lobster!.. I prefer Oatmeal, some fruit, and a glass of milk the morning of a race event.

What's the most important thing you do to improve your riding/racing performance? Keeping in strong physical shape by eating well and exercising regularly.

What's your favorite KLIM gear setup? I like the new Stealth line, with it's sharp look and unrivaled mobility & ventilation... For the Iron Dog, I prefer the Togwotee Bib in conjunction with the Valdez Parka... there is no other setup on the market that provides the durability, warmth, breathability, & adaptability for the always changing Alaskan weather and terrain that this combo does.

What's your go-to mid-ride lunch? A burger or whatever I threw in my ziplock from last night's dinner!

Have you ever seen Bigfoot or another mythical creature in the snow? I had a bad concussion once upon a time & saw a lot of crazy stuff but I have yet to witness bigfoot out there.

MATT ENTZ

MITCHELL WALKER

CONTEST WINNER
RYAN WALKER

KLIM EXPERIENCE

TICKET TO RIDE

Inside the KLIM Experience Winner's trip of a lifetime.

None of Ryan Walker's riding buddies believed him when he told them he won the KLIM Experience riding trip of a lifetime.

"I kept telling them, 'I just won this KLIM contest and get to go out there for the Jackson Hillclimbs and go riding with the guys from KLIM in the mountains this winter!' But they didn't believe me," Ryan said. "But as soon as they believed they all really wanted to go—but I had to take my brother, it was an easy choice."

By correctly guessing how much weight the Valdez Parka was supporting in the KLIM booth at the Novi, Michigan snow show, he won the Ultimate KLIM Experience—a trip out West to ride big country on big sleds with big names in snowmobile racing, riding and instruction.

It was a trip of firsts for Ryan and his lucky guest/brother Mitchell—raised in the high-speed country of Michigan's sled scene (their families have two performance drag sled shops), these self-proclaimed flat-landers were about to drive world-class mountain terrain with focused instruction and access to the best in the business.

Here's a quick breakdown of their trip: A private tour of KLIM's Idaho facilities, two days of riding in some of the most dynamic stashes of powder-rich country on earth, private riding instruction and mentoring by Matt Entz of Mountain Skillz, riding companions Cole Willford (three-time World Champion Hillclimber), Chris Olds and Mike Morgan (from Alaska's Iron Dog race fame) and a day watching and interacting with all the racers at the World Championship Hillclimb in Jackson.

The KLIM Experience would take the Walker's to the limit, made them go all-in, and pushed them to the edge of their comfort zone. But they came out shining. It's safe to say the trip left a lasting impression.

"I was really impressed with how well the guys progressed in one day of riding," said Matt Entz of Mountain Skillz. "They guys took my advice and learned how to handle these mountain sleds right away, we had two days of great backcountry riding in and we all left sore and happy."

The guys agreed.

"I'm seriously considering buying a mountain sled and making multiple trips out west next year," Ryan said. "After working with Matt for a day, I really enjoyed it. He's a great teacher and puts the techniques into perspective snowmobilers can really understand."

"Before coming out here to visit KLIM, and see where they and their supporting riders ride, I always sort of thought KLIM was just a brand that cost a little more than my old gear. Now, I know the difference KLIM gear makes and I can't believe how great everyone was to us. From KLIM employees to racers getting ready to hit the hill in Jackson, everyone was genuine and ready to help. I'm a KLIM believer for sure now and all my riding buddies are now, too."

OVERSIZED TRIPLE-LAYER FACE FOAM

WICKS MOISTURE AWAY FROM FACE
HIGHLY VENTILATED/BREATHABLE

KLIM®'s Radius Pro Snow Goggle features the most advanced air control system and face foam technology available today. To battle against sweat and steam from obscuring your vision, KLIM® introduces the Air Force Induction (A.F.I.) scoop to ensure maximum airflow and moisture evaporation. The Radius Pro Snow Goggle combined with the advanced technology of the F4 Helmet create an on-the-snow performance package unmatched in the powersports industry.

The KLIM Tactical pant offers the same padded comfort and coverage of the popular KLIM Tactical Short in a full-length riding pant. Now, you can combine a padded comfort short and your lower body base layer into one piece designed to wick moisture away and facilitate maximum breathability. The saddle area features a high-tech triple-density chamois that absorbs riding impacts in the saddle and prolongs the comfort of your ride. PORON® XRD™ Extreme Impact Protection material is embedded in strategic locations to help absorb impacts on your legs, hips and more. You want one pant that does it all? The Tactical pant it is.

- PORON® XRD™ EXTREME IMPACT PROTECTION MATERIAL ON HIP, THIGHS AND OVER TAILBONE
- PADDED COMPRESSION PANT
- SUPER BREATHABLE, MOISTURE-WICKING POLYESTER MATERIAL
- 4-WAY-STRETCH SPANDEX DOWN ENTIRE LEG TO FIT DIFFERENT LEG SIZES AND SHAPES

Say goodbye to the days of chafing and other riding maladies associated with loose-filling riding shorts. The KLIM Tactical Short is designed to keep your equipment stowed properly and to wick moisture away from your skin to ensure maximum possible comfort on your ride. The saddle area is constructed with a high-tech triple-density chamois that will help absorb riding vibrations and cushion your ride. PORON® XRD™ Extreme Impact Protection material is embedded in strategic locations to help absorb impacts. On impact, the PORON® XRD™ high-performance molecules creates a unique protective shield that can repeatedly absorb up to *90% of the most intense force.

- PADDED COMPRESSION SHORT
- PORON® XRD™ EXTREME IMPACT FOAM ON HIP, THIGHS AND TAILBONE
- HIGHLY BREATHABLE MOISTURE-WICKING POLYESTER MAIN BODY MATERIAL
- FOUR-WAY STRETCH SPANDEX DOWN ENTIRE LEG FOR COMPRESSION FIT TO DIFFERENT LEG SIZES AND SHAPES
- ADVANCED PATTERNING FOR ULTIMATE FIT AND COMFORT
- SOFT ELASTIC WAISTBAND
- SUEDE TEXTURE CHAMOIS CROTCH/GROIN AREA
- TAGLESS COMFORT DESIGN

PIEPS DSP PRO

AVALANCHE BEACON

\$374⁹⁹

BLACK

3144-000-000-000

With a smart transmitter that auto-adjusts the sending antenna to give searching beacons the best signal, a huge 60-meter circular range, and mark and scan function for multiple burial scenarios, the PIEPS DSP Pro Avalanche Beacon has all the cutting-edge features pros need.

PIEPS DSP SPORT

AVALANCHE BEACON

\$274⁹⁹

BLACK

3141-000-000-000

The PIEPS DSP Sport Avalanche Beacon is the go-to beacon for the everyday snowmobiling backcountry traveler, offering circular range, a smart transmitter, and three-antenna accuracy in an easy-to-use package.

PIEPS iPROBE ONE

AVALANCHE PROBE

\$184⁹⁹

BLACK

3152-000-000-000

Take the guesswork out of probing with PIEPS iProbe One 260, a lightweight probe with a built-in low range beacon and longer length for snow analysis.

Compatible with any PIEPS avalanche beacon, the iProbe One 260 revolutionizes avalanche search and rescue by building a low range beacon into the probe tip, widening your strike area while providing optical and acoustic feedback to help pinpoint burials. Especially handy in multiple burial scenarios, the iProbe disables found beacons to help aid in the search for the next victim. And of course, the iProbe 260 also functions as a standard probe, with a collapsible, easy to deploy design, wide-cone tip for penetrating avalanche debris, and added length for Rutschblock tests and other snowpack analysis.

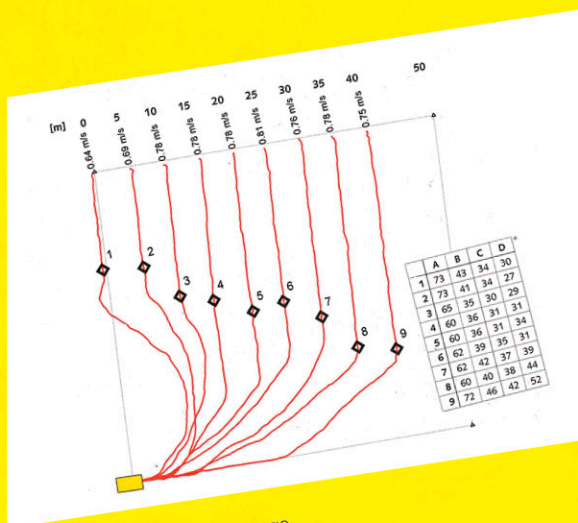

OFF TRAIL: NEVER WITHOUT PIEPS!

In an emergency, only one thing counts: unconditional reliability. No other brand of avalanche beacon out-performs the range and precision of PIEPS brand products.

This high standard comes from product development collaboration with professional mountain guides, mountain rescue teams, instructors and scientists. This vast expertise in development and more than 40 years of in-the-field experience result in the best avalanche safety equipment available to outdoor enthusiasts.

PIEPS offer a larger useful range
than other beacon brands.

BOONDOCKERS 11 DVD \$24⁹⁹

3005-002-000-000

We often hear the question "What is boondocking?" For us, it has come to define a style of riding that is all about getting off the beaten path and exploring remote mountain ranges in search of the perfect snow and terrain. This season we returned to this core principle of Boondockers. We threw out everything we thought we knew about riding areas and set off in pursuit of unknown locations and deep powder. The result was a winter of endless fresh tracks and the most incredible boondocking we have ever captured on film. Intended for audiences of all ages.

WARRANTY

We warrant every product we make to be free of manufacturer defects for the **lifetime of the product. Additionally, all KLIM GORE-TEX® products are GUARANTEED TO KEEP YOU DRY® for the **lifetime of the product. If these products fail due to a manufacturing or material defect, we will repair the product without charge, or replace it at our discretion. This warranty is not transferable.

* **KLIM BOOTS** are warranted against defects in materials and workmanship for one [1] year from the date of purchase. Aggressive running boards will accelerate the wear and tear on the soles of the boots. This is considered normal wear and tear. General warranty terms apply.

* **KLIM F4 HELMET** is warranted against defects in materials and workmanship for five [5] years from the date of purchase. General warranty terms apply.

* **KLIM GOGGLES** are warranted against defects in materials and workmanship for one [1] year from the date of purchase. Scratches and fogging are not covered under this warranty. General warranty terms apply.

**** The lifetime of a product unfortunately does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, cuts, punctures, burns, accidents, improper care, negligence, normal wear-and-tear, modifications, alterations or use for a purpose other than which the product designed will void the lifetime warranty of even if the warranty issue is not related to these damages.**

Should you have a warranty issue, call 1-208-552-7433 for a case number. We will repair if possible or replace all valid warranty items. Please have all warranty item claims clean for evaluation or they will be sent back to you as-is without an inspection being made, or a \$50 cleaning fee may be assessed.

CARE INSTRUCTIONS

GORE-TEX® OUTERWEAR

WASH

Machine-wash warm (104° F/40° C). Powder or liquid detergent. No fabric softener. Follow manufacturer's instructions.

DRY CLEAN

If professionally dry-cleaned, request clear distilled solvent rinse and spray repellent. Follow manufacturer's instructions.

IRON

Steam-iron warm, placing a towel or cloth between the garment and the iron. No need to iron the garment until it is completely dry.

BLEACH

No chlorine bleach. It may damage your garment.

DRY

Tumble-dry warm. The heat from the dryer will help to reactivate the durable water repellent (DWR) treatment on your garment's outer fabric.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect the garment's breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® GLOVES

WASH

Follow the manufacturer's instructions. Machine or hand wash in warm water. Gently squeeze glove from fingertips to wrist to remove excess water.

Do not twist.

DRY CLEAN

Not applicable.

IRON

Do not iron.

BLEACH

No chlorine bleach. It may damage your glove.

DRY

Drip-dry with the fingers facing upwards.

WATER REPELLENT TREATMENT

Gore recommends applying a topical water repellency restorative (DWR treatment) for outdoor fabrics, available at your local outdoor retailer. We do not recommend wash-in treatments as they can affect breathability.

STAIN REMOVAL

Use a pre-wash treatment such as Shout® or Spray 'n Wash®, following its manufacturer's instructions. Rinse well.

GORE-TEX® FOOTWEAR

WASH

Clean the exterior with a cloth or brush and lukewarm water. The manufacturer may recommend leather treatment or preservation. Shake out sand, gravel, and dirt from inside the footwear. Remove and shake out the foot bed if applicable.

DRY CLEAN

Not applicable.

IRON

Not applicable.

BLEACH

No chlorine bleach. It may damage your footwear.

DRY

Dry naturally at moderate temperatures. Avoid direct heat. Convection-style boot driers work well.

WATER REPELLENT TREATMENT

We do not recommend the use of waterproofing waxes or greases as they can affect the footwear's breathability. Apply only treatments, polishes, conditioners, and dressings recommended by the manufacturer.

STAIN REMOVAL

Follow the footwear manufacturer's instructions.

TEK VEST

Do not machine wash or dry clean as it will result in an unstable load. Hand wash is the safest. Use mild soap products. Consider using shower wand to spray clean and then let it drip dry. All Tekvest models are fabricated from 100% synthetic materials. Clean Pro-Lite plastic with Toluol or 100% alcohol or equivalent. Dry plastic surface prior to decal application. The use of strong solvents on the plastic may reduce surface adhesion.

SIZING

Note: For all measuring use a flexible measuring tape.

How to Measure:
To select glove size; measure around your dominate palm at the widest point.

5" - 7"	XS
7" - 8"	S
8" - 9"	M
9" - 10"	L
10" - 11"	XL
11" - 12"	2XL
12" - 13"	3XL

Head:
Measure circumference of head just above top of ears, and 1" above eyebrows.

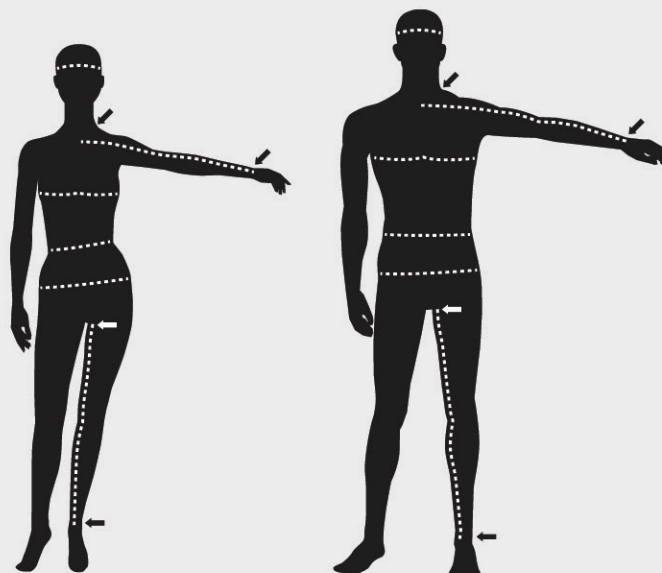

Chest:
Measure under arms around the fullest part of the chest. Be sure to keep tape level across back and comfortably loose.

Waist:
Measure around natural waist with a loose tape.

Inseam:
Without shoes; measure on inside of leg, from crotch to the floor.

Hip / Seat:
Place the measuring tape around the body at the fullest part of the lower hip, feet together.

Sleeve:
With your arm fully extended, measure from the center back of neck at spine to the wrist bone.
