F3 SERIES

\$299⁹⁹

KLIM's F3 Off-Road helmet is a most-valuable riding partner. Composite shell construction means the F3 can be strong and lightweight in a modern, sleek design. Structure Mapped Composite construction, a new complete comfort liner system, intelligent ventilation and KLIM legendary quality combine in the new F3.

· **MAXIMIZE THE MINIMUM** - The F3 is engineered to minimize neck fatigue and maximize impact protection.

· **BUILT STRONG** - KLIM's all-new F3 starts a light and strong revolution in off-road style helmets. Constructed with KLIM's Structure Mapped Composite base material lay up, the F3 optimizes strength in all the right areas while reducing overall weight.

· **REFINED FIT** - KLIM took old helmet technology and tossed it. With the new F3, riders enjoy up to 10% smaller external dimensions and a sleeker, more comfortable fit from three shell sizes.

· **LET OFF SOME STEAM** - KLIM is the industry leader in body comfort, and developing an effective intelligent ventilation system for the F3 was key. Thirteen intake vents combine with six exhaust ports to provide optimal heat dispersion even while stationary.

· **WIDE OPEN SPACES** - The KLIM F3 Helmet features the widest, unobstructed field of view in its class, ensuring you'll never miss the epic views it takes you to.

· **ALL-DAY COMFORT** - The KLIM F3 features the latest Custom EPS and internal liner systems to secure the rider's head completely. EPS, 3D Ergonomic cheek pads and liner foam are optimized for a great fit.

· **SYSTEMS CHECK** - KLIM engineered the new F3 to work in conjunction with market leading neck brace technology, not against it.

· **EXPECTATIONS** - Thanks to innovative construction techniques and premium materials, the KLIM F3 meets or exceeds the most demanding ECE and DOT standards for motorcycle helmets at reduced weight

· **KLIM CUSTOM FIT** - Klimatek™ Fabric liner systems utilize adaptive smart foam technology and anti-microbial/ bacterial fast-wicking textiles.

OCULUS

SNOW GOGGLE

The KLIM® Oculus Goggle is designed with one purpose in mind: to give you the best possible vision on the snow.

This was accomplished by addressing the three main pain points of all goggles: changing light conditions, fogging and field of vision.

The Oculus system with KLIM® Slide-Lock™ technology allows you to quickly and easily change lenses in the field to deal with changing light conditions - essentially it's like having [up to] three goggles with you in a very compact package. The included heat-formed case allows you to carry an [included] extra lens plus one upgrade lens [not included] with you on your next ride. The Oculus is engineered with the latest anti-fogging technologies such as unparalleled air circulation, massive internal air volume and the KLIM® CLEAR™ anti-fog technology. The spherical, optically correct lens design provides unprecedented peripheral vision and clarity.

RADIUS

KLIM has developed the most advanced snowmobile goggle in the world. The Radius Goggle is completely revolutionary and is the result of tirelessly sourcing technical solutions to pain points riders can encounter every day they ride.

KLIM defined the superiority of the Radius Goggle by setting uncompromised goals in the following performance categories at the project's inception four years ago: fog proofing, field of vision, lens durability, ventilation and comfort.

The result is a Radius Goggle that exceeds all expectations and is truly the new standard in winter optical performance.

COOLING BASE LAYERS

COOL
BASE

KLIM's Aggressor Cool -1.0 Base Layers provide a level of cooling and comfort never before seen in the power sports industry. Coolcore's™ patented chemical-free cooling, moisture-wicking, moisture transportation and cool evaporation fabrics used in these base layers are exactly what you need to keep cool and maximize performance. Unlike other cooling and sweat-wicking fabrics that rely on chemicals or polymer crystal treatments that degrade over time, KLIM's Aggressor Cool fabrics will deliver consistent cooling and wicking performance throughout the lifetime of the garment. When high performance athletes demand high performance cooling and comfort, they go to KLIM's Aggressor Cool -1.0 base layers.

This pant is extremely comfortable, looks great, and holds up to anything you can throw at it. Light insulation via soft brushed micro-fleece lining provides an amazing soft feel next to skin and also wicks moisture away from your body.

It was designed to be a perfect mid-layer, but is also designed to be stylish so you're not embarrassed to reveal your mid-layers post-ride when you remove your GORE-TEX® layers. Not only will you not be embarrassed to wear your new mid-layer after the ride, but you'll want to wear them everywhere.

ALLURE MITTEN

\$99⁹⁹

Winter riding is unpredictable. Prepare for the unknown with the KLIM® Allure Mitten. Fingers can get cold and in extreme cases, even be frostbitten. Designed to create a method of re-warming cold fingers and abate frostbite. Keep in your kit for emergencies, for when the weather gets bitterly cold or for an extremely comfortable and warm everyday winter glove. Add a KLIM® Glove Liner to the mix and you have an unbeatable combination for the ultimate hand warmth on the snow. Mittens are also compatible with hand warmers.

KODIAK BAG

\$249⁹⁹

The Kodiak Bag offers maximum cargo capacity and an intelligent compartmentalized design. From the outside-in, the Kodiak's structural stoutness and weight-distributing design will easily contain all the gear you could ever possibly need. Independent boot, helmet and goggle compartments, cavernous cargo bays and numerous smaller stash and zippered pockets combine to create the ultimate full-size rolling gear bag.

TEAM GEAR BAG

\$125⁹⁹

KLIM®'s Team Gear Bag takes payload to a whole new level. Its superior capacity compartment system features four zones of intense storage: a deep boot compartment, huge center main gear compartment, soft-lined helmet pocket and quick-access external accessory pockets. Even when fully loaded (if you can find enough gear!), the Team Gear Bag remains easy to lift and carry thanks to an ingenious auto compression padded shoulder strap system and sleek, flush-grab side and end handles. Fill it, if you dare!

AVALANCHE GEAR

The PIEPS JETFORCE is the first electronic avalanche airbag with jet-fan technology that only needs ambient air for inflation. JETFORCE is the result of the collaboration between PIEPS and Black Diamond, two leading innovators in snow safety.

AUTOMATIC SELF-DIAGNOSIS - The integrated PIEPS electronics perform a system check on every startup and additional checks while armed. LEDs indicate the system status.

JET-FAN - The battery-powered jet-fan inflates the extremely resistant 200 airbag in 3 seconds.

MULTIPLE DEPLOYMENTS - The travel-friendly and compact Lithium-ion -battery supports 4 or more deployments per charge.

USER PRACTICE - The airbag is easy to inflate and repack for several deployments or for practice. Intuitive handling. Zero cost.

AUTOMATIC DEFLATION - The airbag automatically deflates after 3 minutes. In case of emergency the pressure on the buried person is reduced and the evolved 200 l air pocket ensures oxygen supply. Therefore the chance of survival is rising.

HIGH PERFORMANCE BATTERY FOR EXTREME TEMPERATURES - The newest and intelligent battery-technology is specially designed and certified for extreme minus temperature (-30°C). Maximum performance and long lifetime.

HEAD:
Measure circumference of head just above top of ears and eyebrows.

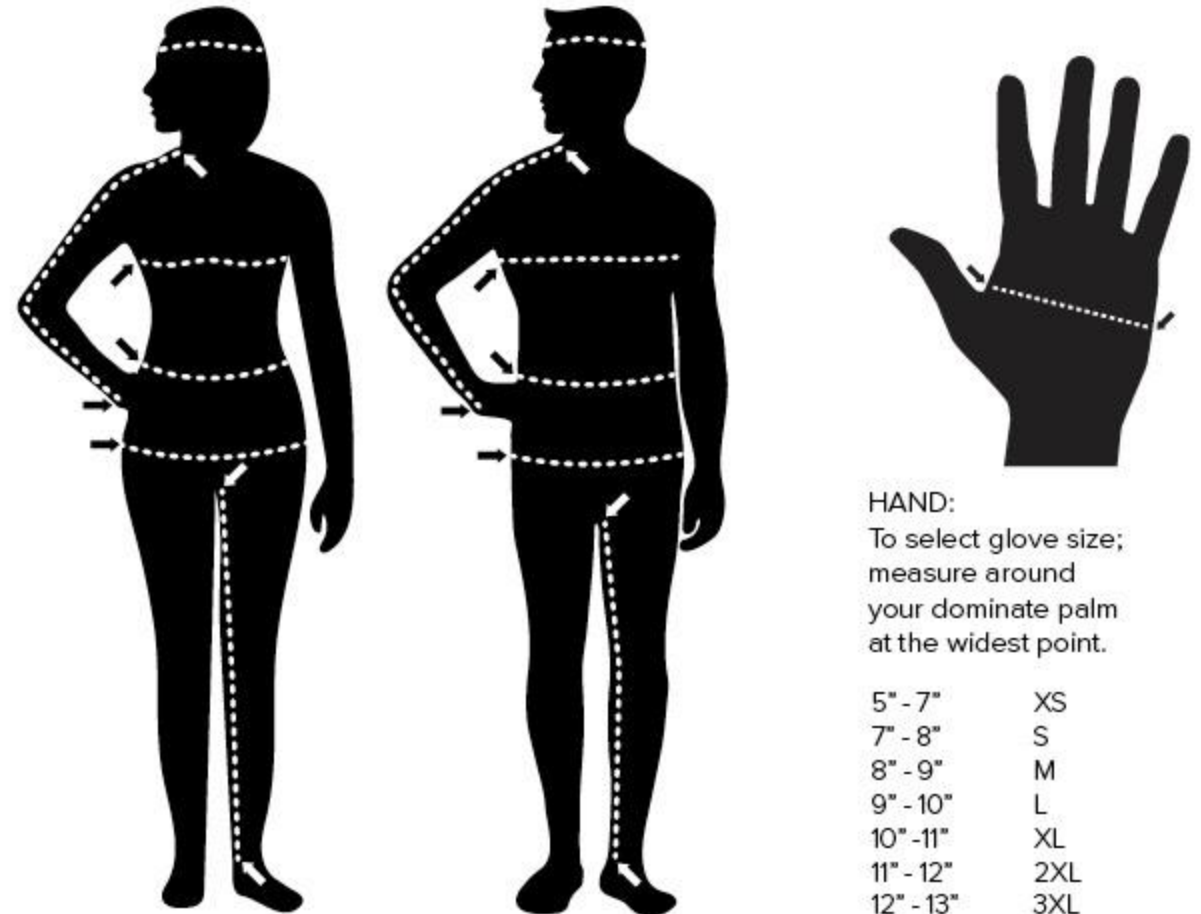

CHEST:
Measure under arms, around the fullest part of the chest. Keep tape level across back, comfortably loose.

WAIST:
Measure around natural waist with a loose tape.

INSEAM:
Without shoes; measure inside of leg, from groin to the floor.

HIP/SEAT:
Measure around the body at the fullest part of the lower hip, feet together.

SLEEVE:
With arm fully-extended, measure center back of neck at spine to the wrist bone.

Note: For all measuring use a flexible measuring tape.

HAND:
To select glove size; measure around your dominate palm at the widest point.
