PRO ARMOR® DUAL-THREAT

Engineered with dual-compound technology and radial construction to offer revolutionary off-road performance in all terrains. The lateral-grip compound on the outer edges of the tire has a softer durometer rubber for cornering performance and superior grip. The long-wearing compound in the middle of the tire has harder durometer rubber for increased traction during acceleration, straight line stability, and overall longer tread life.

ALL-TERRAIN TRACTION

It's tough to make Sportsman® and Polaris ACE® even more versatile than they already are. But with a set of Prospector Pro® Tracks, you'll do just that. Tread through deep snow without concern.

Polaris®-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improve top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

Polaris® Exclusive optimized hub geometry that minimizes feedback and eases steering effort

SPECIFIC NEEDS, ***SPECIFIC OILS***

Polaris invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must spec an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

POLARIS® PS-4 VS THE COMPETITION

Polaris PS-4 oils exceed the latest industry protection standard as set by the API, while the competition uses standards from years ago. Our proprietary additives clean and protect critical engine parts under high operating temperatures.

When tested against competitive oils, camshaft bearing races and lobes exhibit less wear when protected by Polaris PS-4 oil.

PS-4 delivers 25% stronger viscosity protection for gears, pistons, cams and bearings vs. 40wt. oils

WHY VISCOSITY MATTERS: Polaris engines are designed to operate using oils rated at a specific viscosity. Viscosity is the measure of an oil's resistance to flow and shear and a way to gauge an oil's "film strength", which is a critical component in preserving engine life when an oil is subject to high heat or heavy loads.

PS-4
RACE PROVEN
PERFORMANCE

"The Baja 1000 is probably the toughest race in the world! In the brutal Baja desert there are so many things that can ruin your race it is great to know that Polaris Engineered™ Lubricants will never let us down.

We trust in the Polaris® products like the PS-4 motor oil to protect our machines vitals, they are a critical part of a winning formula."

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris fluids—from anti-freeze to brake fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

DOT 4 BRAKE FLUID

Polaris DOT 4 Brake Fluid is a high-quality brake fluid designed for use in Polaris hydraulic brakes. Superior high-temp characteristics plus anti-corrosive additives extend the life of brake system components and provide consistent, positive braking.

- » 250 mL • 502081

ANTI-FREEZE

Polaris Extended Life Coolant contains organic acid technologies to prevent corrosion on metal components, eliminate scaling, and maximize cooling system performance.

HOW TO INSTALL

Remove wheel and axle nut

Remove brake caliper, hub, tie rod, & upper & lower ball joints

Remove old boot & clean joint

Spread silicone lube on entire cone tool. Slide boot over cone tool, large end first. See package for outer boot instructions.

Empty the bag of grease into the CV joint/boot, clean sealing points & install clamps

Reassemble tie rod, ball joints, brake caliper, axle nut, tire & wheel

Refer to your owner's manual for further instructions and torque specifications.

*Designed for temporary CV boot repair. Purchase the OEM CV Boot for a permanent repair.

FOR THE LIFE OF YOUR RIDE

BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER®. Be sure to check for corrosion from the terminals to the ends of the cables.

BRAKE PADS

Check your brakes if you are close to the recommended service interval, hear grinding when applying the brakes, your vehicle is taking longer to stop or if you have to apply more pressure to your pedal to engage the brakes. Check the brake discs for signs of cracks, excessive corrosion or warping.

If the brake pads are contaminated with oils or grease (petroleum products), brake pads have to be discarded and replaced.

Discs need to be cleaned with brake cleaner or alcohol based cleaner only.

THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING as well as the day you brought it home is proper maintenance. Items like belts, filters, and batteries represent only a few of these critical items engineered specifically by Polaris®.

AIR FILTERS

Critical to engine performance and reliability. A clogged air filter can restrict air flow to the engine leading to reduced engine performance. Dirt and debris ingestion can damage the engine leading to reduced engine life or catastrophic failure. Polaris® recommends changing the vehicle's air filter at the specified intervals outlined in the owner's manual, which may be shorter if your vehicle is subject to severe conditions.

DRIVE BELTS

Polaris Engineered® belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

OIL FILTERS

Change oil filters with every oil change to provide the best protection for your engine. Superior engine protection keeps your engine operating at peak performance. Be sure to follow the suggested service intervals for oil/oil filter changes.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new Polaris Sportsman® is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine. Perform the listed procedures carefully.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SERVICE PARTS

Polaris Engineered™ service parts deliver unmatched performance and fit for your off-road vehicle.

All service parts are developed and tested for your vehicle. **Half shafts, bushings, bearings, decals, side panels, electrical components, and clutching components** are the same parts that are manufactured on the factory lines for each specific vehicle. This ensures it doesn't merely fit your vehicle - it outperforms your expectations!

FOR THE LIFE OF YOUR RIDE

Maintenance is the key to keeping your Polaris off-road vehicle performing at its peak. Items like belts, lubricants, and batteries represent only a few of these critical items engineered specifically by Polaris.

POLARIS ENGINEERED DRIVE BELTS

TESTED, PERFECTED

We test each belt on the intended vehicle - we don't just try to make an existing belt "just work".

- Amery Kuhl, Polaris® CVT System Engineer

OUR INVESTMENT

- 32,187 km of field testing
- Thousands of dyno hours
- 18+ months of development (3,000+ design hours) per belt
- 1200+ vehicle validation hours
- Collaboration with powertrain & clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear & tear due to heat
- Ensure maximum performance of your vehicle
- More time out riding, less time wrenching

**OUR INVESTMENTS ENSURE POLARIS BELTS
OUTPERFORM YOUR EXPECTATIONS.**

KEEP IT CLEAN

CLEAN ALL-PURPOSE CLEANER

• Professional cleaner, which is formulated with a low pH-value. The product spreads well on surfaces and adheres on them for effective cleaning action. Perfectly compatible with rubber, plastic and painted surfaces. The formulation is biodegradable.

› 500 mL • 502309

SHINE INSTANT SHINE & DETAILER

• The INSTANT SHINE AND DETAILER is developed for cleaning action without water. Removes insects, dust and dirt with almost no effort. Applicable for plastics, visors, windscreens, paint and metal. The wipe and shine formulation makes surfaces shine, works water repellent and also has an antistatic effect. Perfect for customers living in urban areas with no access to water, for bike trips or showroom bikes.
