ENGINEERED APPAREL

# RIDING GEAR BORN OF A HIGHER STANDARD.

**INTRODUCING OUR MOST ADVANCED RIDING GEAR EVER!**

It represents years of experience as riders and technical developers that was infused into making an all new lineup of high-performance technical outerwear. Advanced material science is applied to deliver riding gear that will improve your ride. Through our rigorous design and testing process, TECH54™ was born—a new, high-performance membrane featured inside every jacket and bib that offers more waterproof breathability than any other construction and material combination we've developed to date.

## DESIGNED

Modern riders demand stylish gear that's fit for the ride and performs in ever-changing elements. Our product designers skillfully use the best components and materials to develop riding gear that performs to your highest standards.

## PROVEN

Polaris Engineered Apparel™ is proven in our advanced development lab and thoroughly tested by the hardest-riding people on the trails and in the backcountry—our team of expert riders, engineers and pro riders.

### SUPERIOR DWR COATING

Superior Durable Water Repellency (DWR) prevents precipitation from saturating the exterior of all outerwear pieces.

### TECH54™ WATERPROOF BREATHABLE

A waterproof and breathable membrane is bonded to the shell fabric to block moisture from entering while allowing vapor moisture to escape from the inside—keeping you dry in both directions.

## INTRODUCING

# TECH54™

## BORN FROM EXPERIENCE.

Since 1954, Polaris® has been at the forefront of developing newer, better snowmobile technology. As sleds become lighter and faster, and we as consumers become more technical, our apparel must evolve to exceed the demands of today's riders and perform better than ever before. That's why we designed TECH54™. Born in our technical Center of Excellence, engineers and riders worked in close collaboration to prototype, test and develop a material that would be comfortable, waterproof and breathable to meet the unique demands of every rider. The result is apparel that delivers everything riders need and nothing that they don't.

## HOW IT WORKS TO ELEVATE YOUR RIDE.

### 5k/5k OR 10k/10k

#### WATERPROOF

The first number (5k or 10k) refers to the waterproof rating.

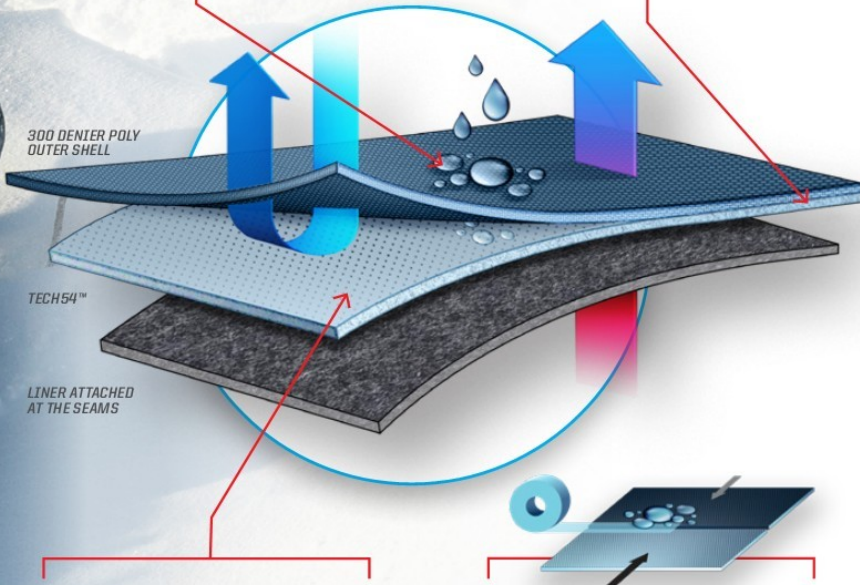

#### BREATHABILITY

The second number (5k or 10k) refers to how much water vapor the material can expel through the jacket to release heat—and keep you dry from the inside.

#### DIFFERENT RATINGS FOR DIFFERENT RIDES

Products with a TECH54™ 10k/10k rating are designed for our most active riders, while riding gear with a TECH54™ 5k/5k rating is ideal for less active riding. Make your choice based on how hard you exert yourself while riding, or the type of riding you most consistently do.

**TECH54™ IS FEATURED IN EVERY POLARIS® JACKET & BIB.**

### 5k/5k 10k/10k RATING

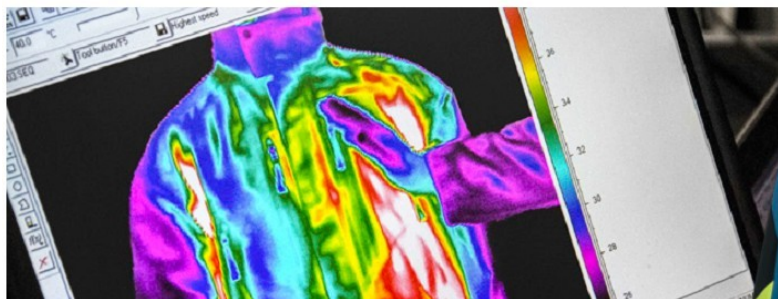

Different levels of waterproof breathability tailored for different riding styles.

### CRITICALLY TAPED SEAMS

Internally taped seams fully block precipitation while retaining breathability.

## TRUSTED

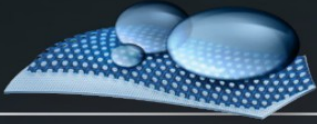

Nobody knows the ride like us. The result of our collaborative design process is a Polaris Engineered™ advantage that lives inside every piece of riding technical gear and accessory we make. Because trust is earned on the snow, where we are at our best.

# OUR MOST EVOLVED RIDING APPAREL EVER.

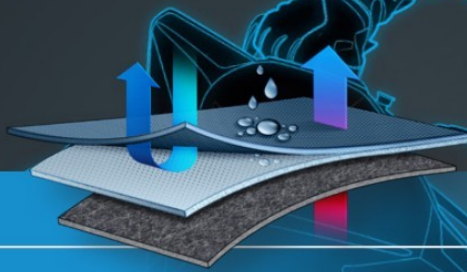

As riders and snowmobile experts, we know the difference quality apparel makes while riding. Our apparel features the best combination of class-leading technologies that have been continuously tested and refined. Keeping you dry, warm and comfortable in every riding condition is our quality promise to every rider wearing the Polaris® name.

**DWR**

## RESIST MOISTURE

Every Polaris® jacket and bib is treated with a superior-rated DWR (Durable Water Repellent) coating to prevent precipitation from saturating the outer fabric, so your gear doesn't get soggy. The DWR coating causes water to bead up and run off, keeping you comfortable and dry.

**TECH54**

## WATERPROOF/BREATHABLE

TECH54™ is our single-layer bonded laminate technology that brings waterproof breathability and riding comfort to a new level in every Polaris® jacket and bib.

**YKK®  
ZIPPERS**

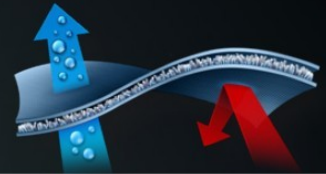

## LAST LONGER

The most trusted name in the industry. Quality construction that doesn't fail.

**509 FOR  
POLARIS®**

## SUPERIOR PROTECTION

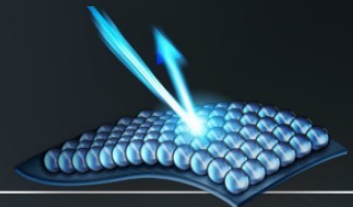

A trusted name in helmet and goggle manufacturing, 509® helmets utilize advanced materials like carbon fiber for lightweight protection.

**3M  
Thinsulate®  
INSULATION**

## BE WARMER

3M® Thinsulate® Insulation is zonally mapped on insulated apparel to provide extra insulation in high wind exposure areas.

**3M Scotchlite®  
Reflective Material**

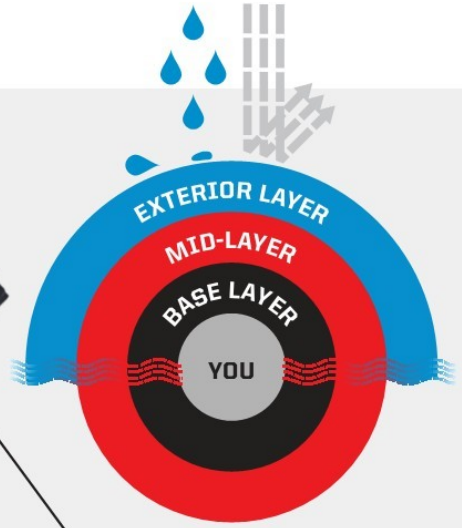

## RIDE SAFER

Proven in every weather condition, patented 3M® Scotchlite® Reflective Material is placed meticulously on each garment and nighttime tested to ensure rider safety and visibility from every angle.

# LAYERING 101

Polaris® brand outerwear is designed to work together as a smart solution that integrates multiple layers for ultimate performance. We offer a range of innovative products that are designed to deliver comfort, warmth and mobility for every riding style.

**BASE LAYER**

Rests against your skin to regulate your overall temperature by wicking away moisture. Must be light, quick-drying and quick-wicking.

**MID-LAYER**

Works to pull moisture away while keeping body heat near your skin. Usually a mid-weight layer followed by an outerwear jacket.

**EXTERIOR LAYER**

Retains inner warmth, prevents external cold from entering and regulates body temperature by venting moisture and blocking out wind, snow and water.

## GET THE PERFECT FIT

### MEASURE

Measure the circumference here for the proper fit. Make sure the inner lining fits snugly around your head without causing pain.

### MOVEMENT

Move the helmet side to side. Your scalp should move with it.

### CHINSTRAP

Check with your finger. If properly fit, your finger shouldn't fit between your chin and the strap.

# CARBIDE WEAR STRIPS

Carbides need to be sharpened or replaced periodically due to normal wear and use. Rocks, cement, pavement, and road crossings all contribute to carbide wear.

3" - 4" CARBIDE

- Perfect for sleds with a 121" track with 96 studs or less or sleds with 1" lugs taking corners at moderate speeds.

6" CARBIDE

- Ideal for sleds in the 136" track range with up to 1 1/4" lugs or shorter track sleds with more than 96 studs.

8" CARBIDE

- Best for ultimate performance sleds with a 144" track or longer with paddles and/or the maximum amount of studs.

## FIND YOUR PERFECT SIGHTLINE

Blend protection and style with the windshield built just for the type of riding you do most.

### TALL

The choice when you want maximum wind protection. Perfect for riders who ride in colder conditions often.

### MID

The best of both worlds: a clean look for your sled that also offers wind protection for colder days.

### LOW

For a sleek, clean look on your sled. Does not affect vision in any way. Great for riders who stand up most of the time.

 ENHANCE YOUR  
 SNOWMOBILING  
 EXPERIENCE**

Pair your P.I.D.D. with the revolutionary Ride Command® app and enhance your snowmobiling experience by connecting with your friends and your sled. Ride Command®, when paired with a P.I.D.D., allows you to plan rides and coordinate with friends before, during, and after your ride. Also, get quick-glance access to critical snowmobile diagnostic info and GPS navigation. It enhances the features of your P.I.D.D. and allows you to get even more from your ride.

# P.I.D.D.

**POLARIS® INTERACTIVE  
 DIGITAL DISPLAY (P.I.D.D.)**

- Bright, easy-to-read 11 cm full-color LCD screen
- GPS Course Up or North Up option
- GPS Go-to function with distance on map screen
- Exporting capabilities for trip data from the display to USB drive
- TPS, RPM, and ground speed playback for snowmobile tuning, including clutch calibration
- Real-time gauge with speed, RPM, and average MPG

## DON'T HAVE AN ELECTRIC START?

FOR A BETTER EXPERIENCE WITHOUT ELECTRIC START, INSTALL THE P.I.D.D. POWER UP KIT

- ADVANTAGES INCLUDE:**
- Maintain GPS lock when you start your sled back up (Without battery kit, satellite will need to relocate, which can take up to 30 seconds while moving)
  - Display will not shut down and reboot every time your sled is shut off
  - Display has ability to run while sled is turned off, which allows you to use the screen while stopped

## UNDERCOVER

- Made to go under Polaris® snow covers to provide an additional level of protection
- Soft fabric helps to minimize cosmetic damage caused by chafing
- Easy to install and remove
- Works well as a dust cover when machine is stored inside
- The undercover is separate from the cover, which allows it to be kept clean by machine washing. We recommend using a washing machine bag to contain the elastic and hooks
- Air dry

## CONVERTIBLE COVERS

- Expandable zippered areas allow for multiple accessory configurations with a single cover
- Our most rugged snowmobile cover for the most demanding applications
- High-quality canvas fabric and form-fitting design is ideal for towing or storage

# THE 4 KEYS TO TRACK SELECTION

## LENGTH

The inside circumference of the track is calculated as the drive pitch multiplied by the number of track segments. It must be correct to the nearest inch for proper fit without additional modifications to the skid frame.

## DRIVE PITCH

The drive cog center distance around the circumference of the cogs on the drive axle. It must match the existing track or the drive cogs must be changed.

- 2.52" drive pitch primarily machines manufactured before 2007
- 2.86" drive pitch especially on recent models manufactured after 2007
- 3" and new 3.5" drive pitch for lowest weight on select mountain sleds

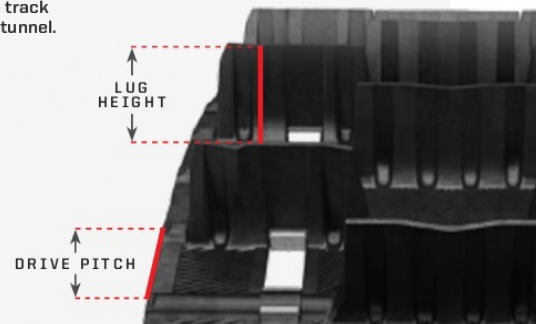

## WIDTH

The measurement across the track governed by the width of the tunnel.

## LUG HEIGHT

The distance lugs extend above the track surface.

- Trail: 1" - <1.5"
- On/Off Trail: 1.5" - <2"
- Deep Snow: 2" and greater

## TRAIL

**ICE STORM 150**

- Two-height lug design offers deep snow flotation with handlebar-gripping acceleration
- Factory pre-studded for improved traction and control on icy conditions
- 1.25" outer lugs and 1.5" cup-shaped center lugs provide power and traction on packed trails and turns

LENGTH	PITCH	LUG HEIGHT	
120"	2.86"	1.25"	2839388
129"	2.86"	1.25"	2839389
137"	2.86"	1.25"	2839390
146"	2.86"	1.25"	2839391

**HURRICANE**

- Designed based on mountain tracks, it provides off-trail performance in deep snow while maintaining on-trail agility
- 1.75" cupped profile design provides unparalleled grip in the backcountry
- 1.75" tall lug profile design reduces vibration, applying more power to the ground

LENGTH	PITCH	LUG HEIGHT	
120"	2.86"	1.75"	2839400
129"	2.86"	1.75"	2839401
137"	2.86"	1.75"	2839402
146"	2.86"	1.75"	2839403

**COBRA**

- Cupped lugs for superior acceleration and braking in loose, soft snow conditions
- Flexible lug design for superior off-trail performance

LENGTH	PITCH	LUG HEIGHT	
120"	2.86"	1.352"	2839284

155"	2.86"	1.5"	5415826
155"	2.86"	1.8"	5416020

**STORM 150**

- 1.25" outer lugs provide power through the tightest turns with ease, maintaining momentum and rider control
- 1.5" cup-shaped center lugs provide deep snow flotation, and gut-wrenching acceleration on packed trails
- Optimized support columns provide the right balance of lug rigidity and flex for performance across the entire power band

LENGTH	PITCH	LUG HEIGHT	
120"	2.86"	1.25"/1.5"	2839368

# FOR THE LIFE OF YOUR RIDE

## DRIVE BELTS

Polaris Engineered® belts deliver unmatched performance for your snowmobile. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

### BREAK-IN PERIOD

The break-in period for a new belt is . During this time, vary at moderate speeds while avoiding wide open throttle.

## EXIDE BATTERY CHARGER 220V

• Battery charger EXIDE, for LEAD/AGM 12V Batteries 4Ah to 150Ah.

**E261910**  
EXIDE BATTERY CHARGER 12V-4A, FITS BATTERIES UP TO 85AH

**E261920**  
EXIDE BATTERY CHARGER 12V-7A, FITS BATTERIES UP TO 150AH

## SPARK PLUGS

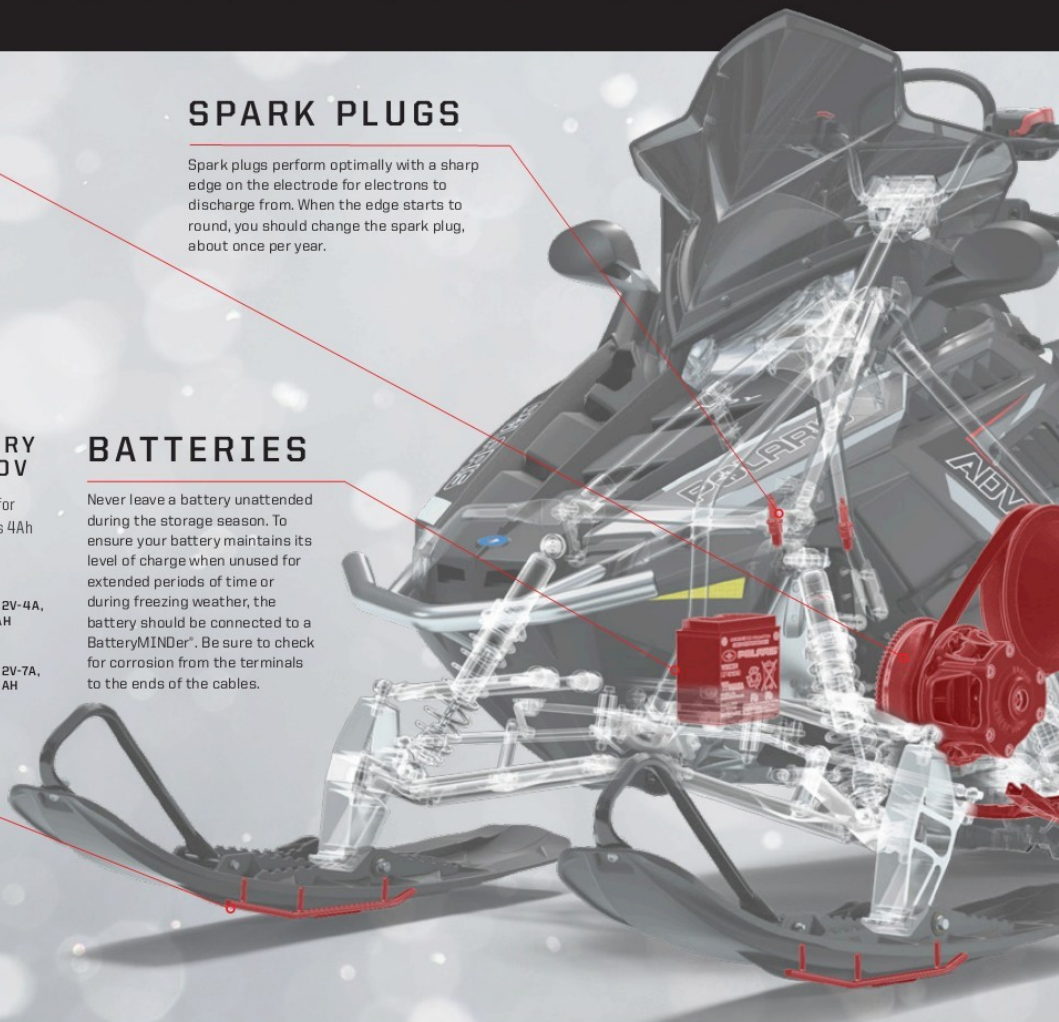

Spark plugs perform optimally with a sharp edge on the electrode for electrons to discharge from. When the edge starts to round, you should change the spark plug, about once per year.

## BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER®. Be sure to check for corrosion from the terminals to the ends of the cables.

## CARBIDES

Worn skis, skags or carbides will adversely affect handling. Inspect your carbides for bends in the host bar (which can cause wandering), sharp edges, chips or cracks (which cause darting), and blunt/square edges that may cause catch hazards. Replace your carbides when you detect any of these conditions.

\*Belt dimensions are given in nominal dimensions. There is a +/- variance for all critical dimensions. Clutch setup must be inspected when a new belt is installed and should be adjusted if necessary. The drive belt is an important component in the CVT system. In order to achieve maximum efficiency from the converter, drive belt deflection (tension), clutch offset, and alignment must be adjusted properly. See your Service Manual for further details on drive belt measurement inspection.

## POLARIS ENGINEERED™ DRIVE BELTS

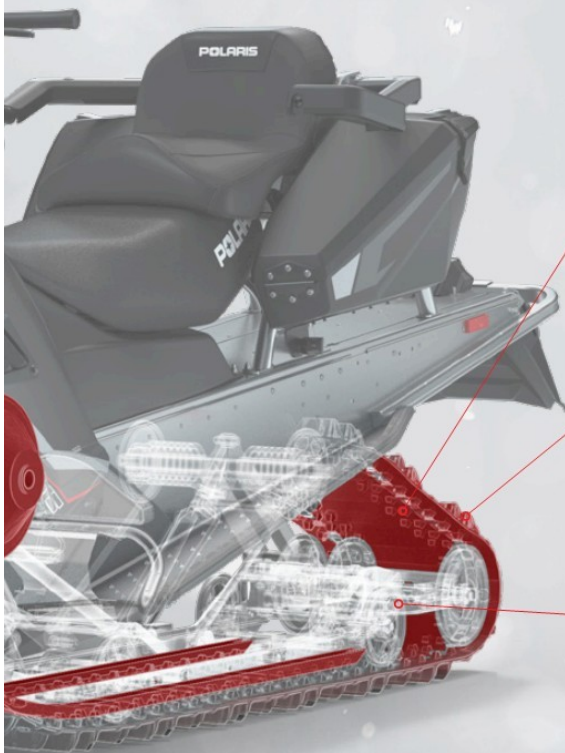

### OUR INVESTMENT

- 32,187 kilometers of field testing
- Thousands of dyno hours
- 18+ months of development (3,000+ design hours) per belt
- 1200+ vehicle validation hours
- Collaboration with powertrain & clutch engineers

### YOUR ADVANTAGE

- No clutch recalibration
- Less wear & tear due to heat
- Ensure maximum performance of your vehicle
- More time out riding, less time wrenching

Maintenance is the key to keeping your Polaris® snowmobile performing at its peak. Items like belts, lubricants, and batteries represent only a few of these critical items engineered specifically by Polaris.

## TRACKS

Tracks are your key connection to the snow. Through use, they can accrue damage and wear out. Tracks should be checked regularly for weathering and dry-rotting and replaced immediately if damage is found.

## STUDS

Studs can bend, break, or pull through a track with extended, hard riding. Inspect your tracks regularly and replace studs as they wear down. If the track is torn around the stud hole, the track may need replacing.

## RAIL SLIDERS

Rail sliders wear out over time in normal riding conditions. Check the wear line on your rail to see if it needs replacing. They should typically be replaced once a year.

**TIPS:** Operating the vehicle immediately after cold starting could cause engine damage. Allow the engine to warm up for several minutes before operating the vehicle. If cold drive away is attempted, the engine RPM may stumble slightly to protect the engine.

## OIL FOR EVERY SLED, PROVEN IN THE TOUGHEST RACE.

When you're flying across 3,219 kilometers of Alaskan tundra, racing riders and the bitter winter wind to seize your immortal moment, you need equipment you can count on. Iron Dog® snowmobile riders count on Polaris Engineered Oils & Lubricants™ to withstand sub-zero temperatures, mountain ranges, and rock hard wind drifts at high speed over a grueling 35 hours.

They know Polaris® Engineers rigorously test every fluid before it earns the Polaris Engineered Lubricants™ badge and a spot on the shelf. So inside and out, their sled will be just as strong as their will to win. Whether you're racing across the Alaskan wilderness or just casually riding on a trail, you can be confident there's no better oil for your sled than Polaris Engineered Oils & Lubricants™.

### VES

Low-odor, low-smoke oil formulation designed to improve exhaust valve performance. VES offers maximum engine protection.

#### OUR FORMULATION

- Synthetic Performance formula
- Proprietary anti-wear, corrosion and detergency additive package
- Retains film on critical engine parts after hot shutdown

#### YOUR ADVANTAGE

- Engineering approved for use across all snow engine platforms
- Cleaner burning resulting in extended life of cylinders, pistons, rings & bearings
- Protects engine during periods of non-use or storage
- Reduces pull effort by leaving components lubricated

### NEW

### VES EXTREME

Engineered, formulated and tested to easily handle the high demands of today's high-performance Polaris® snowmobile engines.

#### OUR FORMULATION

- Full synthetic, 100% PAO and Ester formula
- Highest engine film strength and lubricity protection
- Optimized mixture of heavy and light viscosity base oils and solvents
- Proprietary anti-wear, corrosion and detergency additive package

#### YOUR ADVANTAGE

- Best engine wear protection available for 2-cycle snowmobile engines on the market
- Maintains like-new HP performance throughout engine lifecycle
- Enhanced oil to ensure pins, bearings and all metal-on-metal components are protected
- Highest detergency available for ring lands, undercrown and exhaust valves

ENGINEERED LUBRICANTS

## FOR THE LIFE OF YOUR RIDE, ONLY THE BEST WILL DO.

In the continued pursuit of creating the best oil on snow, we invest in rigorous testing to ensure our oil delivers unrivaled consistency and performance. The result are Polaris Engineered Lubricants™ that are tested and perfected to deliver excellent total engine protection for the life of your ride.

*Oil and cleaners featured are for EU distribution only. For other availability, contact your local dealer.*

### WHAT COUNTS IN OIL TESTING:

1. Does it protect the engine at low temperatures?
2. Does it protect the engine from high heat wear?
3. Does it keep the engine clean?

### PISTON CHECKPOINTS

**PISTON DOME:** Is it clean? Clean burning oil and our proprietary detergency system prevents carbon buildup and hot spots, which extends piston life and maintains optimal run quality.

**PISTON RINGS AND RING LANDS:** Are they free of carbon deposits and soot? This is important to preserve ring seal and maximum power output.

**PISTON PINS AND NEEDLE BEARINGS:** Proper viscosity and lubricity, film strength and our proprietary additives provide exceptional protection and heat control, maintaining proper pin and bearing tolerances and performance.

**PISTON SKIRT:** Is the Grafal coating scratched or visibly damaged? Harsh contact between the cylinder and piston due to insufficient lubrication would eventually result in engine failure.

**WE TRUST POLARIS VES OIL IN THE EXTREME 2,000 MILE (3,219 KM) IRON DOG EVENT BECAUSE AMONG ALL THE ISSUES WE FACE, IT'S ONE LESS THING WE HAVE TO WORRY ABOUT.**

- MIKE MORGAN, IRON DOG RACER

## POLARIS® BLUE

Synthetic Blend engine oil specially formulated for excellent protection and performance in all 2-cycle injector or pre-mix non-VES applications.

### OUR FORMULATION

- Synthetic Blend formula
- High lubricity
- Proprietary corrosion additive package

### YOUR ADVANTAGE

- Excellent cold flow for easier starting down to -70°F (-40° C)
- Prevents rust and corrosion, ring sticking and plug fouling
- Lower total cost of ownership including extending the life of the engine

# ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from anti-freeze to brake fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

## CARBON CLEAN

Polaris® Carbon Clean prevents ethanol corrosion, stabilizes fuel, and cleans carburetor jets and fuel injector nozzles, deposits on piston and rings, intake systems, and combustion chambers. Antioxidants preserve fuel and prevent fuel system gumming.

125 ml | 502528

## DOT 4 BRAKE FLUID

Polaris® DOT 4 Brake Fluid is designed for use in Polaris® hydraulic brakes. Superior high-temp characteristics plus anti-corrosion additives extend the life of brake system components.

250 ml | 502526

## SYNTHETIC CHAINCASE LUBE

Unlike typical gear case oils, SCL's unique viscosity range allows instant flow and film protection in extreme cold or high heat environments.

1L | 502560  
25L | 502561  
201L | 502562

## OIL

Polaris® Blue, VES, and VES Extreme 2-cycle oils are tested to perform, and are the only oils developed specifically for your Polaris® snowmobile engine. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

2-Cycle oils Part numbers. See previous page.

## ANTI-FREEZE

Polaris® Extended Life Anti-Freeze contains organic acid technologies to prevent corrosion on metal components, eliminate scaling, and maximize cooling system performance.

1L | 502566  
25L | 502567  
206L | 502568

## ALL-SEASON GREASE

Polaris® All-Season Grease is designed to maintain consistency across a wide range of temperatures. Engineered to protect front and rear suspension components, steering bushings, and driveline bearings.

400 gr | 502538  
185 kg | 502539

## FUEL STABILIZER

- Advanced Fuel Treatment prevents ethanol corrosion and stabilizes fuel for up to 2 years. Dual-antioxidant formula protects against gum and varnish for easy starting

Our engineers at Polaris® create snowmobile parts that push the limits of weight versus strength. We build our parts to feel lighter without sacrificing strength and durability. But over time, your sled will eventually need some service. When we're engineering our high-performance components, we keep serviceability in mind. From a quick clutch inspection to a ski alignment, we build our products as a system, so that anyone with the right tools and training can easily maintain their vehicle from their own garage—and get back on the trails where your snowmobile belongs.
