PLUG & PLAY ELECTRICAL

POLARIS PULSE IS A REVOLUTIONARY way to provide power to your vehicle, and makes adding electrical accessories a snap.

> TRACKS

Polaris-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improve top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

New front dual stabilizer for improved stability

Polaris exclusive optimized hub geometry that minimizes feedback and eases steering effort

Lightweight design provides for better flotation, eases steering effort and provides better vehicle control

Flexible lug design provides the highest level of deep snow performance by lifting up, as opposed to digging down

When you research audio solutions, you'll see manufacturers bragging about how their audio equipment is "Marine Grade." Or worse yet, you'll discover they are repackaged components built for automotive applications. MB Quart, in partnership with Polaris, engineers Off-Road Grade Audio equipment that's proven to deliver the loudest, crispest sound in the harshest conditions. Rain, snow, mud, heat, cold, dust –

KNOW YOUR TERRAIN

- Tread patterns optimized for extreme traction
- Ideal for both hard pack and loose trail

- Flexible "grippy" tread
- Aggressive side bite

- Provides traction and durability
- Built to perform in hard sand, jagged rocks or any other extreme terrain

SUPERIOR PERFORMANCE & DURABILITY

LIFELONG PERFORMANCE

- Every tire is designed and constructed with longevity in mind
- 3,000+ mile rated (4,828 kilometers)

PREMIUM PROTECTION

- Pro Armor makes tires with extra protection exactly where it's needed most – the sidewall
- Triple-belted sidewalls keep your tires more resistant so you can keep going

TOUGH TIRES

- Higher ply ratings mean added protection
- Pro Armor builds 8 or 10-ply rated tires for higher puncture-resistance

SIDEWALL BELTS

Increase your resistance to sidewall punctures

- Extra deep treads
- Self-cleaning lugs

- Paddles provide traction and durability in soft sand
- Built to float on top of sand

- Triple-belted sidewalls to resist puncture
- Purpose-built, long lasting tread patterns

- Handles extreme cold
- Holds shape and provides traction

GRIZZLY TESTED. POLARIS APPROVED.

This cooler is IGBC-approved, meaning it withstands the power expended by a typical grizzly bear if it was trying to get inside.

Seriously, there are experts who know what a grizzly is capable of doing, and they certify our coolers can take it.

POLARIS NORTHSTAR COOLERS CAN SURVIVE JUST ABOUT ANYTHING - FROM EXTREME HEAT TO A NASTY TUMBLE OFF A VEHICLE.

FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- ✓ CUT STEEL GEARS & SEALED DRIVETRAIN
- ✓ SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

1. Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point
2. Set winch dial to L (Low) for maximum pulling power while winching your load
3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

AUTO STOP TECHNOLOGY

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

PREMIUM SYNTHETIC ROPE

With its lightweight, yet extremely strong, design and superior flexibility, this 15 m long synthetic rope is easy to handle and can stand up to any tough job.

WIRELESS REMOTE

This convenient remote operates your Polaris winch wirelessly from within 15 m of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

FOR THE LIFE OF YOUR RIDE

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new RZR is the first 25 hours of operation, 1 month, or the time it takes to use the first two tanks of fuel (whichever comes first). No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

AIR FILTER

A clogged air filter can restrict air flow to the engine leading to reduced engine performance, engine life or catastrophic failure.

BRAKE PADS

Maintaining and/or replacing brakes are critical to the safety and functionality of a vehicle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination and brake discs should be checked for cracks, excessive corrosion or warping.

HALF SHAFT

Check for tears and punctures in the boot, which can lead to CV joint wear that can contribute to axle failure.

DRIVE BELT

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoid wide open throttle for 8-16 km
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 80 km

OUR INVESTMENT

- 32,187 km of field testing
- Thousands of dyno hours
- 18+ months of development (13,000+ design hours) per belt
- 1,500+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

BATTERY

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a suitable battery charger. Be sure to check for corrosion from the terminals to the ends of the cables.

POLARIS

ENGINEERED PARTS & LUBRICANTS

FOR THE LIFE OF YOUR RIDE ONLY THE BEST WILL DO

To create the best oil for any terrain, we invest in rigorous testing to ensure our oil delivers the consistency and performance you demand. The results are Polaris Engineered Lubricants that are tested and perfected to deliver excellent total engine protection for the life of your ride.

WHAT COUNTS IN OIL TESTING:

1. Does it protect the engine at high temperatures?
2. Does it keep the engine free from carbon and buildup?
3. Does the oil hold its viscosity over time?

ENGINE CHECKPOINTS

When evaluating an engine oil and its ability to protect and preserve the engine's power output and lifespan, Polaris engineers focus on key areas within the engine, some of the most critical ones include:

RING LANDS: Poor oxidative performance can lead to carbon and varnish buildup, which results in poor ring seal and loss of power, combustion blow by and fuel dilution of the oil.

PISTON RINGS: During the combustion process, extreme pressures are placed on the top ring, forcing it outward toward the cylinder wall, sealing the combustion chamber. With so much force applied, poor oil film strength between the top ring and the cylinder wall can lead to cylinder wear and loss of power.

ROD BEARINGS: Engine bearings ride on an extremely thin hydrodynamic film of oil. Poor oil film strength or using an oil with a thinner viscosity, can lead to premature bearing wear or even engine failure. Using an oil with high film strength and a strong viscosity, like PS-4 full synthetic, will extend the service life of your engine.

CAMSHAFT: Direct Acting Overhead Camshafts are used on many Polaris Prostar Engines. In this application the camshaft pushes directly on the valve, creating very high contact pressures compared to other camshaft configurations. These forces are so great that inferior oil can break down and be forced out of the contact area leading to increased wear. PS-4 full synthetic additives are specifically designed to provide wear protection against this.

SPECIFIC NEEDS, SPECIFIC OILS

Polaris invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must spec an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.
